“Airway Larry” simulates a non-anesthetized patient for practicing intubation, ventilation, suction, and CPR techniques. Features anatomy and landmarks including teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false cords, true vocal cords, trachea, esophagus, and cricoid cartilage. The trainer allows you to practice oral, digital, and nasal intubation, as well as E.T., E.O.A., P.T.L., L.M.A., Combitube®, and King System insertion. Suction techniques and proper cuff inflation may also be practiced and evaluated. This trainer has room to maneuver, and a slightly anterior position, making it a great trainer for introductory classes as well as advanced students. Also, applying cricoid pressure changes the position of the trachea

and closes the esophagus, so the Sellick maneuver can be realistically practiced. Features durable, rugged, one-piece construction. Manual carotid pulse. Five-year warranty. “Airway Larry” Adult Airway Management Trainer Head has the ability to be attached to CPARLENE® CPR manikin, making it a modular component for the **Life/form®** CRISis Manikin. This feature allows you to teach intubation and basic CPR on the same manikin. Comes with pump spray lubricant. Lungs and stomach not included. See (LF03605U) and
