

LETTER OF CONFIRMATION

To whom it may concern.

We (AS Chemi-Pharm) hereby confirm that our product **Bactacid AF** is tested according to standards:

- EN 14476. Quantitative suspension test for the evaluation of virucidal activity
- EN 13697. Quantitative non-porous surface test for the evaluation of bactericidal and/or fungicidal activity

Named tests support the virucidal claim and confirm that product can be used on non-porous surfaces. These tests are referred in EN 14885 which products have to conform in order to support the claims for microbicidal activity in different areas.

Therefore we see that these test results (EN 14476 and EN 13697) are sufficient to support required claims you wished to see through EN 16777 (quantitative non-porous surface test for the evaluation of virucidal activity), which is not obligatory standard according to EN 14885.
