WHAT IS AXON AWARE TECHNOLOGY?

Picture this: An officer is in a foot chase away from her vehicle, alone. She's heading into unfamiliar terrain fast. Both the suspect and the officer have drawn a weapon. It's life or death.

Thankfully, command staff back at HQ are with her every step of the way. They are alerted to the escalating situation when she withdraws her firearm, and instantly pull up a live map of where to send backup. And with her camera already recording, they can view her livestream to see how the event is unfolding. Thankfully, the suspect is successfully apprehended, and everyone is unharmed. That's Axon Aware. With a combination of sensors, location services and an LTE connection, Aware brings new possibilities to keep officers safe.

*Handsfree activation requires Axon Signal integration. Alerts, Live maps and Live streaming require Axon Aware purchase and activation. LTE is a registered trademark of Institut Européen des Normes; de Télécommunication.
