

Letter of motivation

Dear Interested party,

The main factors that motivate my decision to run for the project coordinator position are: 18 years of relevant professional experience, high professional motivation and adequate personal qualities. In addition, I have experience working with ministries, government institutions, local authorities and international organizations.

In recent years, I have worked on various development projects, such as: CNFA, Agri-Food Development Project, Local Government Reform Project / USAID, Community Development Project, Confidence Building Measures Program / UNDP and SARD UNDP, ATU Gagauzia and Taraclia / UNDP, Solidarity Fund PL in Moldova, Posch & Partners Consulting Engineers (P&P)

During the development of these projects I have formed serious skills to work in the conditions of increased demands of international organizations: identifying the problems of enterprises, providing assistance in procurement activities, financial management, organizational management, developing solutions for them and participating in the practical implementation of decisions, communication with the partners of the organization, preparation of materials needed for use in workshops, seminars, study visits, field trips. All this has allowed me to get acquainted in close with the economic, industrial and rural environment. This activity proved to be the best practice, which provided ongoing training as well as an essential contribution to increasing professional skills.

Respectfully

Vladimir Baghici

MD-2060, Chisinau, Republica Moldova
