A high performance line of neurovascular guide catheters in a wide range of sizes

A larger lumen guide with a smaller puncture site.

Neurovascular guide catheter docked with a dilator replacing the need for a sheath to minimize size of puncture site.

FUBUKI Dilator Kit French sizes refer to the sheath size that would normally be required to introduce a guide catheter of the same size. The 4/5/6Fr FUBUKI Dilator Kit have the same shaft as the 6/7/8Fr regular FUBUKI, respectively.

ASAHI FUBUKI Dilator Kit (Sheath size)	I.D.	O.D.	
4Fr	1.80mm (0.071")	2.09mm (6Fr)	
5Fr	2.05mm (0.081")	2.40mm (7Fr)	
6Fr	2.28mm (0.090")	2.70mm (8Fr)	

Features of ASAHI FUBUKI 6, 7, 8 Fr and ASAHI FUBUKI Dilator Kit 4, 5, 6Fr

Flexibility

Soft tip and flexible distal shaft minimizes vessel injury.

Pushability

- Well-balanced shaft with increased rigidity provides stable deployment and optimal pushability.

Lubricity

 Hydrophilic coating from the tip to 15cm (FUBUKI 8Fr and FUBUKI Dilator Kit 6Fr) allows smooth navigation through aortic arch and vessel ostium.

Visibility

- Visibility provided by a platinum marker on the tip and radiopaque material in the shaft.

Strong support for delivering devices.

Features of ASAHI FUBUKI 043 4.2Fr (ID: 1.10mm 0.043")

- Trackability
 - Hydrophilic coating and flexible soft tube provides superb trackability in sharp bends or tortuous vessels.
- Enhanced kink resistance
 - Proprietary wire braiding technology enhances kink resistance and maintains lumen integrity.
- Delivery Support
 - Large inner lumen 1.10mm (0.043") with PTFE coating enables smooth delivery of the microcatheter.

In AVF treatment
