CA-MI

Italian
Medical
Touch

COMPANY PROFILE

Located nearby Parma, in the North of Italy, CA-MI is an Italian family-run factory founded in 1984 and committed to the production and distribution of electromedical equipments and medical devices in different fields, such as RESPIRATORY CARE, DIAGNOSTICS, REHABILITATION, WELLNESS, BABY CARE, and SUCTION.

The expertise and know-how achieved in over 30 years led CA-MI in the position to export into more than 100 countries and to provide comprehensive answers to the home-care market and medical operators.

Visitors are welcome to meet the members of the CA-MI Export Team at the major international exhibitions: Medica in Dusseldorf (D), Arab Health in Dubai (UAE), FIME in Miami (USA), Medica Asia in Singapore, where CA-MI is costantly present with the entire range of medical devices.

ITALIAN QUALITY CERTIFIED WORLDWIDE

Relying on in-house R&D and design departments, all CA-MI suction devices and compressor nebulizers are either manufactured or designed in Italy using state-of-the-art and wear resistant materials, in compliance with all the directives in force.

UNI EN ISO 9001:2015

Quality Management System.

EN ISO 13485:2016

Medical devices - Quality management systems - Requirements for regulatory purposes.

DEVICES CLASSIFICATION

CLASS IIA MEDICAL DEVICES

Suction units, aerosol delivery systems, jet nebulizers, inhalators, nasal irrigator, blood pressure monitors, digital and infrared thermometers, finger pulse-oximeters, antidecubitus mattress.

CLASS IM WITH FUNCTION OF MEASURE

Aneroid / palm-type sphygmomanometers, suction containers, disposable liners and mercury-free clinical thermometers.

CLASS I NON-STERILE

Incentive spirometers, medical stockings, wheelchairs and walkers, stethoscopes.

Technical data, equipment and options shown are based on the latest information available at the time of printing and are subject to change without notice.

RESPIRATORY

AEROSOL DELIVERY SYSTEMS

ABOUT AEROSOL THERAPY

Aerosoltherapy is the **administration of a treatment in the form of aerosol into the respiratory tract** for therapeutic purposes. When medications are not available in aerosol form such as an MDI, but only in solutions, nebulizers can turn the liquid into suspended particles that carry the active principle to the patient by inhalation.

CA-MI manufactures nebulizers with different technologies indicated for the treatment of any respiratory disorder, from **administering physiological/hypertonic solutions** as mucus thinners (mucolytics), to **treating seasonal pathologies** such as cold and cough, and **acute and chronic pathologies** of the upper and lower airways.

PARAMETERS & TREATMENTS

Different types of treatments can be generated, according to a few parameters, namely:

MMD OR MMAD

The mean particle size, expressed in micron (μm)

NEB-RATE

The speed of nebulization, expressed in ml/min

RESPIRABLE FRACTION

The amount of particles with diameter $<5\mu\text{m}$

RESIDUAL VOLUME

The amount of medication that cannot be nebulized

WASTED VOLUME

The amount of medication wasted during exhalation

The **mean particle size (MMAD)** is particularly important, because depending on diameter of the particles, **different areas of the respiratory tract are reached and thus different pathologies or disorders can be treated.**

TINY & NOISELESS

CA-MI **vibrating mesh nebulizers** are small hand-held nebulizers that generate the aerosol by a mesh vibrating at high frequency, micronizing the medicine without producing any sound.

A new system which finds more and more applications, not only for children, enjoying the **soundless operation**, but also towards adults, appreciating the **small size, the versatility and the light weight** of this revolutionary aerosol system.

MEDICAL CUP

Light and easy to clean

USB POWERED

The device can be powered through any USB device like a powerbank, a laptop or even your smartphone.

ALWAYS WITH YOU

Very easy to carry and use in any travel condition thanks to its small size.

▲ ONEPro, p. 4

▲ Evolution, p. 8

A PLACE FOR EACH ACCESSORY

CA-MI always designs its devices with its customers' needs in mind: the aerosol delivery system line includes **handy and compact models** provided with a **carrying bag** for storage of the unit, accessories and medicines, or **table-top models with a built-in compartment** designed for accessories and medicines storage.

DURABLE & EFFICIENT

CA-MI **compressor nebulizers** are characterized by a main unit, the piston-type compressor, and the jet nebulizer, which is a chamber turning the liquid medicine into aerosol.

CA-MI compressors are approved for **Non-Stop Operation** and do not require any oil lubrication or maintenance, making them suitable for both **prolonged home care use and intensive professional use in the hospitals**.

Additionally, a specific attention is dedicated to emergency and ambulances: micropiston compressors are placed in miniaturized housings to create devices powered by rechargeable batteries and 12V car adapter.

SAFE & STABLE

All CA-MI jet nebulizers are made with **safe biocompatible material** which passed stability test with the most prescribed active principles, **guaranteeing that no alteration of the drugs** takes place.

Tested medicines are: *Ambroxol, Salbutamol, Beclometasone Dipropionate, Acetylcysteine and Budesonide*.

ONEPro

MOBILE MESH NEBULIZER

Always with you

Very easy to carry and use in any travel condition thanks to its small size.

Full Green Energy Saving

No internal battery to recharge. The device is powered by the USB devices you use daily.

Quiet

The peculiar design and the small size allow to apply it to the face and to use it also hands-free.

USB Powered

The device can be powered through any USB device.

INCLUDED ACCESSORIES

ADULT MASK + CHILD MASK

with elastic strings

MOUTHPIECE + NOSEPIECE

non-invasive

USB-C and USB-Lightning

PRODUCT CODE RE 300912/01

KIWI+

MOBILE MESH NEBULIZER

Fast & efficient

Second generation mesh nebulizer, 8ml capacity, takes only 6 minutes with 2,5 ml of drug (0,30ml/min).

Long lasting batteries

The lithium batteries last up to 1100 hours of operation or 300 charging cycles, making it the ideal device for travelling.

Always with you

Tiny and easily transportable thanks to its small size. It can be operated by lithium battery and easily stored.

Baby friendly

Easy to hold thanks to its small size and pleasant to hear thanks to its low noise level (38,2dB(A)),

High-quality accessories

Equipped with a wide range of accessories with comfortable soft touch finishings.

Autocleaning function

Reduces the risk of annoying clogging of the mesh caused by improper cleaning at the end of each use.

Excellent nebulization

Fine particle size of 1,51 micron, 93% of which is <5 micron and <0,1ml residual volume.

INCLUDED ACCESSORIES

VIBRATING MESH CHAMBER

2nd generation

FOUR SPEED JET NEBULIZER

Professional Performance

Designed with two valves for a greater therapeutical effect of the nebulization.

Multiple speed

A speed selector can be set in 4 different positions to increase nebulization speed while maintaining an optimal MMAD.

Highly compatible

Passed stability test with the most prescribed active principles (Ambroxol, Salbutamol, Beclometasone Dipropionate, Acetylcysteine, Budesonide).

Excellent nebulization

8 ml capacity, MMAD ranging from 3,32 to 4,28 μm and neb-rate from 0,40 to 0,80 ml/min, depending on selected speed.

TECHNICAL SPECS

EXHALATION VALVE

Opens only during exhalation phase to let the medication out.

INHALATION VALVE

Opens only during inhalation, entraining additional ambient air into the chamber increasing dramatically the speed and quantity of delivered medication.

SPEED SELECTOR

Four different nebulization speeds.

POS	NEB RATE	MMAD
I	0,40 ml/min	3,32 μm
II	0,60 ml/min	4,07 μm
III	0,70 ml/min	4,23 μm
IV	0,80 ml/min	4,18 μm

AVAILABLE SETS

RE.300350 | COMPLETE SET IN DISPLAY BOX

DIAGNOSTICS

THERMOMETERS

ABOUT FEVER

A fever is a **temporary increase in the body temperature**, often due to an illness. A normal temperature can vary from person to person, but it is usually around 37°C. Normal body temperature may also fluctuate depending on the time of day. It tends to be lower in the morning and higher in the late afternoon and evening. Other factors, such as menstrual cycle or intense exercise, can also affect body temperature.

Having a fever is a sign that **something out of the ordinary is going on in the body**. Fever seems to play a key role in **helping the body fight off a number of infections**.

For an adult, a fever may be uncomfortable, but usually is not cause for concern unless it reaches 38°C or higher. For infants and toddlers, a slightly elevated temperature may indicate a serious infection.

ECOLOGICAL, DIGITAL OR INFRARED?

An accurate reading of a person's temperature is a vital tool in managing illnesses. CA-MI provides different models of thermometers to satisfy any requirement in monitoring body temperature.

Mercury-free types are eco-friendly, digital types have rigid or flexible tip, and infrared scanners are quick and contactless, yet they all guarantee accurate and safe results.

▲ Digit-10P, p.18

▲ T-Vedo, p.19

QUALITY & ACCURACY

With the objective of combining **accuracy, easiness and quickness** in reading temperature, CA-MI pays special attention to the selection of **premium components**, such as sensors, probes and plastics. In fact, CA-MI thermometers are largely requested by users worldwide.

SMART MEASUREMENT

Temperature is measured without pressing any button. The device beeps to notify the measurement conclusion.

FEVER ALARM

Triple color led and buzzers to indicate different temperatures.

POCKET SIZE

The compact IR thermometer to always carry with you, only 2.5 x 4.5 cm.

*Always
WITH YOU*

▲ T-Touch, p.20

NON-CONTACT ADVANTAGES

There are several distinct advantages that have made non-contact thermometers very popular. First of all the possibility of **passing contagious infections** from one person to other is **ruled out** altogether. No matter how carefully you rinse or clean the bulb of the conventional mercury thermometer, the risk of infection transmission cannot be eliminated.

There are times when the **temperature** of the diseased person **has to be recorded periodically**, sometimes even when the patient is taking rest or sleeping: with those thermometers, any nurse can record the body temperature of the patient without disturbing. This same feature is also very helpful in taking the temperature of infants, kids or even aged persons with limited motor controls.

They also come with a **recording function** to check the latest readings, helpful in making accurate temperature charts for the physicians who need to diagnose and decide the line of treatment.

The large digital display allows for **easy reading** even for people with vision problems. More over these thermometers, can have **multiple uses** like measuring the temperature of warm water for baby bath or of infant feed, milk, etc.

◀ T-Plus, p. 21

◀ Counter display box for digiT-40 and digiT-40F thermometers, p.18

T-TOUCH

INFRARED THERMOMETER

IR contact technology

Instant temperature detection by placing the thermometer on the forehead surface.

Smart measurement

Temperature is measured without pressing any button. The device beeps to notify the measurement conclusion.

Fever alarm

Triple color led and buzzers to indicate different temperatures.

Wide memory

Stores up to 20 measurements for easy monitoring.

Energy save

Low consumption: more than 1200 measurements with 1 CR2032 battery. Automatic shutdown.

Pocket size

The compact IR thermometer to always carry with you (only 2.5 x 4.5 cm).

INCLUDED ACCESSORIES

3V VOLT BATTERY

1xCR2032

SOFT POUCH

PRODUCT CODE TR 100401

T-EASY

INFRARED THERMOMETER

Non-contact technology

Measurements are taken up to 5 cm from the forehead guaranteeing the best hygienic conditions.

Instant measurements

Extremely quick: takes 1 second to measure temperature.

Auto cooldown

Prevents systematic errors caused by too frequent tests.

Fever alarm

Triple color backlight and 3 different buzzers to indicate different temperatures.

Dual mode

Detects both body and surfaces temperatures.

Wide memory

Stores up to 30 measurements for easy monitoring.

Energy save

Automatically shuts off after 30 seconds.

INCLUDED ACCESSORIES

CARRYING BAG

for safe storage and transport

1.5 VOLT BATTERIES

2 x Alkaline AAA size

PRODUCT CODE TR 100500/01

T-PLUS

INFRARED THERMOMETER

Non-contact technology

Measurements are taken between 0-3cm from the forehead guaranteeing the best hygienic conditions.

Instant measurements

Extremely quick: takes 1 second to measure temperature.

Superior accuracy

Provided with 3 special sensors detecting temperature, correct distance, and temperature balance. Operated by the extremely precise Japanese state-of-the-art firmware.

Position aid

A dedicated distance sensor guides user to reach the correct measuring distance.

Auto cooldown

Prevents systematic errors caused by too frequent tests.

Fever alarm

Triple color backlight and 3 different buzzers to indicate different temperatures.

Wide memory

Stores up to 30 measurements for easy monitoring.

Energy save

Automatically shuts off after 30 seconds.

Dual mode

Detects both body and surfaces temperatures.

INCLUDED ACCESSORIES

RIGID PLASTIC CASE

for safe storage and transport

1.5 VOLT BATTERIES

2 x Alkaline AAA size

PRODUCT CODE TR 100500

DIGIT-10P

DIGITAL THERMOMETER

PREDICTIVE

Advanced algorithm predicting the correct temperature with superior accuracy, no matter where you measure it.

SUPER QUICK

Takes only 10 seconds to measure body temperature.

EASY-READ

Thanks to a wide LCD screen of 2,35 x 1,55 cm with 3 backlight colours.

FEVER ALARM

Triple color backlight to indicate different temperatures.

SHOCK & WATERPROOF

Certified IP55 rating.

EASY TO CLEAN

With any alcohol-based solution.

ENERGY SAVE

Automatically shuts off after 5 minutes.

LONG LASTING

Up to 600 measurements and three years of life thanks to the replaceable battery.

DISPLAY BOX

4-colour counter display box of 12's can be folded and used as display box on retail counters.

DIAGNOSTICS

BLOOD PRESSURE MONITORS

BLOOD PRESSURE MONITORING

Blood pressure is the term used to describe **the strength with which blood pushes on the sides of the arteries** as it is pumped around the body.

High blood pressure (hypertension) can put a strain on the arteries and organs, which **can increase the risk of developing** serious problems such as **heart attacks and strokes**. Low blood pressure (hypotension) is not usually as serious, although it can cause dizziness and fainting in some people.

Monitoring blood pressure is the only way to find out if the blood pressure is too high or too low, because most people will not have any obvious hypertension symptoms.

DIFFERENT SOLUTIONS FOR EVERY NEED

A variety of blood pressure monitors is available so blood pressure can be measured while at home or out and about. Whether one's preference goes to wrist or upper arm type, CA-MI has the perfect product to suit every need.

UPPER ARM

Classic design meets state of the art technology. Thanks to the implemented inflation technology measurements are quick, gentle and reliable.

WRIST TYPE

Small in size, yet accurate. Quick and easy to wear and very convenient for everyday use, wherever you are.

COMFORTABLE & EASY TO USE

CA-MI selected a wide range of products that grants reliability, comfort and ease of use. Anyone can check their own blood pressure every day, and assist the clinician with accurate information.

COMFORTABLE

Soft-finishing cuff, wrapping gently around the arm.

EASY TO READ

Blood pressure values are classified according to the World Health Organization guidelines.

RELIABLE

Guarantees reliable results thanks to body movements and interferences detection system.

QUICK AND GENTLE

Thanks to the inflation technology blood pressure is monitored in a gentler and quicker way during the gradual inflation of the cuff.

▲ Nissei Comfort, p. 24

STATE-OF-THE-ART TECHNOLOGY

Nissei Motion is the first wrist type blood pressure monitor combining the gentleness of inflation technology with the superior accuracy of the High Resolution System and M-Shaped Cuff.

▲ Nissei Motion, p. 26

CA-MI IS EXCLUSIVE EU DISTRIBUTOR OF NISSEI

PRECISE AND VALIDATED

Most of CA-MI devices passed the ESH (European Society of Hypertension) clinical accuracy test, known as the most stringent test of clinical accuracy in the world.

Moreover, to display measurements in a more comprehensible and worldwide recognized way, these devices comply with the WHO Classification Guidelines.

NISSEI COMFORT

UPPER ARM BLOOD PRESSURE MONITOR

Clear Read

Wide LCD monitor: all info at one glance.

Innovative inflation technology

Measurements are quicker and gentler: blood pressure is monitored during the gradual inflation of the cuff.

Irregular heartbeat detection

Detects irregular pulse rhythms, index of cardiac arrhythmias.

Body sensor

Detects body movements or interferences that may cause measurement errors.

Wide range comfortable cuff

The cuff can fit a wide range of arm sizes: 22 - 42 cm. Thanks to its soft finishing, it wraps gently around the arm.

Personal Mode

Cuff's inflation is adjusted according to the latest 3 readings, shortening the measurement time and improving comfort.

Average value

Displays the average of the latest three readings.

Circulatory risk indicator

Displays Pulse Pressure, a parameter related to artery stiffness and circulatory risk factors.

ESH clinical validation

Technology in compliance with the European Society of Hypertension IP2010 protocol.

Extended warranty

The product is guaranteed 5 years.

WHO Classification

Blood pressure values are classified according to the World Health Organization guidelines.

INCLUDED ACCESSORIES

CARRYING BAG

for safe storage and transport

1.5V BATTERIES

4 x Alkaline AA size, replaceable

COMFORT CUFF

Size: 22 - 42 cm, with soft finishing

PRODUCT CODE Comfort (DS-B33-04)

NISSEI DELICARE

NISSEI MOTION

WRIST BLOOD PRESSURE MONITOR

Hi-Resolution System

Scans pulse wave 6 times more frequently than conventional monitors, allowing the detection of irregular pulse rhythms which may be an indicator of cardiac arrhythmias, such as atrial fibrillation.

Innovative inflation technology

Measurements are quicker and gentler: blood pressure is monitored during the gradual inflation of the cuff.

Body sensor

Detects body movements or interferences that may cause measurement errors.

M-Shaped cuff

Improves measurement's precision binding the two wrist's bones securely so that arterial blood vessels are firmly tightened during inflation.

Irregular heartbeat detection

Detects irregular pulse rhythms, index of cardiac arrhythmias.

Cuff Status Function

Checks the correct positioning of the cuff before measurement.

Double memory, double user

Stores up to 60 results in each memory bank.

Always with you

Compact and easily transportable thanks to its rigid protective case.

WHO Classification

Blood pressure values are classified according to the World Health Organization guidelines.

INCLUDED ACCESSORIES

DM-500

PROFESSIONAL UPPER ARM BLOOD PRESSURE MONITOR

Mercury-free

Traditional mercury column has been replaced by the LCD column display.

Rapid exhaust

During or after measurement in just one move.

Manual Measurement

Manual systolic and diastolic measurements.

Intuitive LCD display

Clearly readable display representing the mercury column.

Low consumptions

Operated by two AA alkaline (LR6) batteries.

INCLUDED ACCESSORIES

1.5V BATTERIES

2 x Alkaline AA size, replaceable

COMFORT CUFF

Size: 23 - 32 cm, with soft finishing

PRODUCT CODE DM-500

DM-3000

PROFESSIONAL UPPER ARM BLOOD PRESSURE MONITOR

Automatic or manual mode

Oscillometric (AUTO) or auscultation (MANUAL) mode can be set by user.

Professional accuracy, easy operation

Inflation and deflation speed can be easily adjusted and the maximum constriction of the cuff sets according to the patient's parameters.

Fits every patient

Two cuffs are included (size: 22 - 32 cm (M) / 32 - 42 cm (L)) to fit patients with different arms circumferences, both washable and with soft finishing wrapping gently around the arm.

Seven memories

Records the 7 latest measurements results and the average values.

Switchable power supply

Can be operated with AC adapter or internal Ni-MH rechargeable batteries, both included.

Double display

Two clearly readable displays representing the mercury column and digital results.

Remote use

The long inflation tube and the 5 castors' trolley kit make it suitable for displacement.

ESH clinical validation

In compliance with the European Society of Hypertension IP2002 protocol.

INCLUDED ACCESSORIES

NI-MH 4,8VDC

DIAGNOSTICS

SPHYGMO- MANOMETERS & STETHOSCOPES

DESIGNED FOR PROFESSIONALS

CA-MI matches its home-care diagnostic line with a range of product suitable for clinicians of all levels. A selection of devices adequate for practitioners as well as cardiologists who require more accurate and reliable instruments to validate their diagnosis.

▲ S-100 Cardio, p. 35

ALLERGY-FREE AND DURABLE MATERIALS

Latex allergic reactions can range from mild skin rashes to severe and life-threatening anaphylactic shock. Since no known cure for latex allergy exists, avoidance of latex exposure is the only protection. Healthcare facilities have taken a variety of approaches to reduce both worker and patient exposure to latex. These include replacing products made of natural rubber latex with those made of alternative materials.

CA-MI selected its products in order to provide the safest and most durable materials.

MONITORING BLOOD-OXYGEN SATURATION

Pulse oximeters are devices designed to be positioned on a finger to get in few seconds the blood-oxygen saturation (SpO₂) level, expressed as a percentage.

Values above 95% are to be considered natural, and therefore generally good, while the lower they get under that threshold the critical they are (a poorly oxygenated blood does not properly nourish body tissues and organs).

SpO₂ is an important parameter for the **prevention of critical conditions** affecting internal tissues and organic functioning, providing important information to the physician on the possible **presence of serious pathologies** such as: heart failure, arterial stenosis, ARDS (acute respiratory distress syndrome), COPD (chronic obstructive pulmonary disease), pulmonary emphysema, congenital heart defects, cystic fibrosis, critical conditions caused by drugs (allergy or overdose).

More over, the use of a pulse oximeter may be crucial to monitor extreme activities, such as mountaineering at high altitudes or scuba diving, in order to avoid dangerous situations.

CERTIFIED QUALITY

CA-MI has been successfully distributing many models of pulse oximeters suitable for different users and applications.

We are certified medical device manufacturers and always strive to provide the best product and service.

DIAGNOSTICS

PULSE OXIMETERS

O₂-EASY

Accurate

High-quality sensor providing precise measurements.

Always with you

Small & lightweight design.

Smart Display

Digital LEDs display with two directions for reading. Displays SpO₂, PR and pulse bar.

Energy save

Low power consumption (batteries last up to 30 hours), automatically shuts off.

Suitable for all ages

Accommodates a wide range of finger sizes from pediatric to adults.

INCLUDED ACCESSORIES

1.5V BATTERIES

2 x Alkaline AAA size, replaceable

REHABILITATION

WHEELCHAIRS & WALKERS

A CONCRETE AID FOR EVERYDAY LIFE

As people age, everyday activities previously taken for granted can become difficult or, at times, impossible to perform. In their usual design, common tasks may require the help of other people, creating stress or frustration.

CA-MI rehabilitation range is designed to help people retain independence, providing products aiming to help in the accomplishment everyday task in the easier way.

SAFETY & RELIABILITY AT HAND

CA-MI has selected only high-quality products, made with durable and safe materials.

Convenient to handle, easy to transport and at the same time trustworthy and reliable, thanks to the included safety devices, the whole rehabilitation range aims to provide solutions which guarantee only the best performance.

HC0203

SELF-PROPELLING WHEELCHAIR

Self-propelling

Hand rims on rear wheels allow users to push themselves forward.

Foldable

The chair is designed to fold compactly in size (only 26 cm when closed).

Easy to handle

Lightweight, thanks to its aluminum structure, and easy to store and transport.

Comfortable & customizable

Padded seat and backseat in black nylon with document pocket on the back. Foldable padded armrests covered in black leatherette. Optional padded legrests available.

Made to last

Reduced maintenance and longer life thanks to the high-quality materials: single crossbar powder coated steel frame, rear wheels in rocket aluminum with tubeless PU tires and black painted steel handrails.

INCLUDED ACCESSORIES

PADDED ARMRESTS

Short and foldable covered in black leatherette

ADJUSTABLE FOOTRESTS

in black plastic, removable

COMFORTABLE CALF STRAP

REHABILITATION

INCENTIVE SPIROMETERS

 made in Italy

THE EASY WAY TO EXPAND LUNGS

An incentive spirometer helps the patient to take slow, deep breaths to expand and fill the lungs with air.

This helps preventing lung problems, such as pneumonia. The incentive spirometer is made up of a breathing tube, an air chamber, and an indicator. The breathing tube is connected to the air chamber and has a mouthpiece at the end.

PULMONARY REHABILITATION

The main subjects of pulmonary rehabilitation are patients affected by Chronic Obstructive Pulmonary Disease (COPD), severe respiratory troubles or with post-operation long stay in bed.

A pulmonary rehabilitation program helps minimizing the associated symptoms and reducing of dyspnoea and its related consequences.

This leads to an improvement of patients' quality of life, helping them recovering the ability to perform daily activities, and reducing the anxiety or depression associated with the disease.

Since respiratory rehabilitation at home is one of the best practice in post-operation, devices are easy to use and cost-effective and -most important- they provide indications of daily improvements.

MODULAR AND EASILY DISMOUNTABLE

The whole range of CA-MI incentive spirometers can be disassembled and disinfected to guarantee the best hygienic conditions between uses or patients. In fact, unlike other devices they have consumables that can be washed or replaced.

Moreover, to best suit every patient's condition, they are modular and combinable.

Thanks to a wide set of replaceable spare parts they are the ideal devices to use for more than a patient.

PULMOVOL 25/50

INCENTIVE SPIROMETER

SOFT INHALATION

Volumetric respiratory exerciser used to encourage SMI (Sustained Maximal Inspiration).

IMPROVES RESPIRATORY CONDITIONS

Strengthen respiratory muscles leading progresses in the respiratory functional parameters.

TARGET INDICATOR

Incorporates visual indicators of performance in order to aid the therapist in coaching the patient to optimal performance.

MODULAR

Can be connected with Pulmolift for a full inhalation/exhalation cycle.

HYGIENIC

Can be disassembled for cleaning and washing purposes to guarantee the best hygienic conditions between uses or patients.

MULTI-USER

Replaceable spare parts make it the ideal device to use for more than a patient at home or in hospitals.

WELLNESS

COMPRESSION THERAPY

 made in Italy

THE BEST TREATMENT FOR VENOUS STASIS

Elastic compression, i.e. the use of graduated compression stockings, is the treatment of first choice in the prevention and treatment of circulatory disorders in the lower limbs.

Elastic stockings work by exerting an external counter-pressure on the leg promoting a better venous return to the heart by reducing or resolving blood and lymphatic stasis and stagnation. The compression exerted at the ankle is equal to 100% of the indicated mmHg and decreases regularly along the limb until it reaches 40% at the thigh.

Kàmila is an entirely MADE IN ITALY brand with a young, refined style aimed at quality.

Precious raw materials, cutting-edge production facilities and scrupulous controls during the production phases are the brand core values.

These principles of reliability and fifty years of experience have led to the creation of 2 lines: preventive and medical), both available in different lengths, colors and sizes..

Complete assortment

A wide range of stockings to enhance the well-being of legs and guarantee optimal comfort; women's and unisex knee-highs, hold-ups, tights and leggings; weft, plain, mesh and double mesh; open and closed toe; calibrated and not.

High-quality yarns

The entire Kàmila line is in double-covered Lycra, combined with the most modern and innovative yarns, to ensure high efficacy and long lasting products.

The right product

Each Kàmila article shows both the specific weight of yarns in denier (den) and compression in millimeters of mercury (mmHg) to define the level of ankle restraint.

YARN WEIGHT COMPRESSION FUNCTION

40 den	9-11 mmHg	Light Massage
70 den	12-16 mmHg	Average Massage
140 den	18-20 mmHg	Strong Massage

MEDICAL LINE

VASCULAR PATHOLOGIES MANAGEMENT

AG extension ▶

Therapeutic action

A wide range of products to satisfy any patient's need, such as post-operative therapies, cases of ulcers, prophylaxis of varicosities, prevention of thrombosis and post-gypsum treatments.

RAL certification

Kàmila Medical achieved the RAL certification for the high quality compression, components and construction features.

Variety

Specific lines for all needs in venous disorders: COTTON, MICROFIBRE and POLYAMIDE, in KKL I and II. Also available the ALL USA cotton line in American CL 2 for advanced chronic venous insufficiencies.

CLASS MATERIAL COMPRESSION

KKL I	18-21 mmHg	Microfiber / Cotton/ Polyamide
KKL II	23-32 mmHg	Microfiber / Cotton
CL 2 (american)	30-40mmHg	Cotton

BEAUTIFUL LEGS

PRESSOTHERAPY

Legs health & wellness

Reactivates circulation effectively, reducing water retention and minimizing cellulite imperfection.

Beauty or medical mode

Two treatment modes available: by alternating between compression and decompression it provides medical or beauty treatments improving lymphatic drainage and restoring circulation and venous activities.

Adjustable treatment duration

Patients can choose 10, 20 or 30 minutes according to their own conditions and/or medical prescription.

Completely customizable

Pressure range from 20 to 250 mmHg.

Each garment has 4 inflation chambers: during therapy they can be partially disabled.

Whole body treatment

9 different kind of cuffs to cover the entire body.

INCLUDED ACCESSORIES

TWO LEGS CUFFS (LARGE)

START OFF ON THE RIGHT FOOT

Every mum wants what's best for her baby from day one. Then it's good to know there is expert advice on hand to help take care of mums and babies during the first stage of their lives. CA-MI products will support the choices of mums in every field of babies' growth, as this company aims to help every mum to make her baby start off on the right foot.

▲ *Speedy Pappa, p. 64*

A WHOLE WORLD FOR NEWBORNS CARE

CA-MI products are selected to support every mum's choice. Hence, whether it's breastfeeding or bottle-feeding, and while monitoring and taking care of the baby's health, CA-MI's there from the very first steps.

BABY-CARE

THE IMPORTANCE OF BREASTFEEDING

Breast milk is the best for the baby's start in life. It contains all the necessary substances to satisfy the nutritional and psychological needs of the newborn up to the age of 6 months and provides natural protection against infections as well as supporting the infant's ongoing health and development. CA-MI 's breast pumps are designed to help mothers in the breastfeeding journey, making it easier and comfortable to give their children all the advantages of breast milk.

SAFE & HYGIENIC

Made of medical grade silicone, safe to use and easy to sterilize.

COMFORTABLE

Soft, flexible cushion, feels extra comfortable on the breast.

ADJUSTABLE

Aspiration can be adjusted to respect maternal breast sensibility and guarantee painless milk extraction.

▲ Mamy Milk p.64

GENTLE & SAFE

CA-MI products are made only with the best materials to guarantee that every baby is treated with the gentleness and safety they deserve.

▲ Funny Teeth p. 59

SPEEDY PAPPA

SUCTION

SURGICAL SUCTION UNITS

 made in Italy

MEDICAL SUCTION

Surgical suction units are medical devices used to remove surgical fluids, tissue, gases and bodily fluids by sucking the material through a cannula into a collection jar.

Thanks to its thirty-years experience, CA-MI designed a complete line of high-quality vacuum solutions combining reliable suction power, ease of use and handling.

CA-MI suction units can be divided in three main categories to suit different needs and settings such as wards, theaters, ambulances, home-care etc.

CATEGORIES

DESK-TYPE

Portable suction units with reduced size and weight that can be easily displaced. Trolley on castors available as an option.

BATTERY-OPERATED

Suction units that besides standard operation by mains have autonomy by internal rechargeable battery.

ON-CASTORS

Professional suction units on antistatic castors, offering a great choice of accessories for various applications.

DESK-TYPE / BATTERY OPERATED MODELS

ANTIBACTERIAL/HYDROPHOBIC FILTER

Single-patient filters to avoid cross contaminations and liquid passage to the pump.

LIQUID COLLECTION JAR

Single or multiple containers in different sizes and materials, reusable or disposable. Provided with cover and overflow valve system.

VACUUM REGULATOR

Manual knob/digital keys for accurate adjustment of vacuum levels.

VACUUM GAUGE

Analogic display in different diameters with graduated scale in mmHg and kPa (interval by 5).

ON/OFF SWITCH

Mechanical or digital switch.

CONICAL CONNECTOR

Different diameters to connect any type of cannula.

ON-CASTORS MODELS

MPR SYSTEM (MULTI-PURPOSE RAIL)

Easy interchange of CA-MI accessories, such as rings of various diameters to accommodate jars, safety trap bottles, cannula holders or a standard medical rail where to hook any accessory by means of standard clamps.

SAFETY TRAP BOTTLE

An additional protection of the pump besides the overflow valve system inside every jar.

HANDLE

for easy displacement

REAR COMPARTMENT

for accessory storage.

4 X TWIN ANTISTATIC CASTORS

Ø 75 mm with brakes with 360° swivel.

FOOT-SWITCH PEDAL

for intermittent or continuous use.

Further detailed information on the
SURGICAL SUCTION UNITS CATALOGUE

REUSABLE COLLECTION SYSTEMS

Produced with resistant and safe materials, these jars are made to last thousands of sterilization cycles. They fit both Ca-mi suction units and central vacuum systems.

COVER

Screw cover with handle, for easy grip, and overflow valve system preventing liquid spills.

O-RING

Watertight gasket made of autoclavable silicone.

AUTOCLAVABLE JAR

Rigid graduated container available in different types of polycarbonate and sizes.

Materials:

Makrolon® Polycarbonate (autoclavable at 121°C)

APEC® Polycarbonate (autoclavable at 143°C)

UDEL® P-1700 Polysulfone (autoclavable at 134°C)

Sizes: 1000 mL / 2000 mL / 4000 mL / 5000 mL

DISPOSABLE COLLECTION SYSTEMS

FLOVAC® DISPOSABLE LINER

A soft polyethylene bag hermetically welded to a rigid lid. It contains a hydrophobic, antireflux and antibacterial filter that also operates as overflow valve system.

Available with gelling kit: a germicidal powder which prevents cross-contamination turning liquids in a semi-solid mass.

Sizes: 1000 mL / 2000 mL / 3000 mL

FLOVAC® REUSABLE JAR

Graduated reusable container in polycarbonate.

Sizes: 1000 mL / 2000 mL / 3000 mL

RIGID LID

hermetically welded to the soft bag

TANDEM PORT

for connection of several liners in cascade

VACUUM PORT (FEMALE)

connecting to Ca-mi suction units

PATIENT PORT (MALE)

connecting to the patient hose

PATIENT PORT PLUG

to close the patient port before disposal

TANDEM PORT PLUG

to close the tandem port when only one container is in use or before disposal
