Medical electric saw -oscillating saw RJ-PS (NS-1011)

For application in cutting bone during articular (knee & hip Joint) surgery.

>>> Feature

- 01 Lightweight design, allowing for optimal manoeuvrability and minimizing wrist fatigue.
- 02 Imported motor
- Main components are made of high strength stainless steel.
- 04 Can be autoclavable up to 135°C

Composition >>>

One handpiece
One charger
Two batteries
Two battery aseptic transfer rings
Five saw blades
One instruction manual
One Aluminum case

>> Main Technical Data

Hand Piece	Output Power	130W
	Unit rise in temperature	≤20 °C
Charger	Input Voltage	AC 110-220V , 50-60Hz
Battery	Voltage	14.4V
	Battery capacity	1800mAh
	Battery feature	Environmental friendly
		nickel-metal hydrogen battery
	Charging time	Two hours

Non-loading frequency	0-20000cpm	
Non-loading noise	≤70 dB (A)	
Swing angle	4±0.5°

Sterilization case is additional cost.

1189013127

Basic steps of sterilization, cleaning and maintenance of power tools.

- 1. Disaccessibly: All the consumable parts (saw blades, drill bits, etc) and battery should be removed before cleaning.
- 2.Cleaning: Please wash and rinse with flowing water. Note: use soft brush to clean, then wipe with soft dry cloth. All instruments are prohibited from soak cleaning.
- 3. Maintenance: Maintain by medical lubricant every time when cleaning and wiping instruments. Apply lubricant on every mobilizable part.

Note: Applying lubricant and rotate parts to lubricate to the full.

- 4. Assembly: Assembly and functional test. Note: After cleaning and applying lubricants, install all parts one by one and conduct function test and then check its intactness.
- 5. Sterilization: Forevaccum high temperature for 132 centigrade and high pressure within 20 minutes; natural cooling time is more than 40 minutes. Expoxyethane and formaldehyde are prohibited. Instruments must be kept dry before sterilizatio
