Vision

Serve and care for more healthcare professionals and patients.

Mission

Become the most preferred company by providing high quality medical technologies at affordable prices to meet the needs of patients, healthcare professionals and providers in the global markets whilst serving and meeting our Corporate Social Responsibilities.

SERVING AND CARING FOR MORE PATIENTS

Advanced MedTech Solutions (AMS) is dedicated to advancing patient care by providing high quality medical device technologies to serve the needs of more patients and healthcare professionals.

Global healthcare needs are increasing and the collective capacity to answer them is challenged by meeting the demands of an aging population, the growing burden of chronic disease, and complex healthcare policies, it's incredibly clear the pace of change has never been greater.

The desire to make a difference in patients' lives led to the genesis of AMS.

EMPOWERING HEALTHCARE PROFESSIONALS

Headquartered in Vadodara, India, the company was established by an elite team of respected industry leaders and visionaries who understand the challenges of the current healthcare environment.

Redefining and raising the bar on standards of quality, care and trust. Our unwavering mission is to improve patient care through meaningful solutions.

LIFE ENHANCING INNOVATION

Our state-of-the-art facility is located in the industrial center of Vadodara, Gujarat. This eco-friendly manufacturing plant is singular in design and distinguished in efficiency. Designed by renowned Spanish architect Ricardo Bofill, it is equipped to manufacture a cutting-edge class of medical devices that meet the most stringent global standards.

It serves as a technological and healthcare ecosystem focused on the medical science fields of Advanced Surgical & Interventional Cardiology Solutions.

ADVANCING THE SPECTRUM OF HEALTHCARE

With a dedication to excellence, we are committed to optimizing patient outcomes through quality, affordability, and accessibility – the heart of the AMS mission.

Reaching out to healthcare professionals and providers around the world, Advanced MedTech Solutions offers a compelling choice with a corporate and social responsibility founded on advancing the way we care for generations to come.

A New Generation of
NEEDLES

Intelligent Geometry

High Precision

A New Generation of Needle Technology

Needle Anatomy

- a : Needle chord length
- b : Needle point
- c : Swage
- d : Needle radius
- e : Needle length
- f : Needle body

Needle Curvature

Premium Needles Ensure Unsurpassed Suturing Experience

Minimal Tissue Trauma Enables Faster Recovery

* Certain features are common in specific needles

Needle Point

Straight

Straight needles can be used for suturing without requiring the use of a needle holder, as long as the suturing area offers good visibility

Blunt Point

Needle point is sharp enough to penetrate fascia and muscle but not skin, dissects the friable tissue rather than cutting it

Conventional

Cutting

It has a triangular cross section with the apex of the triangle on the inside of the needle curvature, very sharp and cuts rather than dilate

Reverse

Cutting

The body of this needle is triangular in cross section, having the apex cutting edge on the outside of the needle curvature

J Shape

These needle designs were developed to facilitate controlled depth of penetration such as vesicourethral repair, in ophthalmological applications (cornea), etc.

Round Body

Round Bodied needles are designed to separate tissue fibres rather than cutting them

Taper

Cutting

This needle combines the initial penetration of a cutting needle with the minimised trauma of a round bodied needle

Needle Point

Trocar Point

The needle is of heavy diameter and design of the cutting head ensures powerful penetration, even when deep in dense tissue

Black

These needles have been designed to give outstanding visibility against tissue and where blood is present in the operating field

Taper

Point

Plus

A modified point profile, the tapered cross section immediately behind the tip has been flattened to an oval shape rather than a conventional round shape

Spatula

Spatula Needle has a square body to produce superb penetration characteristics

Prime

The cross sectional geometry of the needle tip reduces the angles of the cutting edges which gives improved penetration and control

Advanced

Coronary

Calcified

(ACC)

The unique point design of the CC Needle provides significantly improved penetration properties for the Cardiac/ Vascular

ADVA TRAY™ - the confidence to suture with ease

ADVA TRAY™ an advanced dispensing system designed to deliver ease of suture dispensing with minimal memory in the suture strand

Impeccable suturing experience for surgeons | Eliminates the need of suture lubrication

OC Advanced Wound Care
where every suture is a seal of confidence

Absorption Profile

ADVACRYL TM	Braided Coated Polyglactin 910 (Undyed & Violet)		80 days
ADVACRYL PLUS TM	Antibacterial with Triclosan Braided Coated Polyglactin 910 (Undyed & Violet)		80 days
ADVACAT TM	Purified Collagen (Chromic & Plain)		84 days
ADVACRYL RAPID TM	Fast Absorbing Polyglactin-910 (Undyed)		42 days
ADVAMRYL	Monofilament Poliglecaprone 25 (Undyed & Violet)		90 days
ADVAPD TM	Monofilament Polydioxanone Violet		180 - 210 days

ADVACRYL™ Braided Coated Polyglactin 910 (undyed & Violet)

Consistent performance for confidence in a variety of soft tissue approximation

With great versatility comes the confidence to meet specific needs

Product Description

Composition	90% Glycolide, 10% L-lactide
Coating	Copolymer of Poly (glycolide-co-lactide) and Calcium Stearate
Available Sizes	U.S.P. 2 to 6-0
Colour	Undyed and Violet
Absorption Profile	Essentially complete upto 80 days
Needle Availability	A wide variety of Round Bodied (Taper Point), Ball Point, Cutting, Taper Cut, Trocar, Reverse Cutting, Blunt Point, Oval Round Bodied, Diamond Point & Spatula Micro Point needles

Tensile Strength

Days of Implantation	14 Days	21 Days	28 Days
Tensile Strength Retention	75%	55%	20%

ADVANTAGES:

- Excellent knot security & lesser knot slippage
- Provides excellent support for range of critical wound healing periods
- Tighter braided construction

ADVAMRYLTM Monofilament Poliglecaprone 25 (Undyed & Violet)

Supreme handling performance for confidence in subcuticular skin closure

Predictable strength for superior support

Product Description

Composition	Glycolide and ϵ -Caprolactone
Coating	None
Available Sizes	U.S.P. 0 to 5-0
Colour	Undyed and Violet
Absorption Profile	Essentially complete upto 90 days
Needle Availability	A wide variety of Round Bodied (Taper Point), Ball Point, Cutting, Taper Cut, Trocar, Reverse Cutting, Taper Cut, Blunt Point, Oval Round Bodied, Diamond Point needles

Tensile Strength

Days of Implantation	7 Days (1 to 5-0)	14 Days (1 to 3-0,5-0)	14 Days (4-0)
Tensile Strength Retention DYED	60%	40%	40%
Tensile Strength Retention UNDYED	55%	20%	15%

ADVANTAGES:

- Causes minimal tissue reaction
- High initial tensile strength
- Exceptional handling characteristics
- Lack of stiffness & memory

ADVACRYL RAPIDTM

Fast Absorbing Polyglactin-910 (Undyed)

Accelerated performance for confidence
in delicate tissue approximation

Swift confidence for superior predictability

Product Description

Composition	90% Glycolide, 10% L-lactide
Coating	Poly (glycolide-co-lactide) (Glacomer 37)
Available Sizes	U.S.P. 1 to 5-0
Colour	Undyed
Absorption Profile	Essentially complete upto 42 days
Needle Availability	A wide variety of Round bodied (Taper Point), Oval Round bodied, Ball Point, Cutting, Taper Cut, Reverse Cutting, Blunt Point

Tensile Strength

Days of Implantation	5 Days	10 - 14 Days
Tensile Strength Retention	42%	0%

ADVANTAGES:

- High initial tensile strength
- Predictable & constant degradation rate
- Excellent knot security
- Quick mass absorption

ADVAPDTM Monofilament Polydioxanone (Violet)

Enduring performance for confidence in extended wound support

The confidence to handle complications with ease

Product Description

Composition	Polydioxanone
Coating	None
Available Sizes	U.S.P. 1 to 7-0
Colour	Violet
Absorption Profile	Essentially complete between 180 to 220 days
Needle Availability	A wide variety of Round Bodied (Taper Point), Ball Point, Cutting, Taper Cut, Trocar, Reverse Cutting, Blunt Point, Oval Round Bodied, Diamond Point & Spatula Micro Point needles

Tensile Strength

Days of Implantation	14 Days	28 Days	42 Days
Tensile Strength Retention	80%	70%	45%

ADVANTAGES:

- High initial tensile strength
- Predictable absorption
- Prolonged wound support
- Minimal tissue reaction
- Good handling characteristics
- Smooth passage through tissues

ADVALENETM Monofilament Polypropylene (Blue)

Reliable performance for confidence in contaminated wound closure

With exceptional strength comes confidence that lasts

Product Description

Composition	Polypropylene
Coating	None
Available Sizes	U.S.P. 1 to 8-0
Colour	Blue
Absorption Profile	Non-Absorbable
Tensile Strength	Permanent
Needle Availability	A wide variety of Round Bodied (Taper Point), Ball Point, Cutting, Taper Cut, Trocar, Reverse Cutting, Blunt Point, Oval Round Bodied, Diamond Point needles, ACC Needles & Black Needles

ADVANTAGES:

- Excellent knot security
- Causes minimal tissue reaction
- Non - thrombogenic
- Least potentiate infection in contaminated wounds
- Advanced dispensing system
- Control linear elongation
- Unsurpassed strength
- Minimal suture breakage & fraying

ADVALON™

Monofilament Polyamide (Black)

Ideal selection for confidence in skin closure

Appropriate choice for dermal closure and retention suturing

Product Description

Composition	Polyamide
Coating	None
Available Sizes	U.S.P. 1 to 10-0
Colour	Black
Absorption Profile	Non-Absorbable
Needle Availability	A wide variety of Round Bodied (Taper Point), Ball Point, Cutting, Taper Cut, Trocar, Reverse Cutting, Blunt Point, Oval Round Bodied, Diamond Point & Spatula Micro Point needles

Tensile Strength

Non Absorbable, however progressive hydrolysis of the suture in-vivo may result in gradual loss of its tensile strength over time

ADVANTAGES:

- Flexible, easy to handle and tie
- Smooth passage through tissue
- Excellent histocompatibility

ADVASYL™ Braided Silk (Black)

Exceptional control for confidence in gentle tissue approximation

Excellent handling combination with great strength for gentle tissue approximation

Product Description

Composition	Proteinaceous silk fibres called fibroin
Coating	Wax
Available Sizes	U.S.P. 4 to 5-0
Colour	Black
Absorption Profile	Non-Absorbable
Needle Availability	Available as Pre-cut suture and in a wide variety of Round Bodied (Taper Point), Ball Point, Cutting, Taper Cut, Trocar, Reverse Cutting, Blunt Point, Oval Round Bodied & Diamond Point needles

Tensile Strength

Gradual loss in tensile strength over a period of time

ADVANTAGES:

- Smooth passage through tissue
- Minimal acute inflammatory reaction in tissues
- Unsurpassed strength
- Optimal elasticity and elongation properties

ADVABOND™ Braided Coated Polyester (Green & White)

Ultimate security for confidence in approximation of tissues under stress

Enhancing confidence for everlasting support

Product Description

Composition	Polyethylene Terephthalate
Coating	Silicone
Available Sizes	U.S.P. 5 to 6-0
Colour	White & Green
Absorption Profile	Non-Absorbable
Tensile Strength	Permanent
Needle Availability	Round bodied (Taper point) & Taper cutting

ADVANTAGES:

- Soft and supple
- Silicon coated, designed for excellent handling and pliability
- Uniform braiding process designed to provide greater resistance for breaking
- Excellent knot security
- Low porosity PTFE felt pledgets
- Advanced intelligent dispensing system

ADVAWAX

A sterile mixture of Natural Wax and Isopropyl Myristate

Ultimate confidence for control of bleeding from bone surfaces

Non-Absorbable Bone Wax

DESCRIPTION:

➤ ADVAWAX is a sterile mixture of bees wax and Isopropyl Myristate, a wax softening agent. It is opaque and has a waxy odor. It is available in the slab form of 2.5 gms.

Sr. No.	Code	Colour	Weight (gm)	Beeswax + IPM Combination	Paper Wrap

Absorbable Suture Portfolio

	ADVACRYL™	ADVACRYL PLUS™	ADVACRYL RAPID™	ADVAMRYL™	ADVAPD™	ADVACAT™
Composition	90% Glycolide, 10% L-lactide Braided Coated Synthetic Absorbable Surgical Suture	90% Glycolide, 10% L-lactide Antibacterial with Triclosan Braided Coated Synthetic Absorbable Surgical Suture	90% Glycolide, 10% L-lactide Braided Coated Synthetic Absorbable Surgical Suture	Poliglecaprone 25 Monofilament Synthetic Absorbable Surgical Suture	Polydioxanone Monofilament Synthetic Absorbable Surgical Suture	Collagen from Submucosal layer, Natural Absorbable Surgical Suture
Tensile Strength	70% - 14 days 50% - 21 days 20% - 28 days	75% - 14 days 40% - 55% - 21 days 15% - 28 days	42% - 5 days All of the original tensile strength is lost by 10 to 14 days post implantation	Dyed 60%, Undyed 55% - 7 days Dyed 40%, Undyed 15 - 20% - 14 days	80% - 14 days 70% - 28 days 45% - 42 days	Plain 10 to 12 days Chronic 21 to 25 days
Mass Absorption	Upto 80 days	Upto 80 days	Upto 42 days	Upto 90 days	180 - 220 days	84 days
Available Sizes	U.S.P. 2 to 6-0	USP. 2 to 4-0	USP1 to 5-0	U.S.P. 0 to 5-0	U.S.P. 1 to 7-0	U.S.P. 2 to 3-0
Colour	Undyed and Violet	Violet	Undyed	Undyed and Violet	Violet	Yellow and Brown

Non-Absorbable Suture Portfolio

	ADVALENE™	ADVABOND™	ADVILON™	ADVASYL™
Composition	Polypropylene Monofilament Synthetic Non-Absorbable Surgical Suture	Polyethylene Terephthalate Braided Coated Synthetic Non-Absorbable Surgical Suture	Polyamide / Nylon Monofilament Synthetic Non-Absorbable Surgical Suture	Proteinaceous Silk Fibers called Fibroin, Braided Natural Non-Absorbable Surgical Suture
Tensile Strength*	Permanent	Gradual encapsulation of suture by fibrous connective tissue	Gradual loss in tensile strength over a period of time. Gradual encapsulation of suture by fibrous connective tissue	
Mass Absorption*	Non-Absorbable	Non-Absorbable	Non-Absorbable	Non-Absorbable
Available Sizes	U.S.P. 1 to 8-0	USP. 5 to 6-0	USP1 to 10-0	U.S.P. 4 to 5-0
Colour	Blue	White and Green	Black	Black

* These are approximate days which may vary with size.

* Mass Absorption : Time in days required for suture to be totally absorbed by the body.
