Rose Bengal (Rapid slide agglutination antigen)

Rapid slide agglutination antigen for the detection of anti-*Brucella abortus*, *melitensis*, or *suis* antibodies in bovine, ovine, caprine, and porcine species.

- Suspension of *Brucella abortus* biovar 1 Weybridge strain No 99, inactivated by heat and phenol and coloured with rose bengal stain in an acidified buffer.

- Calibrated on the OIEISS International *Brucella* standard serum and the national secondary serum to be positive against a 1/45 dilution and negative against a 1/55 dilution, as per the European directive CEE 64/432 and OIE requirements.

Ordering information

Product code	RSA-RB
Kit format	10 ml
Reactions	330 reactions (30 µl per test)
