

FUDO PAM PRIVILEGED ACCESS MANAGEMENT

RELIABLE. SCALABLE. USER FRIENDLY.

A COMPREHENSIVE APPROACH

Listed by Gartner as one of the most complete PAM solutions offering 3 main modules:

SESSION MONITORING

Allows for seamless live session streaming. The web-based content player supports session joining while Fudo PAM's proactive monitoring feature can automatically terminate a connection upon detecting a predefined pattern.

SECRET MANAGER

A complete password management solution. Automatically generated passwords are stored securely while their customizable complexity ensures that they follow your organization's compliance regulations. Additionally, it's an all-in-one feature which doesn't require any third-party plugins.

EFFICIENCY ANALYZER

A state-of-the-art business intelligence tool which measures the productivity of your users and your organization.

TOP NOTCH SESSION MONITORING WITH PREVENTION

Fudo provides every possible tool to supervise privileged remote sessions including: live sessions viewing, session sharing for both Fudo users as well as third parties. Furthermore proactive monitoring allows for notification alerts, suspension or termination of a suspicious session.

ONE DAY DEPLOYMENT

Smooth and rapid integration into any IT infrastructure. Second to none, it's plug&play for your cybersecurity needs.

ALL-IN-ONE. NO HIDDEN COST.

Fudo PAM does not require the installation of additional software or agents, which enables rapid deployment and integration within existing IT infrastructures. The appliance includes a server, storage and management tools. There's no need to purchase additional licences of third party vendors.

HIGH LOAD READY

Fudo PAM supports a multi-master cluster configuration ensuring high availability and performance scaling. The basic appliance model handles up to 50000 concurrent SSH sessions.

USER EXPERIENCE DONE THE RIGHT WAY

Manage privilege access in your browser. An intuitive GUI and easy configuration allows you to start working in as little as 5 minutes after installation is complete, using native RDP/SSH or database clients.

FUDO PAM PRIVILEGED ACCESS MANAGEMENT

KEY FEATURES:

SUPPORTED PROTOCOLS

- Command line protocols: SSH, Telnet, Telnet 3270, Telnet 5250.
- Graphical protocols: RDP, VNC, X11.
- Database protocols: MySQL, TDS implementation for MS SQL.
- Web protocols: HTTP, HTTPS.
- Production infrastructure protocols: Modbus.

4 EYES AUTHENTICATION WITH MOBILE APP

- 4-eyes approves server access requests using a mobile application or the Fudo PAM web interface.

SESSION TAGGING / IN-DEPTH ANALYSIS

- The session player allows for skipping inactivity intervals, fast-forwarding as well as seeking to a specific time within the recorded content.
- Sessions can be commented and tagged while full-text search and advanced filtering options enable finding desired content quickly.

SESSION COLLABORATION

- Co-sharing session enables the system administrator to join a given connection and work along a remote user.
- A third-party user may be invited to join and collaborate or view the livenessession.

REMOTE USER PORTAL

- User Portal ensures intuitive access to monitored systems. A single click opens a native client application with all the connection information already filled in.

DIRECTORY SERVICES SUPPORT

- Fudo PAM supports LDAP and Active Directory services which allows a user's definitions to be imported as well as verifying the user's login credentials.

TRUSTED TIMESTAMPING

- A trusted timestamp makes recorded sessions invaluable for use as evidence in court. The feature supports trusted time-stamping services provided by external institutions.

APPLIANCES' SPECIFICATION:

			
	F1002	F3002	F5000
Form factor	2U	3U	4U
Data storage (raw)	12 x 2TB = 24TB	16 x 6TB = 96TB	36 x 8TB = 288TB
Data storage (usable)	18.2TB	71.8TB	261TB
Max number of concurrent sessions ¹	up to 100	up to 200	up to 300
Capacity ²	6 months	2 years	7 years

¹ Average 30% FullHD 32bit graphical and 70% terminal sessions ² Calculated for 50 sessions created per day with average 70% RDP FullHD 32bit and 30% SSH

All models are also available
as virtual appliances:

vmware

VirtualBox

KVM
