

The Mediflex plaster of paris bandage is a porous impregnated fast-setting plaster of paris bandage. On account of the special material structure made of a stable cotton carrier and the even application of the plaster, the Mediflex Plaster of paris bandage can be moistened fast and offer excellent conformability and modelling properties. The Mediflex plaster of paris bandages are available in following presentations:

Bandages for casting with circular plaster of paris bandaging techniques; slabs as a splinting bandage providing additional strength applied on top of circular plaster of paris bandages and large slabs for large plaster casts including plaster-of-paris jackets as well as for extensive moulded casts. Setting time approx. 2-8 minutes.

PRODUCT CODE	PRODUCT SIZE	PACKAGING TYPE	NUMBER of PIECES / BOX	BOX DIMENSION
1212205	7,5cm x 2m	Cellophane - Plastic Bag	100	36x26x25
1212138	10cm x 2m	Cellophane - Plastic Bag	100	36x26x25
