Lepu Medical Technology (Beijing) Co., Ltd.

COMPANY PROFILE

LEPU MEDICAL

Major Subsidiaries

The **Global Leading Group Company** in the Fields of
High-tech Medical Devices and Equipment

Lepu Medical Technology (Beijing) Co., Ltd. was established in 1999. Lepu Medical is specialized in developing, manufacturing and distributing the high-tech medical devices and equipment. Today, Lepu Medical has grown into a global leading group company in the fields of cardiovascular, neurovascular and peripheral vascular interventions, structural heart diseases, surgical cardiology, cardiac rhythm management, anesthesia and critical care, in vitro diagnostics and general surgery with products include coronary stents, dilatation balloon catheters, interventional accessories, occlusion devices, mechanical heart valves, electrophysiology catheters, pacemakers, in vitro diagnostic products, critical care products, angiography systems and surgical staplers. In 2009, Lepu Medical went public in ChiNext Shenzhen Stock Exchange market (stock code: 300003).

Now Lepu Medical totally has 32 primary subsidiary companies worldwide. Currently, there are 123 products have received the CE certificates, and 17 products have got the FDA approvals. As the National Interventional Cardiology Medical Instruments & Engineering Technology Research Center, Lepu Medical Group's top strategy is to build up a 4 in 1 platform includes medical devices, medicines, health services and mobile medics for cardiac treatments.

Lepu Medical has established three overseas subsidiary companies in Netherland, Turkey and India, obtained local registrations in 27 countries, and built the sales and distribution channels in over 80 countries and regions. Lepu Medical upholds "integrity, quality and scientific innovation" as its spirit, commitments to provide the best quality of products and services to satisfy the needs of healthcare professionals and patients.

This catalogue includes information of products available in certain countries. Availability of these products may vary with locations. Please contact Lepu Medical for more information about the approval in your region.

TABLE OF CONTENTS

01 Coronary Stents

- 03 NeoVas™ Sirolimus-eluting Bioresorbable Coronary Scaffold System
- 04 Nano+™ Polymer-free Sirolimus-eluting Coronary Stent System
- 05 GuReater® CoCr Sirolimus-eluting Coronary Stent System CE
- 06 Partner® Sirolimus-eluting Coronary Stent System CE
- 07 H-Stent™ Coronary Stent System CE

02 Coronary Balloons

PTCA Balloons

- 09 Vesselin® Drug Coated Coronary Balloon Catheter
- 10 Vesscide™ Cutting Balloon System
- 11 Hoper™ PTCA Balloon Dilatation Catheter CE FDA
- 12 Mini Tadpole™ Coronary Dilatation Catheter CE
- 13 Tadpole™ Coronary Dilatation Catheter CE

NC Balloon

- 14 NC Tadpole™ Coronary Dilatation Catheter CE

03 Catheters

- 17 Angiographic Catheter
- 19 Orien™ Guiding Catheter CE
- 21 Thromsweeper™ Thrombus Extraction Catheter
- 22 Deliver™ Infusion Catheter

04 Guide Wires

- 25 Angiographic Guide Wire
- 26 Ultraskin™ Hydrophilic Guide Wire CE FDA
- 27 Balancium Guide Wire CE

105 Introducer Sheaths

- 29 Shoocin™ Introducer Kit CE FDA
- 31 Brilliant™ Introducer Kit CE FDA

106 Accessories

- 35 Rayband™ Radial Artery Compression Tourniquet CE FDA
- 36 Angioway™ Y-Hemostasis Valve Set CE FDA
- 37 Angiopower™ Inflation Device CE FDA
- 38 Inflation Devices Kit CE FDA
- 39 Angioway™ Manifolds CE
- 40 Angioway™ High Pressure Extension Tubings CE
- 41 Introducer Needle
- 42 Angiospring™ Angiography Control Syringe CE
- 43 Contrast Medium Injection Manifold Kits CE

107 Peripheral Interventional Products

- 45 Supercross™ PTA Balloon Dilatation Catheters CE

108 Structural Heart Diseases Products

- 49 MemoCarna® Atrial Septal Defect Occluder
- 50 MemoPart™ Atrial Septal Defect (ASD) Occluder CE
- 52 MemoPart™ Ventricular Septal Defect (VSD) Occluder CE
- 55 MemoPart™ Patent Ductus Arteriosus (PDA) Occluder CE
- 57 MemoPart™ Patent Foramen Ovale (PFO) Occluder CE
- 58 MemoLefort® Left Atrial Appendage Occluder
- 59 MemoPart™ Plug
- 60 MemoPart™ Snare CE
- 61 MemoPart™ Occluder Delivery System CE

109 Neurovascular Products

- 65 Perdenser® Embolic Coil System CE
- 68 Perfiller® Expansile Embolic Coil System CE
- 70 Deromper® Coil Detachment Controller CE
- 71 Frepass® Disposable Microcatheter CE
- 72 Proender® Disposable Embolic Protection Device CE
- 73 Freble™ Disposable Intermediate Catheter

01

Coronary Stents

- 03 NeoVas™ Sirolimus-eluting Bioresorbable Coronary Scaffold System
- 04 Nano+™ Polymer-free Sirolimus-eluting Coronary Stent System
- 05 GuReater® CoCr Sirolimus-eluting Coronary Stent System CE
- 06 Partner® Sirolimus-eluting Coronary Stent System CE
- 07 H-Stent™ Coronary Stent System CE

NeoVas™

Sirolimus-eluting Bioresorbable Coronary Scaffold System

Stent Platform

- Fully degradable poly(L-lactide)
- Sine wave structure in space, In-phase peak-valley connection

Drug coating

- Fully degradable poly(D,L-lactide)
- Effectively control sirolimus release rate

Drug

- Classical Sirolimus with dose of 15.3ug/mm
- Inhibit the proliferation and migration of smooth muscle cells

Delivery system

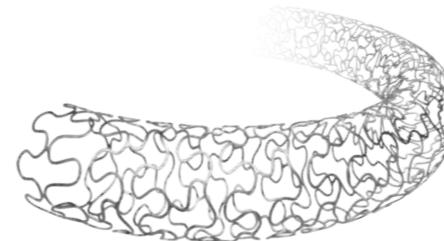

- Completely self-developed second-generation rapid-exchange balloon dilatation catheter
- Superior pushability and crossability

Nano+™

Polymer-free Sirolimus-eluting Coronary Stent System

The efficacy of DES

- Nanoporous cavities on strut abluminal surface functioning as drug carrier to ensure the firm adhesion.
- Post-treatment after drug loading helps with sustained drug release.
- Scientific drug releasing period effectively inhibits SMC migration and proliferation.

The safety of BMS

- Polymer-free design significantly reduces the inflammatory response after stent implantation compare to polymer coating stent, which guarantees the long-term safety.
- Polymer-free design facilitates earlier endothelialization which shorten the DAPT time.
- The rough strut surface helps with easier and faster endothelialization to reduce the risk of thrombosis.

New delivery system

- Soft tapered tip provides smooth transition from guidewire to balloon catheter and excellent crossability.
- Short shoulder design at both ends of the balloon reduces the damage to normal vessel next to the lesion.
- Patented hydrophilic coating on distal shaft provides outstanding pushability.

Technical Parameters

Stent Material	316L Stainless Steel
Strut Design	Nanoporous drug carrier on abluminal surface
Metal to Artery Ratio	15%
Recoil	< 2%
Shortening	< 1%
Crossing Profile	0.035"(0.90mm)

GuReater®

**CoCr
Sirolimus-eluting
Coronary Stent System**

CE

Features:

- 75 µm ultrathin strut thickness and unique strut structure guarantee the excellent compliance of the stent during delivery.
- PLGA biodegradable polymer coating provides precise drug releasing control and scientific degradation period.
- CoCr stent has great radiopacity, biocompatibility, and provides excellent balance between radial strength and flexibility.
- MRI compatible

Technical Parameters

Partner®

**Sirolimus-eluting
Coronary Stent System**

CE

Features

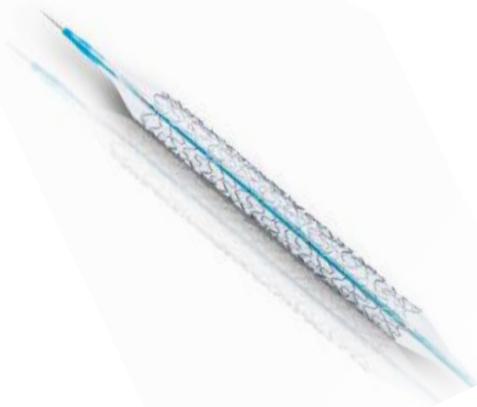

- PBMA/PEVA double layer polymer coating provides optimal drug releasing control.
- Scientific drug releasing period effectively inhibits SMC migration and proliferation.
- The thickness of polymer coating is only 6µm, which ensures the good deliverability.
- Optimal strut thickness provides favorable balance between radial strength and easier endothelialization.
- Large open cell design allows of excellent side branch access.

Technical Parameters

Stent Material	316L Stainless Steel
Strut Design	Open cell
Strut Thickness	90µm

02 Coronary Balloons

PTCA Balloons

- 09 Vesselin® Drug Coated Coronary Balloon Catheter
- 10 Vesscide™ Cutting Balloon System
- 11 Hoper™ PTCA Balloon Dilatation Catheter CE FDA
- 12 Mini Tadpole™ Coronary Dilatation Catheter CE
- 13 Tadpole™ Coronary Dilatation Catheter CE

NC Balloon

- 14 NC Tadpole™ Coronary Dilatation Catheter CE

**Materials**

Improved PEBAK guarantees higher flexibility and enhanced crossability.

Drug

Loaded Paclitaxel inhibit restenosis continuously.

Drug Coating

Coated with Active Pharmaceutical Ingredients grade urea, provide better biocompatibility, facilitate drug releasing effectively.

Delivery system

Spiral cut hypotube design, strengthen the transition section, bring optimized deliverability for transition.

Hoper™

PTCA Balloon Dilatation Catheter

CE FDA

Features

- Small tip profile for excellent crossability.
- Three-directional memory folding of the balloon allows of size minimization with great withdrawal capability, and ensures the good performance of repeated dilatation.
- Soft tapered tip provides smooth transition from guidewire to balloon catheter to avoid "fish mouth", and minimize the vessel damage.
- Transparent hub is convenient to observe the air bubble to reduce the operation risk.

Technical Parameters

Catheter Design	Rapid Exchange
Balloon Compliance	Semi-compliant
Marker	2
Distal Shaft O.D.	2.8F
Proximal Shaft O.D.	2.3F
Tip Profile	0.017"
Minimum Guiding Catheter Compatibility	5F (0.056")

Mini Tadpole™

Coronary Dilatation Catheter

CE

Features:

- Small tip and crossing profiles ensure the better performance for CTO lesions.
- Capable for kissing balloon under 6F guiding catheter.
- Patented hydrophilic coating on distal shaft and Hypotube proximal shaft provide outstanding deliverability.
- Three-directional memory folding of the balloon allows of size minimization with great withdrawal capability, and ensures the good performance of repeated dilatation.
- Soft tapered tip provides smooth transition from guidewire to balloon catheter to avoid "fish mouth", and minimize the vessel damage.
- Short shoulder design at both ends of the balloon ensures the precise dilatation, and reduces the damage to normal vessel next to the lesion.

Tadpole™

Coronary Dilatation Catheter

CE

Features

- Outstanding performance for kissing balloon under 6F guiding catheter.
- Patented hydrophilic coating on distal shaft and Hypotube proximal shaft provide outstanding deliverability.
- Three-directional memory folding of the balloon allows of size minimization with great withdrawal capability, and ensures the good performance of repeated dilatation.
- Soft tapered tip provides smooth transition from guidewire to balloon catheter to avoid "fish mouth", and minimize the vessel damage.
- Short shoulder design at both ends of the balloon ensures the precise dilatation, and reduces the damage to normal vessel next to the lesion.

Technical Parameters

Catheter Design	Rapid Exchange
Balloon Compliance	Semi-compliant
Marker	2
Distal Shaft O.D.	2.7F
Proximal Shaft O.D.	1.9F
Tip Profile	0.017"
Minimum Guiding Catheter Compatibility	5F (0.056")
Guide Wire Compatibility	0.014"
Effective Length	142cm
Nominal Pressure	8 atm (φ2.25mm-3.0mm) / 6 atm (φ3.5mm-4.0mm)
Rated Burst Pressure	16 atm (φ2.25mm-3.75mm) / 14 atm (φ4.0mm)

NC Tadpole™

Coronary Dilatation Catheter

CE

Features:

- Strong radial strength with high RBP (22 atm) contributes to excellent stent apposition for post-dilatation.
- Patented hydrophilic coating on distal shaft provides outstanding deliverability.
- Three-directional memory folding of the balloon allows of size minimization with great withdrawal capability, and ensures the good performance of repeated dilatation.
- Soft tapered tip provides smooth transition from guidewire to balloon catheter to avoid "fish mouth", and minimize the vessel damage.
- Short shoulder design at both ends of the balloon ensures the precise dilatation, and reduces the damage to normal vessel next to the lesion.

Catheters

- 17 Angiographic Catheter
- 19 Orien™ Guiding Catheter CE
- 21 Thromsweeper™ Thrombus Extraction Catheter
- 22 Deliver™ Infusion Catheter

Angiographic Catheter

Features:

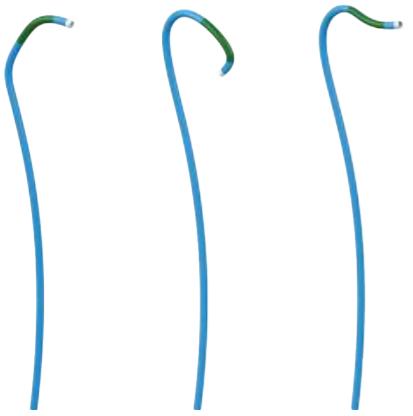

- Smooth external wall provides great crossability through tortuous vasculature.
- PTFE internal wall provides smooth lumen to ensure the excellent trackability.
- The middle layer of braided stainless steel mesh guarantees outstanding torque transmission and kink resistance.
- Large lumen diameter allows of high flow rate of contrast agent.

Orien™ Guiding Catheter

CE

Features:

- Flat wire braided middle layer offers outstanding flexibility and excellent kink resistance.
- 1:1 torque for easy operation and accurate placement.
- Robust secondary curve provides great backup support and curve retention.
- Soft and flexible tip minimize the damage to the vessel wall.
- PTFE internal wall provides smooth lumen to ensure the excellent trackability.
- Large lumen guarantees the good performance for kissing balloon.

Thromsweeper™

Thrombus Extraction Catheter

Features:

- Large suction lumen minimizes the flow resistance and boosts the extraction performance.
- Low crossing profile is designed for the compatibility with the smallest 6F guiding catheter.
- Hydrophilic coating on distal shaft provides great crossability and deliverability.
- Embedded Platinum marker empowers smooth-feeling of delivery and visualization.
- Removable support-wire helps rapidly and easily reach to the lesion.

Technical Parameters

Design	Rapid Exchange	
Guiding Catheter Compatibility (minimum)	6F (0.070")	
Guide Wire Compatibility	0.014"	
Effective Length	1450mm	
Extraction Lumen Area	1.03mm ²	
Guide wire Lumen Length	113mm	
Catheter O.D.	Proximal Distal	1.27mm 1.50mm

Features:

- Stainless steel core wire offers excellent torque transmission and kink resistance.
- Over-the-wire coil offers outstanding deliverability and radiopacity.

Ultraskin™ Hydrophilic Guide Wire

Features:

- Nitinol core wire guarantees great tip shape retention, outstanding kink resistance and 1:1 torque control.
- PU Jacket incorporated with tungsten provides highly radiopacity.
- Super smooth hydrophilic coating reduces friction, and provides excellent navigation in and out the catheter.
- Soft tapered tip increases distal flexibility, contributes to smooth vessel insertion, and minimizes the risk of trauma.

Two Types of Core Design for Different Clinical Needs

- **Core-to-Tip** design provides great tip stiffness, good touch feedback and moderate support for easy control and better crossability and accessibility.
- **Shaping Ribbon** design provides softer tip stiffness for minimized damage to the vessels, and outstanding tip shaping flexibility and stability for easy navigation.
- Nitinol + stainless steel cores provide superior flexibility and durability, improves the torque response.
- 3cm Platinum coil at distal tip provides excellent radiopacity.
- A hydrophilic coating is applied to the 30cm coiled distal end to increase the crossability and deliverability.
- PTFE coating on middle and proximal parts reduces friction, and improves pushability and catheter trackability.

05 Introducer Sheaths

29 Shoocin™ Introducer Kit CE FDA

31 Brilliant™ Introducer Kit CE FDA

**Features:**

- Advanced material improves bendability and flexibility without gapping or kinking.
- Special designed lock and silicon hemostatic valve provide outstanding hemostatic function, while guaranteeing the operational ability for the catheter.
- Smooth tapered tip helps with easy access to the artery, reducing trauma to patients.
- Smooth transition from dilator to sheath greatly reduces puncture resistance, providing easy and non-traumatic insertion.
- Minimized possibility of damaging tissue upon sheath entry, advancement and withdrawal, providing smoother and easier vascular access even through difficult access sites.

Shoocin™**Introducer Kit****Full kit includes:**

- Introducer Sheath (1)
- Dilator (1)
- Stainless Steel Guide Wire (1)
- Introducer Needle (1)
- Scalpel (1)
- Syringe (1)

The Introducer Kit can be customized by:

- Components include guidewire, introducer needle, scalpel, syringe are optional based on request.
- Guide wire provides two types: stainless steel guide wire, hydrophilic guide wire (Radial Sheath).
- Guide wire tip: straight (Radial Sheath), J tip (Femoral Sheath), 135 angled (Femoral Sheath).
- Introducer needle(IN) or intravascular catheter (IC) is optional.

* For Hydrophilic guide wire(Radial Sheath), IC is mandatory set.

* For stainless steel guide wire, IN is mandatory set.

Advanced Type (Radial Sheaths)

Features:

- Hydrophilic coated radial sheath and guidewire lead to smoother navigation and easier vascular access, reducing the risk of damage to the vessel.
- Advanced material improves bendability and flexibility without gapping or kinking.
- Special designed lock and silicon hemostatic valve provide outstanding hemostatic function, while guaranteeing the operational ability for the catheter.
- Smooth tapered tip helps with easy access to the artery, reducing trauma to the patients.
- Smooth transition from dilator to sheath greatly reduces puncture resistance, providing easy and non-traumatic insertion.

Brilliant™

Introducer Kit

CE FDA

Full kit includes:

- Introducer Sheath (1)
- Dilator (1)
- Hydrophilic Guide Wire (1)
- Intravascular Catheter (1)
- Scalpel (1)
- Syringe (1)

The Introducer Kit can be customized by:

- Remove the every single component includes guide wire, intravascular catheter (IC), scalpel (K) and syringe (S).
- Replace the hydrophilic guide wire (straight HS) into stainless steel guide wire (straight SS).
- Replace the intravascular catheter (IC) into introducer needle (IN). Intravascular catheter is mandatory to be a set with hydrophilic guide wire.

Please contact the sales for more information about the selections of customized kit.

* The Yellow Marks indicate the components which can be customized as mentioned before.
(e.g. radial sheath/6F/7cm, 0.021" straight stainless steel guide wire/45cm, 20G introducer needle, without scalpel and syringe: RS060721-SS45-IN20)

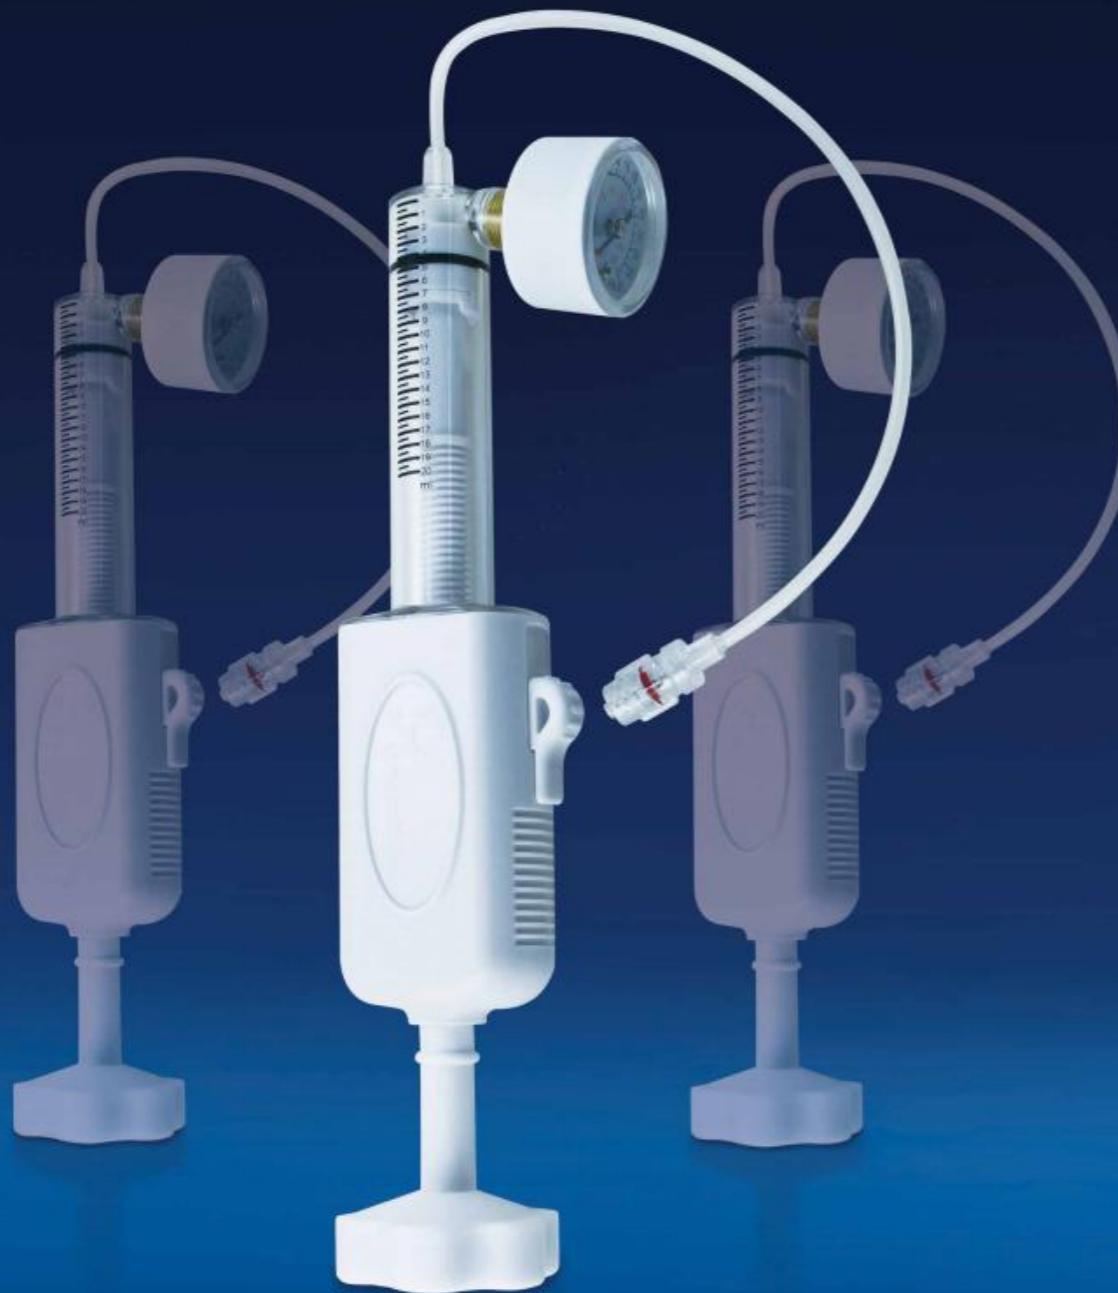

Please contact the sales for detailed catalogue numbers of customized kits.

Rayband™

**Radial Artery
Compression Tourniquet**

Features:

- Specially designed for radial artery hemostasis of post percutaneous puncture.
- Transparent material ensures clear visual control of hemostasis procedure.
- Unilateral valve connected to the balloon allows of accurate pressure adjustment to provide personalized hemostasis procedure.
- Adjustable band length is convenient to fit for patient's comfort.
- Stopcock on syringe helps with easy and accurate deflation.

Angiopower™

Inflation Device

CE FDA

Technical Parameters

Display	Analog/Fluorescent
Pressure	30 atm (440psi)
Barrel Volume	20mL
Stopcock	3-way 500psi
Extension Tubing	33cm, 1200psi, male rotating Luer connector

Catalogue No.	Inflation Range (atm)	Stopcock
LP-P-30	30	/
LP-P-30S	30	Included

Features:

- Fluorescence clock face for clearer display.
- Smooth fine adjustment for accurate inflation.
- Barrier screw pivot provides precise pressure placement.
- The internal multi-buckle structure ensures more secure lock.
- Ergonomic grip fits comfortably in either hand.
- Petal-shaped handle ensures torque control without slipping.

Inflation Devices Kit

CE FDA

Features:

- Precise and stable pressure placement.
- Multi packages included meet various clinical demands.

Inflation Device Kit includes:

Inflation Device (1)
Y-Hemostasis Valve Set (1)

Angiospring™ Angiography Control Syringe

Features:

- Solid and smooth plunger with unique push button make it easy for operation
- Clear scale, accurate control of infusion volume
- Latex free

Technical Parameters

Luer Connector Type	Rotating
Sterilization	ETO

Ordering Information

Catalogue No.	Connector Type	Nominal Capacity (mL)
LPHB112	Rotating	12

**Features:**

- High pressure transparent material ensures the need for large flow
- Customized length is available

Contrast Medium Injection Manifold Kits

CE

Contrast Medium Injection Manifold Kit includes:

- Manifold (1)
Angiography Control Syringe (1)
High Pressure Extension Tubing (1)
Infusion set (2)

Peripheral Interventional Products

PTA Balloon

45 Supercross™ PTA Balloon Dilatation Catheters CE

Supercross™

PTA Balloon Dilatation Catheter

CE

Features

- The flexible tapered tip ensures consistently smooth insertion andatraumatic navigation.
- Low crossing profile guarantees excellent crossability to pass through narrow lesions.
- Over the wire (OTW) design provides great torque control, kink resistance and pushability to ensure the outstanding deliverability.
- Dual-lumen shaft design of the OTW catheter separates the inflation lumen and guide wire lumen to ensure the rapid deflation performance.
- Special memory folding technique provides great withdrawal capability, and allows of repeated dilatation.

Technical Parameters

Catheter Design	Rapid Exchange (RX)
Balloon Compliance	Semi-compliant
Marker	2
Material	Nylon
Nominal Pressure	7 atm
Distal Shaft O.D.	2.8F
Proximal Shaft O.D.	2.3F
Lowest Crossing Profile	0.025"
Effective Length	135cm
Minimum Guiding Catheter Compatibility	5F (0.056")
Guide wire Compatibility	0.014"
Catheter Design	Over the Wire (OTW)
Balloon Compliance	Semi-compliant
Marker	2
Material	Nylon
Nominal Pressure	7 atm
Distal Shaft O.D.	5F
Lowest Crossing Profile	0.060"
Effective Length	80cm / 135cm
Minimum Introducer Sheath Compatibility	5F / 6F / 7F
Guide Wire Compatibility	0.035"

MemoCarna®

Atrial Septal Defect Occluder

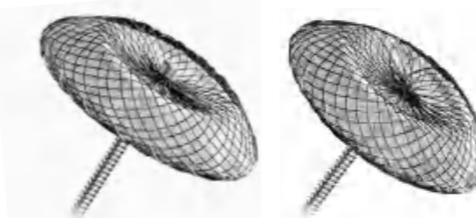

Features

- Adopts unique Dature-shape braiding technology, achieves faster endothelialization with more flat disk after releasing and decreasing influences to blood flow.
- Updated surface treatment technology, forming uniform and even oxide layer while removing impurities. Nickle ions release is effectively reduced and delivery performance is enhanced.

ASD Occluder

Hubless
ASD Occluder

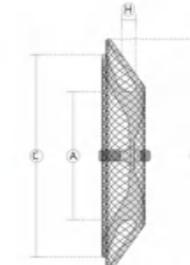

Features

- Modified rigidity and flexibility for different type of occluders - greater stiffness of ASDO offers excellent supporting force for big disks.
- Uniform and smooth oxide film on nitinol wire effectively prevents from the release of nickel ion to guarantee the great biocompatibility and long-term safety.
- Hubless design helps with earlier endothelialization to minimize the risk of thrombosis.

**Features**

- Modified rigidity and flexibility for different type of occluders - less stiffness of VSDO reduces the holding force to minimize the risk of third degree atrioventricular block.
- Different waist lengths of VSD occluders minimize the negative impact of compress force to the patients.
- Uniform and smooth oxide film on nitinol wire effectively prevents from the release of nickel ion to guarantee the great biocompatibility and long-term safety.
- Hubless design helps with earlier endothelialization to minimize the risk of thrombosis.

**Zero Rim Eccentric VSDO for the Defect Close to Aortic Valve**

MemoPart™

Patent Ductus Arteriosus (PDA) Occluder

CE

Features

- Modified rigidity and flexibility for different type of occluders - balanced stiffness of PDAO ensures the optimal occlusion performance.
- Uniform and smooth oxide film on nitinol wire effectively prevents from the release of nickel ion to guarantee the great biocompatibility and long-term safety.
- Hubless design helps with earlier endothelialization to minimize the risk of thrombosis.

PFO Occluder Hubless
PFO Occluder

MemoPart™

Patent Foramen Ovale (PFO) Occluder

CE

Features

- Modified rigidity and flexibility for different type of occluders - greater stiffness of PFOO offers excellent supporting force for big disks.
- Uniform and smooth oxide film on nitinol wire effectively prevents from the release of nickel ion to guaranteed the great biocompatibility and long-term safety.
- Optional hubless design helps with earlier endothelialization to minimize the risk of thrombosis.

MemoLefort®

Left Atrial Appendage Occluders System

Features

- Self-expanding nitinol self-centering scaffold, providing excellent conformity, applicable to more than 98.5% anatomic LAA types.
- Flower gathered design, friendly to surrounding tissue after implantation.
- Disk concave design, facilitates endothelialization process.
- Integrated barbed-wire, makes stable after release.
- 150um PET film, prevents blood effectively, decrease residual shunt.
- Delivered with MemoLefort Left Atrial Appendage Occluder Delivery System, makes easy manipulation and accurate release.

Vascular Plug

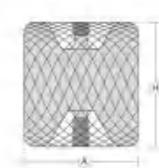

Hubless Vascular Plug

Features

MemoPart™ Plug is a percutaneous, transcatheter device applied to the closure of a wide variety of veins and arteries, reducing or eliminating blood flow by blocking the target vessel. The vascular plug can be used for the patients with clinical symptoms of abnormal blood vessels, such as:

- Aortopulmonary collaterals
- Arteriovenous malformation
- Surgical aortopulmonary shunts
- Anomalous venovenous connections
- Arteriovenous fistulas
- Peripheral vessels

**Features**

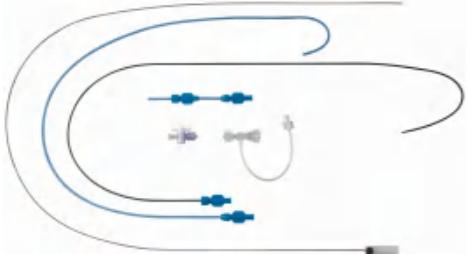

MemoPart™ Snare is composed by Nitinol coated Tungsten coil and the Nitinol shaft, which provides great radiopacity, biocompatibility and shape memory ability. This is a widely used device to:

- Establish the femoral artery-vein loop
- Retrieve the dislocated occluder
- Retrieve stent or guide wire
- Retrieve the blood filter
- Help with control navigation, etc.

MemoPart™ Snare

Perfiller® Expansible Embolic Coil System

Features:

- The polymer core expands when exposed to water, effectively increasing the packing density, and achieving compact embolization, effectively reducing the long-term recurrence rate.
- The expansion of the polymer core can effectively increase the stability of the coil and avoid the compression of the packed coil under the impact of blood flow, thereby ensuring long-term effective sealing of the aneurysm neck, eliminating dog-ear remnant and effectively reducing the recurrence rate.
- Comparing with bare metal coils, Perfiller of the same length has a lower metal occupancy rate, a softer coil, and improved efficacy and safety during use.
- Minimum loop diameter is 1mm and a wide range of small size coils provide more options for small aneurysms as finishing coils.
- The new delivery system has greater pushability and crossability. The torque response and torque transmission of the pusher are improved. The delivery process is easier and smoother.

Deromper® Coil Detachment Controller

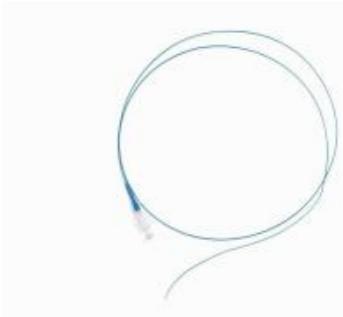

Features:

- Safe and Reliable
"T shape detachment" method avoids detaching area exposing to the aneurysm causing an aneurysm rupture
- Fast Detaching
The detaching point is applied with polymer wire and immediate fusing technique, which ensure the detachment finishing within 1 second

Deromper® Coil Detachment Controller	TJCDC

Frepas[®] Disposable Microcatheter

CE

Features:

- Three-layer structure of the microcatheter contributes to the high static pressure resistance, which could reach up to 600psi (4137KPa).
- Multi-segments design with smooth transition ensures excellent flexibility, crossability and pushability during delivery.
- The long distal soft segment improves the sensitivity of the catheter during delivery.
- Soft segment is covered by coiled Pt-W alloy, which provides great radiopacity and better trackability in the vessel.
- Ultra-soft tip ensures better plasticity even for multiple times of tip shaping.
- Hydrophilic coating on the whole catheter provides outstanding deliverability.

Proender[®] Disposable Embolic Protection Device

CE

Features:

- Nitinol material with great hemocompatibility. Soft braided filter and round distal tip minimize the risk of trauma to the vessel
- Excellent axial control and kink resistance provide superior deliverability and crossability through tortuous anatomy.
- Gold loop marker could identify the release status of the filter, which ensures the optimal positioning of the filter in the vessel
- The unique design of guidewire casing on the filter prevents from its displacement caused by the movement of guidewire
- Gradient pore diameter from distal to proximal end guarantees efficient embolus capturing while maintaining continuous blood flow
- Integrated sheaths for delivery and retrieval are compatible with 5F/6F catheters and 0.014" guidewire, which could achieve rapid exchange during the procedure

Freble™ Disposable Intermediate Catheter

Features:

- To be precise and satisfied, through all the tortuous.
- Excellent push and strong support.
- 6F large diameter 0.072".
- Various configurations of catheter tip.
- Tip softening treatment.
- Overall gradient hardness design.
- Three-layer composite structure.
