ARTICOLI PER PCR PCR PRODUCTS

Prodotti certificati per PCR: quando si utilizzano materiali di consumo per la PCR l'assenza di DNA, DNase e RNase è essenziale per amplificazioni affidabili.

Tutti i prodotti di consumo per PCR sono esenti da DNase, RNase e DNA. Inoltre, i prodotti sterili sono garantiti apirogeni.

PCR-certified: when using PCR consumables, the absence of DNA, DNase and RNase is essential for reliable amplifications. All PCR consumables are free of detectable DNase, RNase and DNA. Additionally, sterile products are guaranteed free of detectable levels of Pyrogens.

La gamma:

- Provette
- Strips
- Piastre multipozzetto
- Film sigillante
- Rack per campioni

Range for PCR:

- Reaction tubes
- Tubes strips
- Microplates
- Sealing adhesive foils
- PCR workstation

Spessori delle pareti e trasferimento del calore

Specialmente per i protocolli di PCR che prevedono diversi campi di temperatura, sono richiesti trasferimenti di calore veloci ed uniformi tra il termociclature e il campione di PCR. Le provette, le piastre e le strip sono prodotte con pareti ultra-sottili e perfettamente uniformi garantendo un trasferimento ottimale del calore.

Well Wall Thickness and Heat Transfer

Especially PCR protocols with different temperature gradients require fast and uniform heat transfers between the cyler thermoblock and the PCR sample. Ultra-thin and uniformly manufactured tubes or plates guarantee optimal heat transfer.

Il materiale di partenza per il consumabile per PCR - Il Polipropilene

Il Polipropilene, abbreviato in PP, è un materiale termoplastico appartenente al gruppo delle poliolefine. La maggior parte delle materie prime per la produzione di materiali di consumo per PCR sono fabbricati in PP per le sue caratteristiche favorevoli rispetto alla resistenza alla temperatura e alla resistenza chimica. Inoltre il PP è molto leggero a causa della sua bassa densità. Per la produzione di materiali di consumo PCR è utilizzato solamente granulato di PP purificato, eliminando il rischio di contaminazione da componenti indesiderati, come ad esempio tracce di metallo, fin dall'inizio del processo di produzione.

The Starting Material for PCR Consumables - Polypropylene

Polypropylene, abbreviated PP, is a thermoplastic material belonging to the polyolefin group. The majority of the starting materials for the production of PCR consumables today consist of PP because of its favorable characteristics with respect to temperature consistency and chemical resistance. Furthermore, PP is very light weight due to its low density. For the production of PCR consumables are used only highly purified PP granulate, eliminating the risk of contamination by undesired components, such as traces of metal, right from the start of the manufacturing process.

PROVETTE PER PCR PCR TUBES

Caratteristiche

- Volume da 0,2 ml o 0,5 ml
- Perfettamente trasparenti
- Il "clic" alla chiusura conferma che la provetta risulti chiusa
- Disponibili con differenti tipi di tappo (piatto o a cupola, con o senza scudo di protezione)
- Spessore delle pareti ultrasottile per un perfetto trasferimento termico
- Compatibili con la maggior parte dei termociclatori
- Fornite in sacchetti richiudibili
- Certificate RNase, DNase e DNA free, PCR-Clean, PCR Inhibitor free, pyrogen free.
- Autoclavabili (+121°C - 20 minuti), congelabili -90°C e -196°C dipendente dall'uso

Features:

- Volume of 0.2 ml or 0.5 ml
- Perfectly transparent
- The "click" at the close confirms that the tube is closed
- Available with different types of cap (flat or domed, with or without the safety shield)
- Ultra-thin thickness of the walls for a perfect thermal transfer
- Compatible with most thermal cyclers
- Supplied in re-sealable bags
- Certified RNase, DNase and DNA free, PCR-Clean, PCR Inhibitor free, aprotogenic
- Autoclavable (+121 °C - 20 min.)

Piccole e sofisticate ! Le provette per PCR sono realizzate in polipropilene altamente purificato. Lo spessore delle pareti è ultra sottile ed uniforme al fine di garantire un trasferimento veloce ed efficiente di calore durante l'amplificazione. La parte inferiore della provetta a forma di cono e arrotondata semplifica la rimozione del campione. Tutti le provette per PCR sono disponibili con tappi a cupola e con tappi piatti, facilmente marcabili e perforabile. Tutti i tipi di tappi garantiscono una perfetta tenuta e eliminano il rischio di evaporazione del campione durante l'utilizzo. Otticamente trasparenti

Small and Sophisticated! PCR reaction tubes are made from highly purified polypropylene. The low and uniform wall thickness guarantees fast and efficient heat transfer during amplification. The cone-shaped and rounded tube bottom simplifies sample removal. All PCR tubes are available with domed caps as well as with flat, easily markable and pierceable caps. All cap designs guarantee a tight fit on the tube and eliminate the risk of sample evaporation during the cycles. Optically transparent.

La geometria del tappo e le zone di tenuta delle provette per PCR sono appositamente progettate con l'obiettivo di prevenire le contaminazioni. L'opzionale tappo con scudo di protezione riduce il rischio di contaminazioni consentendo di chiudere la provetta toccando con la mano solamente il piccolo schermo di sicurezza integrato nel tappo.

The cap geometry and the soling zones of the PCR tube are specially designed with the aim of preventing contamination. Optional "shielded" tubes additionally reduce the risk of contamination by hand contact with a small safety shield integrated in the tubes cap.

Tube strips! PCR reaction tubes are made from highly purified polypropylene. The low and uniform wall thickness guarantees fast and efficient heat transfer during amplification. The cone-shaped and rounded tube bottom simplifies sample removal. All PCR strips are available with domed caps as well as with flat, easily markable and pierceable caps. Optically transparent "Xtra Clear" tube strips with flat cap are ideal for real-time PCR applications. All cap designs guarantee a tight fit on the tube and eliminate the risk of sample evaporation during the cycles. PCR tube strips are available in bulk with separate attached cap strips or with individually attached caps.

Strip per PCR a parete sottile da 0,1 o 0,2 ml, da 8 o 12 provette, con tappi disponibili in differenti versioni:

- Strip di tappi separati
- Tappi attaccati individualmente

Tutte gli strip di tappi possono essere tagliati a qualsiasi lunghezza desiderata. Oltre agli strip di tappi a cupola, sono disponibili gli strip con tappo piatto "Xtra Clear" sviluppati appositamente per applicazioni di Real-time PCR.

Le strisce di tappi "Perfect Seal" possono essere più facilmente applicate alle piastre o agli strip di provette senza compromettere la tenuta richiesta.

Gli strip di provette e tappi per PCR sono garantiti esenti da tracce rilevabili di RNase, DNase e DNA.

Thin-walled 0.1 ml or 0.2 ml, PCR tube strips with 8 or 12 tubes, with the cap designs:

- *Separate cap strip*
- *Individually attached cap*

All strips and caps can be cut to any desired length. In addition to cap strips with domed caps, "Xtra Clear" flat-cap strips were specially developed for real-time PCR applications.

New cap strips by the name of "Perfect Seal" are more easily applied to plates or tube strips without impairing the required tightness.

PCR tube strips and caps are guaranteed free of detectable RNase, DNase and DNA and are available in natural colors.

PIASTRE PER PCR PCR PLATES

Amplificazione affidabile!

Una gamma di Piastre con 96 pozzetti per PCR di alta qualità. Piastre prodotte in polipropilene per applicazioni standard e in tempo reale. Le piastre sono particolarmente uniformi e prodotte con estrema precisione. Lo spessore delle pareti è particolarmente sottile per un trasferimento ottimale ed uniforme del calore. Le piastre sono di facile lettura un indice alfanumerico semplifica l'allocazione del campione.

L'orientamento delle piastra è semplificato da un angolo smussato. Sono disponibili piastre con differenti tipi di bordi (senza bordo oppure semi bordate) per offrire un'ottima stabilità della singola piastra per il trasporto o per le applicazioni automatizzate. Le piastre a profilo basso "Low-Profile" hanno un volume del singolo pozzetto di circa 200 µl consentendo una riduzione significativa del volume "morto" rispetto alle piastre con profilo standard.

Tutte le piastre sono garantite esenti da RNase, DNase e DNA, PCR-Clean, pyrogen free.

Reliable Amplification !

Plates with 96 wells for PCR, a range of high-quality polypropylene plates for standard and real-time applications. The precision-manufactured uniform plates with extremely thin-walled wells guarantee optimal heat transfer and the easy-to-read alphanumeric index simplifies sample allocation.

For simplified plate orientation one corner is cut off, depending on the individual plate design. Differently configured plate edges (non-skirted or semi-skirted plates) offer individual plate stabilities for transport or automated applications.

Low-profile plate formats with well volumes of approximately 200 µl show significantly reduced well dead-volumes compared to standard profiles.

All plates are guaranteed free of detectable RNase, DNase and DNA, PCR-Clean, pyrogen free.

Semi-skirted plates, standard height. Compatible with most of thermal cyclers.

Caratteristiche

- Prodotte con particolare precisione e con tolleranze dimensionali estremamente basse
- Disponibili senza bordo per una adattabilità universale, compatibili con la maggior parte dei termociclatori. Le piastra senza bordo hanno una alta flessibilità che garantisce la massima compatibilità con i termo blocchi. Le Piastra senza bordo sono facilmente tagliabili con forbici secondo le dimensioni desiderate
- Le piastra semi-bordate sono disponibili con altezza standard o con profilo basso "Low Profile". Le piastra semi-bordate possiedono un mezzo bordo di circa 7 mm di altezza che circonda la superficie della piastra. Il bordo migliora la stabilità della piastra e migliora l'idoneità per applicazioni automatizzate. Inoltre è possibile l'etichettatura della piastra con etichette barcode.
- Confezioni piccole e pratiche di tipo richiudibile
- Certificate DNase, RNase e DNA free - PCR-Clean. Autoclavabili a +121°C - 20 minuti

Features:

- Precision-manufactured uniform plates with low tolerances
- Plates are available non-skirted. Non-skirted PCR plates do not have a skirt surrounding at their edges and can be universally used with established thermal cyclers. High plate flexibility guarantees optimal fit in the thermoblock. Non-skirted plates are cutting for use in smaller formats is possible.
- Semi-skirted plates are available with standard height or Low-profile. Semi-skirted plates possess an approximately 7 mm high half skirt which surrounds the complete edge of the plate. The skirting enhances the stability of the plate and improves the suitability for automated applications. Furthermore, labeling of the plate's edge is possible with barcode labels.
- Conveniently packaged in resealable bags
- All plates are certified DNase, RNase and DNA free - PCR-Clean. Autoclavable (+121 ° C - 20 min.)

Angolo smussato per il corretto orientamento della piastra

La posizione esatta dell'angolo smussato "corner-cut", si trova nella posizione indicata per ogni piastra (H12 o A12). Nell'immagine accanto, per esempio, nella posizione A12

Cut off corners for better plate orientation

The exact position of the "corner-cut", the cut off plate corner is found at the end of the respective article description, e.g. in the case of the shown figure, position (12A).

Metodi di sigillatura / Sealing options

La scelta del metodo di sigillatura dipende da numerosi diversi criteri. Che temperatura deve sopportare il materiale? Deve essere otticamente trasparente per PCR Real time (cioè dimostrare bassa auto-fluorescenza). E 'chimicamente stabile? A seconda dell'applicazione PCR necessaria, offriamo due metodi di sigillatura delle piastre.

Choosing an individual sealing material or an individual sealing technique depends on numerous different criteria. Which temperature must the material withstand? Must it be optically transparent for real-time PCR (i.e. demonstrate low auto-fluorescence). Is it chemically stable?

Depending on the individual PCR application, We offer two discrete sealing options

Strip da 8 o 12 tappi / 8 or 12 cap strips

Cod. 1710 - 1720 - 1810 - 1820

Gli strip di tappi per PCR sono realizzati in PP altamente purificato. Gli strip "Xtra Clear" con tappo piatto sono otticamente trasparenti per Real Time PCR. Sono disponibili anche strips di tappi a cupola. Gli strips di tappi sono di nuova concezione "Perfect Seal" e più facilmente utilizzabili con le piastre senza comprometterne la tenuta necessaria.

PCR cap strips are produced from highly purified PP. Optically transparent "Xtra Clear" flat-cap strips for real-time PCR as well as strips with domed caps are available.

Easy handling! Newly developed cap strips named "Perfect Seal" are more easily attached to plates or tube strips without affecting the necessary tightness.

Fogli sigillanti adesivi / Sealing foils & films

Cod. 11950

E' una pellicola in poliolefina ultra-trasparente "Xtra Clear" ideale per applicazioni di Real Time PCR.

Pellicola sensibile alla pressione. La base adesiva non lascia residui che potrebbero causare interferenze ottiche.

It is available in transparent polyolefin film. Pressure-sensitive ultra-transparent "Xtra Clear" film is ideal for real-time applications. The silicon-based adhesive component leaves no residues which might cause optical interference.

ITEM CODE:

FOGLI SIGILLANTI ADESIVI PER MICROPIASTRE

FILM ADESIVO TRASPARENTE IDONEO PER APPLICAZIONI DI PCR. IL FILM È UNA PELLICOLA IN POLIOLEFINA DA 0,05 MM RIVESTITO SU DI UN LATO CON ADESIVO ACRILICO SENSIBILE ALLA PRESSIONE. L'ADESIVO NON RILASCIA RESIDUI CHE POTREBBERO CAUSARE INTERFERENZE OTTICHE. OGNI FOGLIO È FORNITO SU DI UN SUPPORTO LINER DI CARTA BIANCA.

SEALING ADHESIVE FOILS FOR MICROPLATES

ADHESIVE TRANSPARENT FILM SUITABLE FOR PCR APPLICATIONS. SINGLE COATED SEAL CONSISTING OF A 0.05MM POLYOLEFIN FILM COATED ON ONE SIDE WITH A PRESSURE SENSITIVE ACRYLATE ADHESIVE. THE SILICON-BASED ADHESIVE COMPONENT LEAVES NO RESIDUES WHICH MIGHT CAUSE OPTICAL INTERFERENCE. THE SEAL IS SUPPLIED ON A WHITE PAPER RELEASE LINER.

Caratteristiche

- Otticamente trasparenti
- Idonei per ricerca in ambito bioanalitico
- Idonei ad essere utilizzati con piastre prodotte in polipropilene, polistirolo e in policarbonato
- Compatibili con soluzioni acquose e solventi organici
- Adatti per stoccaggio a breve termine e incubazione per PCR
- Range di temperatura da max +110°C a min. -70°C (-80°C per brevi periodi di stoccaggio - 2-3 giorni)
- Evaporazione minima del contenuto della piastra
- Otticamente trasparente per una facile visione del contenuto della piastra
- Minima contaminazione incrociata
- Bassa auto fluorescenza
- Resistente al DMSO
- Confezioni facili da maneggiare da 100 pezzi
- Non sterile, validità 3 anni

Features:

- Optically clear
- Suitable for use in bio-analytical research
- For use with polypropylene, polystyrene, and polycarbonate microplates
- Compatible with aqueous solutions and organic solvents
- Compatible with thermal cyclers
- Suitable for use between -70°C and 110°C (-80°C for short periods - max 2-3 days)
- Minimal evaporation of microplate contents over use conditions
- Optically clear properties for ease of read-through
- Minimal cross-well contamination
- Low auto-fluorescence
- Resistant to DMSO
- Easy to handle delivery system, pack size 100 pieces
- Non sterile, expiry date 3 years

RACK PER CAMPIONI PCR PCR WORKSTATION

Tutto ben organizzato !

I sistemi rack sono stati progettati per la conservazione sicura e semplice dei campioni. I sistemi sono disponibili in vari colori e con differenti capacità di sistemazione dei campioni. Possono essere utilizzati universalmente con provette PCR e/o piastre fino a temperature di -90 °C. Il coperchio trasparente fornisce una protezione affidabile contro la contaminazione del campione.

Well Arranged!

Rack systems were designed for safe and simple sample storage. The systems are available in various colors and with different sample accommodation capacities. They can be used universally with PCR tubes and/or plates down to temperatures of -90 °C. The transparent lid provides reliable protection against sample contamination.

Rack per campioni PCR

Sistema componibile molto pratico per la conservazione di provette, strips di provette e piastre sia da 0.5 ml che da 1.5/2.0 ml.

L'indice alfanumerico stampato nel rack consente una facile identificazione del campione. Due diverse opzioni di rack A e B possono essere facilmente combinati per formare un "combi-rack". E' adatto per temperature comprese tra -90 °C a + 121 °C. Autoclavabili.

PCR Workstation

Practical combination system for effective storage of PCR tubes, tube strips and plates as well as 0.5 and 1.5/2.0 ml microcentrifuge tubes.

The alphanumeric index molded in the rack enables easy sample identification. The two differently dimensioned rack options A and B are easily connected to form a "combi-rack". It is suitable for temperatures from -90 °C to 121 °C and autoclavable.

Rack "A"

Capacità:

n° 96 x 0,2ml provette per PCR o strips di provette o piastra per PCR a 96 pozzetti

Dimensioni esterne con coperchio:

(L x P x A): 128 x 87 x 33 mm

Capacity:

n° 96 x 0.2 ml PCR tubes or tube strips and 96-well PCR plates.

Outside dimension with lid:

(W x D x H): 128 x 87 x 33 mm

Rack "B"

Capacità:

n° 32 x 0,2ml provette per PCR
n° 16 x 0,5ml provette per PCR
n° 24 x 1,5 / 2,0 ml microprovette

Dimensioni esterne con coperchio:

(L x P x A): 215 x 120 x 50 mm

Capacity:

n° 32 x 0.2 ml PCR tubes
n° 16 x 0.5 ml tubes (PCR or MCT)
n° 24 x 1.5/2.0 ml microcentrifuge tubes

Outside dimension with lid:

(Wx D x H): 215 x 120 x 50 mm

Rack "A" + "B" combinati / combined

Rack A inserito all'interno dell'apposita area del rack B

Rack A is inserted without lid in the designated zone in Rack B

- TO WHOM IT MAY CONCERN -

Canelli, 28/10/2025

We, Aptaca S.p.A., hereby inform you that products listed in the Annex A are for “General Laboratory Purposes” as they do not have a specific intended use as a medical device or an *in vitro* diagnostic medical device. Therefore, they cannot be included in the definitions of a medical device or an *in vitro* diagnostic medical device as described in the Directives 93/42/EC and Regulation 2017/745 and 98/79/EC and 2017/746 respectively, and as clarified in the MEDDEV documents on Borderline issues (MEDDEV 2.14/1 rev2). As such, these products do not qualify for CE marking and do not require a Declaration of Conformity.

The intended purpose is “For generic laboratory uses”, devices used with human biological samples in order to carry out laboratory diagnostic analysis and *in vitro* diagnostic applications. Only for professional use.

The devices are manufactured with Quality System compliant with the UNI EN ISO 9001 and UNI CEI EN ISO 13485 standards.

Yours sincerely,

3215	Sterile membrane filter 0.2 ul for automatic pipettor
3216	Membrane filter 0.2 ul for automatic pipettor, no sterile
3220	Wall holder for automatic pipettor cod. 3200
3250	Automatic pipettor for pipettes 0,1-100 ml autoclavable
3300	Pipette stand round in PP, 94 places, Ø230 x 426 mm
3400	Cylinder for pipettes in PP, Ø82 x 426 mm
3500	Deep tray for pipettes in PVC, for pipettes of different dim.
3600	Pipette-tray for drawer, in PVC, divided in 4 sectors
3700	Pipette holder - vertical in PP, 16 places, 200x75x150mm
3800	Pipette filler in red rubber, with 3 valves, universal model FOR ALL PIPETTES
3851	Pipette pumps in PP, for pipettes 2ml, blue colour
3852	Pipette pumps in PP, for pipettes 10ml, green colour
3853	Pipette pumps in PP, for pipettes 25ml, red colour
3860	Universal safety pipette bulb, in red rubber
3900	Automatic pipettes rinsing set in PP, Ø170 x 734 mm,
3901	SPADENT individually cased Containers x dental prosthesis with basket to lift prosthesis
3905	Pipette jar Ø162 x 650 mm
3910	Pipette basket Ø145 x 648 mm
3950	Bench pipettes holder in PMMA with 4 shelves, 300x100x420 mm
4003	0.5 ml amber color micro test tube, PP, graduated, Ø8x32mm, DNase & RNase free
4035	Non-treated petri dishes for cell culture Ø35x10 mm, with vents, sterile, pyrogen-free
4060	Non-treated petri dishes for cell culture Ø60 x 15 mm, with vents, sterile, pyrogen-free
4100	Non-treated petri dishes for cell culture Ø100x20 mm, with vents, sterile, pyrogen-free
4103	1.5 ml amber color micro test tube, in PP, graduated, Ø10.5x40mm, DNase & RNase free
4150	Non-treated petri dishes for cell culture Ø150x20 mm, with vents, sterile, pyrogen-free
4203	2 ml amber color micro test tube, in PP, graduated, Ø10.5x40mm
5350	Adhesive risk indicator tape in PVC, yellow background, dimensions h. 38mm x 66 meters
5352	Sterilization indicator tape, for steam, 50 mt x 19 mm
5353	Sterilization indicator tape, 50x19mm, Dry Heat
5354	Sterilization indicator tape, for ethylene oxide gas, 50 mt x 19 mm
5355	Sterilization indicator tape, for steam, 50 mt x 25 mm
5360	Ethylene oxide gas integrator 16x97mm
5370	Gas plasma chemical indicator strip (hydrogen peroxide), Dim. 14.3 x 96.5 mm
5380	Bowie-Dick test Dim. 130 x 100 x 17 mm
5390	Chemical integrator to grant correct steam sterilization Dim. 20 x 101
5685	Flexi-Strip for blood smear in PS, lenght 76 mm, width 22 mm and 26 mm
5905	Metallic mixers Ø3.17 mm, for Amelung
5906	Metallic mixers Ø2,00 mm, for Gilford
6006	Plates non-treated for cell culture, 6 wells 2.0 ml, flat bottom, sterile, DNA free
6012	Plates non-treated for cell culture, 6 wells 2.0 ml, flat bottom, sterile, DNA free
6024	Plates non-treated for cell culture, 24 wells 1.0 ml, flat bottom, sterile, DNA free

6025	Cryo tubes box 25 places in PC for cryo tubes 1.2 and 2 ml light blue colour, 76x76x52 mm
6380	Cryotubes workstation, 40 places.
1324/50	Cap-locks for micro test tubes in PP, for 5 ml
1324/05	Cap-locks for micro test tubes in PP, for 0.5 ml
1324/15	Cap-locks for micro test tubes in PP, for 1.5 - 2 ml
1323/05	Pestles in PP for microtubes 0.5 ml
1323/15	Pestles in PP for microtubes 1.5 - 2 ml
6048	Plates non-treated for cell culture, 48 wells 0.5 ml, flat bottom, sterile, DNA free
6096	Plates non-treated for cell culture, 96 wells 0.2 ml, flat bottom, sterile, DNA free
6150	Crytube box in PC, 100 places, for test tubes Ø 1.2 and 2 ml, 132 x 132 x 52 mm, light blue
6320	Cryotube box in PP, 81 places for test tubes Ø 1.2 - 2 ml 133 x 133 x 52 mm
