

Company Milestone

- 2002: Company Founded in Shenzhen, China
- 2008: Received “European Entrepreneurial Company 2008” award from FROST & SULLIVAN
- 2009: Received “Product Quality Leadership Award 2009” from FROST & SULLIVAN
- 2011: Received the Reddot 2011 Product Design Award for S20 in Essen, Germany
- 2013: Received “Ultrasound Market Growth Leadership Award, 2013” from FROST & SULLIVAN
- 2014: Received the iF product design award 2014 for S9 in Munich, Germany
- 2014: Received “Company of the Year in Ultrasound Market, 2014” from FROST & SULLIVAN
- 2016: Received “Product innovation in Electronic Endoscopy Market” from FROST & SULLIVAN
- 2017: Received the iF product design award 2017 for X5 in Munich, Germany
- 2017: Listed on Shenzhen Stock Exchange on April

P15
Enhance Your
Ultrasound Exam

A feature-rich system inheriting the Wi-Sono high-end platform, the P15 uses an array of advanced tools to help enhance the image quality. It's a cost-effective, simplified console with an intuitive user interface and multiple intelligent functions.

Super Wide-bandwidth Platform

Inheriting Wi-sono's ultra-wide system platform and with the advanced probe technology, high-resolution and deep penetration images are provided for precision medicine.

Spatial Compound Imaging

Spatial Compound Imaging utilizes several lines of sight for optimal contrast resolution, speckle reduction and border detection. with which P15 is ideal for superficial and abdominal imaging with better clarity and improved continuity of structures.

μ -Scan⁺

The new generation μ -Scan imaging technology gives you better image quality by reducing noise, improving signal strength and improving visualization.

Dynamic Color

Dynamic color improves upon already existing color Doppler technologies for a clearer capture of color flow and detailed visualization of even tiny veins with lower velocities.

Real-time Panoramic

With real-time panoramic, you can acquire an extended field of view for large organs or long vessels for easy measurement and diagnostic efficiency. Accomplished in real-time for the convenience of the sonographers, any mistake can also be easily back tracked and corrected without interrupting the scan.

3D/4D

Outstanding volume performance with speed and convenience makes P15 outshine others on volume imaging.

Tissue Doppler Imaging

Tissue Doppler Imaging allows clinical doctors to quantitatively evaluate local myocardial movements and functions, facilitating them with the ability to analyze and compare the motions of the different parts of the patient's heart.

Auto IMT

Quick measurement of intra-media vessel thickness ensures good reproducibility and high diagnostic efficiency.

Comfort and Productivity Lie on Design

Large size monitor
and touch screen

Built-in Wifi

Gel warmer

Large capacity
built-in battery

Removable probe
holder

Five probe
connectors

Foot switch
