stop. This is the only one of the proof of the CARONE makes an ideal emergency and transport stretcher. For both sides brakes pedals operated only pushing down instead of pulling it up Which reduce the risk of back injuries of staff. The Four side brake is eliminating the need to move to the sides of the bed while immediet needs to the brake.

- Integrated O2 Tank Holder
- 320 kg (705,5 lb) Weight Capacity
- Retractable Steering Handles Positioned at Head and Feet Level
- Easy Clean Washable
- Brake/Steer Pedals– Head and Foot
- Brake/Steer Pedals– All Four Sides
- Permanent Collapsible IV Pole– 2 Stage
- Radiolucent Surface with Upright Chest X-Ray Cassette Holder
- 10 cm (4") High Density Secure Mattress with Fire Barrier
- Large Space Supframe for Staff Storage
- Full Capability of Lateral Control Individual Pedals (Height, Down, Trendelenburg and Reverse Trendelenburg)
- Exceptionally Stable Structure
- Protection Bumpers at All 4 Corners
- Directional Drive on Suspension 5th Castor
- Four Section Lying Surface
- Spring Operated Backrest, Knee Bending
- Anti-Bacteria Treated Nano Technology Bonded Coating
- Glideaway Side Rails Retractable Underneath the Lying Surface with Anti-Pinching Mechanism
- Additionally Accessory Holding Rails
- Monitor Shelf Additionally Added on CARONE Stretcher Multifunctional Feature Feet Support and Writting Desk
- Vertical Tank Bottle Holder Practical and Turnable will be Applied on Four Corners
- X-Ray Cassette on Backrest Enables in Bed X-Ray Scanning or C-Arm Scanning

The CARONE Stretcher is equipped with glideaway side rails, retractable underneath the lying surface. It eliminates the gap between the stretchers and bed during patient transfers and offers maximum patient security when raised, yet are completely out of the way when down, for zero-gap transfers. The side rails covering nearly the entire length of the stretcher, the falls risk is minimized and lowered smoothly, gently, and silently, resulting in
