

Recommendation Letter

Tirex Petrol has the largest network of gas stations in Moldova with over 80 locations across the country. We wanted to refresh the Tirex Petrol website. After 10 years it was time for a radical change.

The team at PNA Software SRL did an amazing job by creating a new modern website and also captured the essence of the brand and made it relatable to our existing customer base. The team went through the many feedback loops with us to get the final result we wanted and even if it took us more time, we are glad we invested in this website redesign and a new website that allows us to have a fresh and modern look

We can definitely recommend PNA Software SRL to anyone seeking to design a new website or branding project.
