

TO: Whom it May Concern,
FROM: Derek Tavares
SUBJECT: AvaSol Runway Rubber Removal Solution
DATE: January 20, 2022

Massachusetts Port Authority (Massport) has been using the AvaSol solutions for runway rubber removal for approximately 2 years at the Boston Logan International Airport (BOS). BOS previously used ultra-high pressure water blasting to remove the rubber but the damage and costs were very high.

We are very pleased with the success of AvaSol in removing our runway rubber without damaging the runway, doing it at a lower cost, allowing us to have a flexible schedule and use our own people and equipment. Evergreen Solutions has been very responsive in providing the products to meet our schedule and in providing timely technical support when requested.

Massport is very satisfied with the AvaSol product line performance and the level of support we receive from Evergreen Solutions. We enthusiastically recommend both the AvaSol NR3 and the Evergreen Solutions to any airside maintenance operation.

Best regards;

Derek Tavares
