## **TECHNICAL FEATURES**

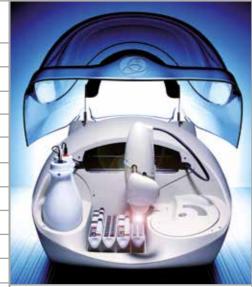

Random access automatic analyzer aimed at giving IVD results with photometric
reading directly in the reaction rotor.

Throughput	150 test/hour
Positions for racks	4 (Regents and samples)
Number of samples per sample rack	24 (Racks multipurpose)
Maxim capacity of samples	72 (primary tubs and pediatric vials in the same rack)
Flexibility in type of sample tubes	ø13 mm, ø15 mm (max height: 100 mm),

## JUST A ELEGANT SYSTEM

## DEDICATED REAGENTS

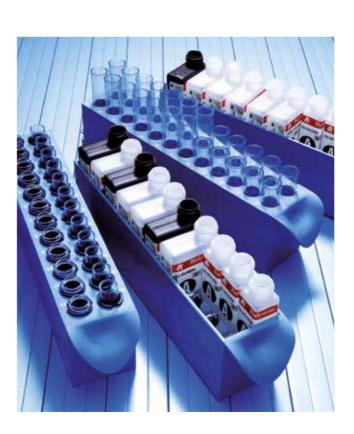

Since its founding in 1981, BioSystems commitment has always been to offer effective, reliable analytical systems to laboratories around the world.

A15 is a compact and easy to use automatic analyzer, designed especially for small laboratories as their main analyzer offering the best performance and maximum efficiency. The A15 is easily adaptable to any work routine due to the flexibility in the installation of samples and reagents.

A15's performance (low water consumption, minimal maintenance, high quality constituents and significant savings in the use of consumables) optimizes the operating cost of the laboratory.

With the automatic analyzer A15, BioSystems provides a complete system using our dedicated reagents for Clinical Chemistry and Turbidimetry designed to achieve the best possible performance.

- Throughput of 150 test / hour
- Good design with high functional robustness
- System
- Low water consumption (less than 0.5 L per hour)
- Maximum flexibility in the positioning of samples and reagents (mutual Racks)
- Real prozone detection function
- Capacity up to 30 reagents or 72 samples
- Ability to install together primary tubes and pediatric vials in any position
- Intuitive and easy to follow software, including bidirectional LIS Integration, STAT and Internal Quality Control Management (Levey-Jennings graphs)
- Automatic and configurable management of reagent interference
- Use of dedicated reagents ready to be used without manipulation or transfers

BioSystems has developed a wide range of reagents intensively evaluated in different workload conditions and validated to achieve the highest performance in A25 and A15 systems. These systems comply with the requirements of European IVD Directive (98/79/EC) and as a consequence are CE marked. BioSystems recommends their use according to the instructions and applications validated by BioSystems.
