Covaci Daniel

Frontend Developer

Skills

Javascript   Typescript   Angular   NGRX   TailwindCSS   Figma   Firebase

Experience

Frontend Developer at Pistrix Technologies

- Skills acquired: Angular, NGRX, TypeScript, Tailwind, RxJs, SCSS
- Duration: December 2021 - Present

Projects

TRIM.md

Designed and developed a robust, multi-role, multi-language admin interface using Angular to streamline the management of categories, blogs, content moderation, digital booklets, user accounts, auctions, and raffles. Integrated AI-powered file parsing to enhance data processing efficiency and accuracy. Optimized category management to ensure seamless data integrity and reliable interactions with backend APIs. Delivered a highly intuitive and responsive user experience, supporting diverse administrative roles and multilingual capabilities across all modules, significantly improving operational efficiency and user satisfaction.

FreyAway

Maintenance, and new features for an app for Chauffeur service providing business travelers with seamless comfort and reliability in a fast-paced world

verticalagency.md

Developed a sleek, multi-language landing page for Vertical Agency using Angular for frontend and Firebase for backend and DB, showcasing high-quality video and photo content. Built a robust admin interface with CRUD operations to manage public content efficiently. Ensured seamless backend API integration for dynamic content updates, delivering a responsive and user-friendly experience that enhanced client engagement and streamlined content administration for the agency
