

Maximum productivity for any context

Yashi Tokyo with his essential design combines the glossy white color of the body with the shining silver of the stand.

Thanks to the 9th generation Intel CPU and a professional IPS display, performances and features are at the top of the category.

These features make it a classy product suitable for every context.

FEATURES

Better performance thanks to new constructive technologies (14nm++) that allow up to 8 Core and 5GHz of frequency in 16-way multitasking.

Style & Design designed to adapt to any environment and interior design project, with the exclusive full glossy white finish that enhances the cleanliness and rigor of the design lines.

Italian style and design with a minimalism and simple shape that suits every furniture's context.

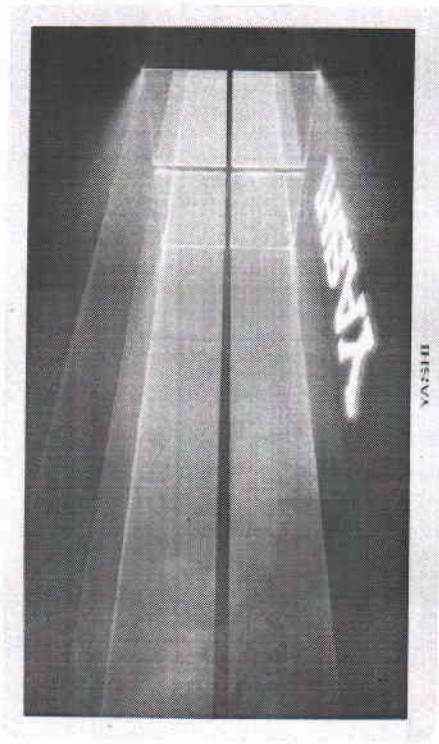

IPS technology guarantees a wide view angle, deepness of color and an ideal contrast for every condition of environmental light.

Simplified maintenance and easier hardware expansions with the one click removable back cover.
