

Peripheral Coil System

Introducing a unique concept.

The first and only peripheral hydrogel coil with cross-sectional coverage and the benefits of patented hydrogel technology.

Product Characteristics

Cross-sectional coverage

- *Complex shape with variable diameter loops*
- *Soft, flexible design*
- *Solid coil core to increase volume fill*
- *Ease of deployment*
- *AZUR Detachment System to deliver precise positioning and placement*
- *Progreat Double Marker Microcatheter System to enhance visibility during detachment*

General specifications

Catheter ID For CX 35	0.041-0.047 in / 1.04-1.19 mm
Microcatheter ID For CX 18	0.019 - 0.027 in / 0.48 - 0.69 mm

Indications for use: The AZUR system is intended to reduce or block the rate of blood flow in vessels of the peripheral vasculature. It is intended for use in the interventional radiologic management of arteriovenous malformations, arteriovenous fistulae, aneurysms, and other lesions of the peripheral vasculature.

AZUR[®] FRAMING COIL

Peripheral Coil System

AZUR[®] Framing coil is a platinum coil that offers a three-dimensional shape to cover the aneurysm wall or the inner lumen of an artery.

This coil is intended to give stability in challenging situations such as wide neck aneurysm or high flow territories.

Product Characteristics

- No time restriction for repositioning
- Facilitates placement of multiple consecutive filling coils
- Each successive loop gently rotates course, changing direction as it is deployed

A Multi-planar deployment
B Multi-planar deployment

General specifications

Delivery Type	Electromechanical Detachment
Delivery Wire Length	175 cm
Minimum Microcatheter Inner Lumen	0.021 in

Indications for use: The AZUR system is intended to reduce or block the rate of blood flow in vessels of the peripheral vasculature. It is intended for use in the interventional radiologic management of arteriovenous malformations, arteriovenous fistulae, aneurysms, and other lesions of the peripheral vasculature.

AZUR[®]

PERIPHERAL HYDROCOIL - DETACHABLE

Peripheral Coil System

AZUR[®] peripheral HydroCoil[®] embolization system combines a platinum coil and an expandable hydrogel polymer. The hydrogel coating expands in the direction of least resistance to fill space when introduced into the bloodstream.

Product Characteristics

Expanding Hydrogel technology that delivers:

- Permanent mechanical occlusion with less reliance on thrombus formation¹
- Mechanical stability
- Increased delivery control and long-term durability²

Superior volume filling and packing density²

- Up to 5.8 times more volume filling than conventional 0.018" coils.³
- Up to 4 times more volume filling than conventional 0.035" coils.³

AZUR[®] detachable system:

- Can be retracted and repositioned, reducing the risk of migration
- Detached in less than one second at the push of a button

EC-CERTIFICATE

(Full quality assurance system)

This is to certify that the company

MicroVention, Inc.

1311 Valencia Ave.
Tustin, CA, 92780
United States of America

has implemented and maintains a full quality assurance system which applies to the products at every stage from design to final controls.

Through an audit, documented in a report, performed by DQS Medizinprodukte GmbH, it was verified that the management system fulfills the requirements of

Annex II – excluding Section 4 of Council Directive 93/42/EEC concerning medical devices

with respect to the following medical devices:

Embolization Prostheses and Accessories, Intravascular Access Devices (Occlusion Balloon Catheters, Guiding and Aspiration Catheters, Microcatheters and Guidewires) and Accessories, Stents, Clot and Foreign Body Retrieval Devices, Liquid Embolic System, Embolic Protection System, Aneurysm Embolization Device, Microspheres, Aspiration Devices, and Detachment Controller Units as listed in Annex.

The manufacturer is subject to surveillance according to Annex II, Section 5. The CE marking with the Notified Body Identification Number (0297) may be affixed on the devices listed in the certificate. An EC Design Examination Certificate according to Annex II, Section 4 is required for class III devices covered by this certificate. The certificate is in the case of class I(s) devices (I(s) = class I products placed on the market in sterile conditions) limited to the aspects of manufacture concerned with securing and maintaining sterile conditions. The certificate is in the case of class I(m) devices (I(m) = class I devices with a measuring function) limited to the aspects of manufacture concerned with the conformity of the products with the metrological requirements.

Intended Use: The Azur Peripheral Embolization Coil System is intended to reduce or block the rate of blood flow in vessels of the peripheral vasculature. It is intended for use in the interventional radiologic management of arteriovenous malformations, arteriovenous fistulae, aneurysms, and other lesions of the peripheral vasculature.

We herewith declare that the above-mentioned products meet the provisions of the council directive 93/42/EEC for medical devices. All supporting documentation is retained under the premises of the manufacturer.
