descrierea produsului

**Product parameters**

Product name MCD-3003B1  
Dimensions 410\*85\*45mm  
Working current Less than 50MA  
Net weight 350g  
Power supply 9 volt square battery (6F22ND) with low voltage indication function, external charger (charger optional)  
Detection sensitivity Detecting RMB one yuan coin  
Package dimensions 50\*27\*45cm  
Alarm mode Vibration and sound and light synchronization alarm

**Technical standard**

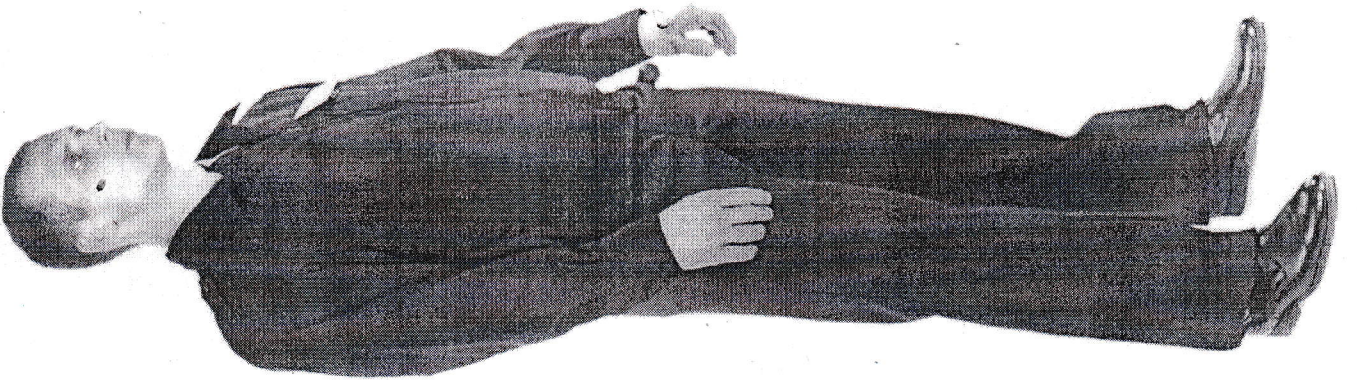

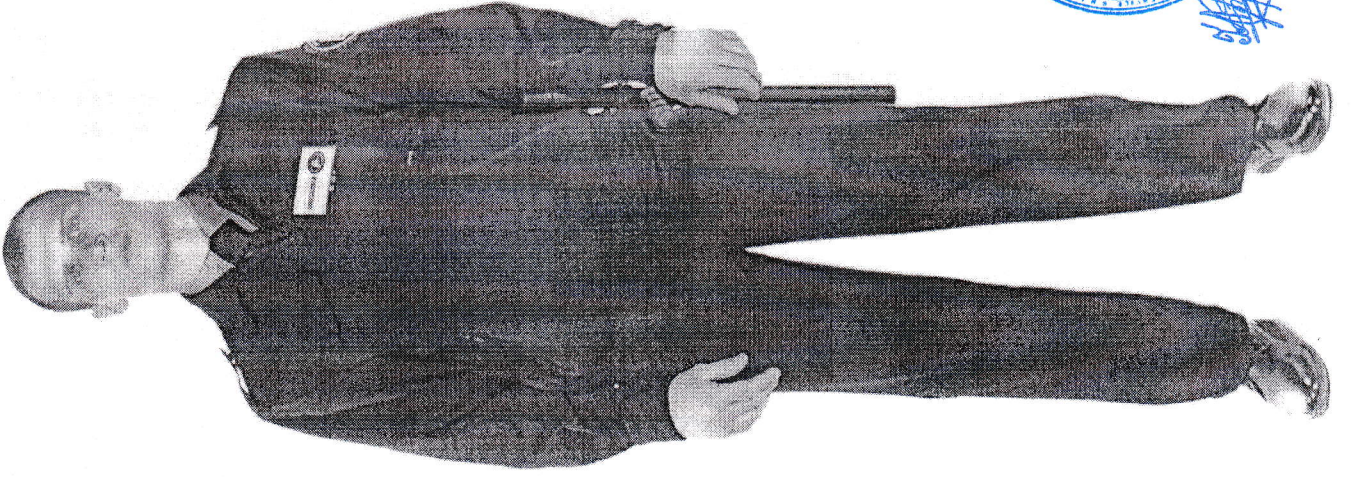

The company has passed ISO9001:2008 quality management system certification.  
Products passed the EU CE certification  
Strictly implement the national standard GB12899-2002.  
General technical specifications for hand-held metal detectors  
Basic safety: meet the requirements of GB4793  
Safety in life: meeting the NILECJ-0601 standard  
Radiation reference EN50081-1 standard

**Features and application range**

All are made of imported high-quality components, high detection precision, stable performance, durable, simple operation, light and beautiful appearance, sound is crisp and loud, with power-on and detection alarm lights and automatic sound and light conversion function, with a quick reset button. It is mainly used in places where metal detection is required, such as security metal anti-theft inspection, examination room, school to prevent the use of communication tools for cheating inspection, and unspecified metal detection sites.
