ABOUT US

Our profound knowledge and extensive experience in web app development enables us to deliver high quality solutions for a wide range of industries and domains.

BRIEF INTRODUCTION

SC Trigava SRL founded in 2006 by a group of specialists in the field of information technologies, having years of experience in the field.

We implement technologically complex solutions on a large scale for various sectors of the economy. Resources, experience and potential of our IT company allow us to supply consulting services, software development, engineering, information security and software platforms on national and international scale.

Our programmers do more than write code in dark rooms - they solve problems with attention to detail. Our managers not only send the paper to customers - they build the bridge between the customer and the work team so that it can later develop into a fruitful long-term collaboration.

We are the emissaries of our customers' brand – this makes our brand stronger.

OUR VISION & MISSION

Business activity should be based on honesty, integrity, fairness, and social responsibility. Such activity is defined by:

Compliance with relevant laws and the rules of law

Responsible treatment of customers and clients

Involvement and engagement in the community

Fair employment practices

Responsible environmental protection

COLLABORATION

We develop relationships in order to achieve great results for all clients we are working with.

INTEGRITY

We act fairly and openly, in compliance with the spirit of law. We have well-defined standards which should not be diminished.

PASSION

Passion is at the heart of our organization. We strive vigorously and wholeheartedly toward the objectives, we've set.

TEAM QUALITIES

Skills and Qualities of the Team

01

EXPERIENCE

Spending time together, sharing experience, working towards a common goal allows bonding to happen more effectively. Happiness and learning are tied closely together.

02

SASS

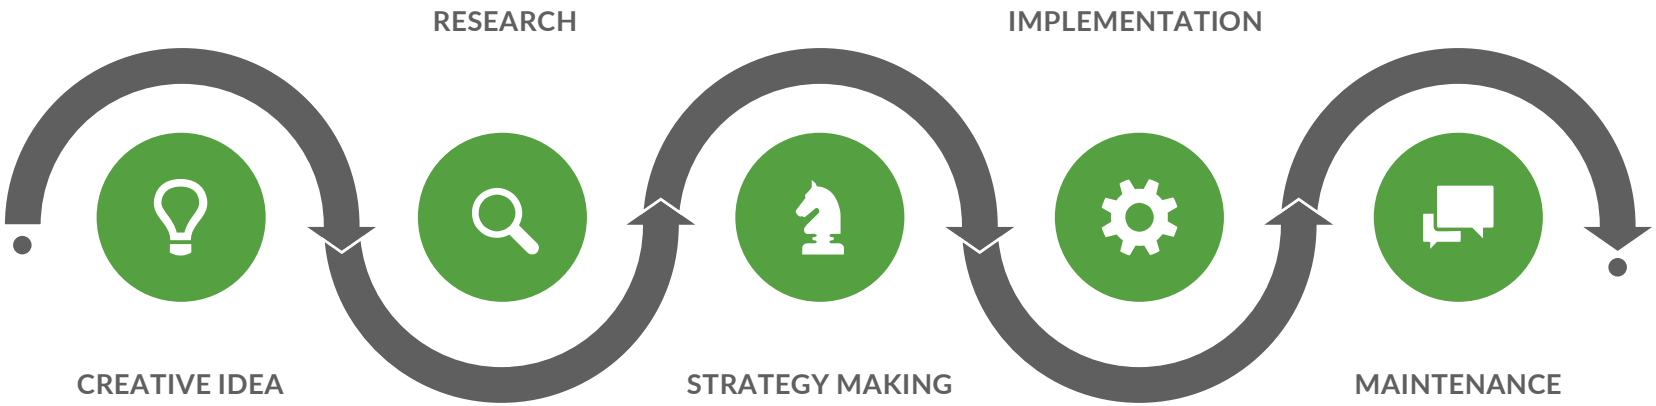
JAVASCRIPT
jQuery

REPOSITORY
Bitbucket

API
SOAP REST

PROJECT PROCESS

The basic phases in the project management process



APPROACH AND IMPLEMENTATION

Nothing should get in the way of our client getting the high-end web solution the right way

With deep understanding of modern technology and strong expertise in multiple business domains, we implement comprehensive projects and deliver high-end web solutions.

We develop custom software products tailored to specific business needs of our clients and support them throughout the whole way: from an idea to its implementation.

Our **solid background**, flexibility and full transparency enabled us to become a trusted technological partner for our clients. SC Trigava SRL is synonymous with top quality and high-end products & services.

We are using **Hybrid Project Management**: Optimally Combining the Two Methods. Consulting use traditional methods, but development mostly use agile methods.

Some parts of a project are implemented in a traditional way, other parts using agile methods: high-level planning employs a traditional approach, detailed - an agile one.

Combining Traditional and Agile Methods in a Single Project achieves:
- Closer coordination with users and more frequent, implementable intermediate results
- Regular meetings to discuss progress
- Retrospectives after each status update meeting, not just at the end
- Project planning is synchronized with the sprint lengths

Long term maintenance services: The implemented measures for monitoring in the warranty period will be available after the mandatory maintenance period expire.

These will be helpful for tracking, monitoring, and keeping the record of the performed technical activities.

Beside delivering the standard maintenance services for assuring the good functionality we will be offering on request assistance with evaluation per task in dependence of the involved specialists, such activities may be proposed or delivered on request of the beneficiary.

OUR PORTFOLIO

Actions speak louder than words. Within 16+ years of operation, we have helped many companies to automate their inner processes or strengthen their teams with IT professionals.
