

生产企业许可证号: 苏食药监械生产许 2001-0154 号
Medical device production license: Su FDA MDML No. 2001-0154
医疗器械注册证号: 苏食药监械(准)字 2007 第 2080791 号
Medical device registration number: Su FDA Device(P) 2007 No. 2080791
产品标准号: YZB/ 苏 0793-2007
Product standard number: YZB/Jiangsu 0793-2007

适用范围: 适用于消化道组织直线缝合。能用于胃、十二指肠、小肠、结肠、直肠等组织的残端封闭。
Scope of application: Applicable to linear stapling of alimentary tract tissues, including the closure of the tissue stump of stomach, duodenum, small intestine, colon and rectum.

产品特点 (Product features):

▲产品由多次性使用的缝合器器身和一次性使用钉仓组件组成。

The product consists of a reusable stapler body and a disposable staple cartridge.

▲定位滑销可防止组织外溢。

Retaining slide pin can prevent tissue from escaping.

▲平行关闭使组织受力均匀。

Parallel closing movement enables even compression on the tissue.

▲缝合器器身可多次消毒重复使用。

Stapler body can be reused after resterilization.

▲临床仅消耗一只钉仓组件, 手术费用低。

It is low in surgical costs as it only needs one staple cartridge in one clinical application.

产品规格 (Product specification):

单位 (Unit): mm

缝合器 Stapler		钉仓组件 (配套件) Staple cartridge (supplied part)		
型号规格 Model and size	器械长度 Instrument length	规格 Size	缝合长度 Stapling length	钉数 Number of staples
XF-30	275	L30	31.5	11
XF-60	275	L60	53.5	19
XF-90	280	L90	92.0	33

钉仓组件更换方便

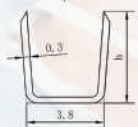

Staple cartridge can be replaced conveniently.

定位滑销防止组织外溢

Retaining slide pin can prevent tissue from escaping.

钛钉尺寸

Titanium staple dimension

独特的 3.8mm
钉宽及梯形设计，确保一钉不漏。

Unique 3.8mm staple width and trapezoidal design ensure stapling without any leakage.

缝合器可多次性消毒使用

Stapler is reusable after resterilization.

前后手柄握持到位，单手击发更容易。

Fronthandle and backhandle are held in place to enable more convenient firing with one hand.

蝶形移位螺母调节不打滑

Butterfly-shaped shifting nut is slip-proof in adjustment.
