BASKET EXTRACTOR

REMOVE FOREIGN OBJECTS SAFELY AND EFFECTIVELY

The extraction baskets from Bauer medical are not only suitable for stone extraction in the bile duct, but also for use in the upper and lower intestinal tract for the safe recovery and removal of foreign bodies such as marbles, batteries or mouth fitting toys. The rotation of the Vario basket ensures safe and reliable recovery of the foreign body.

SPECIFIC CHARACTERISTICS

- Fixed pre-determined breaking point
- Smooth wire with optimized gliding quality
- Ergonomic grip for improved tactile feeling
- Stone extractor basket with atraumatic tip
- Vario basket

INJECTION NEEDLE

RELIABLE AND SAFE TO THE TIP

The disposable MICRO-TECH's disposable injection needle facilitates clinical practice due to its ergonomic handle and especially sharp needle. The anti-skid design guarantees convenient control with just one hand. For

even more precise punctures the handle can be locked in several stages. When the needle is released, it snaps back into the catheter to avoid damage to the working channel.

SPECIFIC CHARACTERISTICS

- Ergonomic anti-slip handle
- Adjustable pressure pad
- Automatic needle-feed
- Soft, atraumatic silicone head
- Needle with extremely sharp, precision cut
- Different needle diameters
- LL needle connector

Needle completely retracted

Compact ergonomical design

SAFETY NEEDLE SN

PRECISION WITH A UNIQUE SAFETY CONCEPT

With the injection needles from Bauer medical, punctures become safer and more precise than ever. On one hand, it is the newly developed handle with a particularly ergonomic shape which ensures a more tactile feeling and an audible locking. On the other hand, it is the special bevel-style grinding of the needle, allowing for highly

precise punctures, even under difficult conditions. Matching the specifications of the UVV for enhanced safety, this injection needle provides even more protection: Upon completion of the application, the proximal handle can be kinked at a defined breaking point. The forced retention of the needle in the tip of the catheter helps to avoid injuries.

SPECIFIC CHARACTERISTICS

- Handle with tactile ergonomics
- Needle with special bevel-style grinding
- Distal protector head for needle tip
- CLICK noise when inserting and retracting the needle
- Unique safety concept for non-injurious disposal
- Needle diameter of 0.5 / 0.7 / 0.9 mm

Catchable needle with metal protector head

Hemostasis - Ligation

6 Shooter® Saeed® Multi-Band Ligator

Used to endoscopically ligate esophageal varices at or above the gastroesophageal junction or to ligate internal hemorrhoids.

- Barrel features two-string trigger cord and recessed bands - providing maximum endoscopic view while maintaining suction
- Clear band signals when only one band remains to be deployed
- Wide array of barrel sizes to meet a full range of procedural needs

Each kit includes barrel with ligation bands and trigger cord, loading catheter, precision control handle and irrigation adapter.

Note: -F options are for use with Fuji endoscopes. -C options are for use with colonoscopes.

Caution: This product contains natural rubber latex, which may cause allergic reactions.

This device is supplied non-sterile.

3-LUMEN PAPILOTOME

FOR PRECISE WIRE GUIDANCE AND CANNULATION

Positioning, cannulation and resection are the decisive features of a safe and successful papillotomy. The 3-lumen papillotome from MICRO-TECH meets these requirements in every way: Emerging from the working channel in the correct position, the atraumatic tip, tapered to 5 Fr, supports cannulation and the resection is done reliably at the "11 o'clock" marker. Maximum safety during resection

is also provided by optional proximal insulation of the cutting wire. The three lumens for cutting wire, guide wire and contrast media provide for a high level of safety and efficient contrast injection. Thanks to the ergonomic 3-ring grip handle, this papillotome is highly user-friendly and easy to control.

SUCCESSFUL IN PRACTICAL USE

The special stranded wire of DailySnare endows the snare with the radial force it needs to open and be controlled in any position, easily and reliably. DailySnare has proved its worth as a reliable solution in daily routine work owing to its enormous dimensional stability and good cutting properties. Thanks to the new handle the snare can easily be opened and closed even if connected to the HF-cable.

DAILYSNARE MORE COMFORT AND RELIABILITY IN EVERYDAY HOSPITAL ROUTINE

In order to make the removal of polyps in everyday hospital routine as efficient as possible, MICRO-TECH has developed a program of disposable polypectomy snares which perfectly combines quality with cost effectiveness. Each oval snare is made of a specially stranded wire, with end during radial force, high dimensional stability and precise cutting properties. The 3-ring handle offers a secure hold and transmits every movement reliably to the snare.

SPECIFIC CHARACTERISTICS

- Very comfortable to use
- Reliable and safe
- Innovative HF-connection
- Ergonomic 3-ring handle
- Excellent cutting properties
- High strength of shape
