Ophthalmic Viscoelastics (OVDs)

Sodium Hyaluronate

Viscoelastics provide the protection and control needed during ophthalmic procedures of:

Cataract extraction

IOL implantation

Glaucoma filtering surgery

Corneal transplantation surgery

Product Features :

Easy to inject and remove from the eye

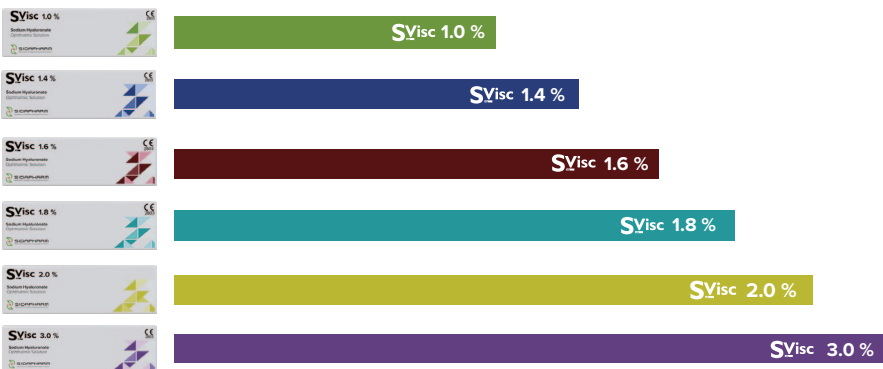

Latex-free

Provides excellent endothelial protection

Ideal for cartridge lubrication during IOL implantation

No refrigeration required

Provided in 1ml pre-filled syringe*

*also available in 1,5ml upon request

Ophthalmic Solutions

Trypan Blue 0.06%

SBlue PFS

SidaBlue PFS - 1mL Prefilled syringe

Extremely high purity levels

Ready to use syringe

Ophthalmic cannula included

Ergonomic grip for better control of the injection

* also available in 1mL vial
