Subject: Recommendation Letter for QUBO Communications

To whom it may concern:

On behalf of the Future Technologies Activity (FTA), implemented by Chemonics International Inc. and financed by the United States Agency for International Development (USAID) and Sweden, I would like to thank QUBO Communications for their high-quality work providing communications and PR services for the Future Technologies Activity. The QUBO team provided excellent support for high profile events in December 2021 including the FTA launch event – attended by Prime Minister Natalia Gavrilita, USAID Administrator Samantha Power, and dozens of high-level individuals from the public and private sector – and the Mediacor soft launch event, also attended by Administrator Power, the Ambassadors from Sweden and the UK, Ministers of Culture and Education and Research, and other guests.

These events were designed to raise the visibility of FTA and its goals; QUBO's PR and outreach work was essential in making them a success and publicizing them widely. FTA has been able to build significant traction on social and traditional media, building on these initial launch events, which would not have been possible without QUBO's support.

We would recommend QUBO Communications' services without reservation to others, and we look forward to future opportunities to work with the team.

Sincerely,

Elizabeth Fustos  
Deputy Chief of Party
