**SHANDONG HAI DI KE MEDICAL PRODUCTS CO.,LTD.**

山东海迪科医用制品有限公司

Shandong Haidike Medical Products Co., Ltd. is a leading and world famous medical devices manufacturer with CE, ISO, FSC, CFDA and FDA certificates. RTMED has registered as Madrid trademark. We have established good cooperation with Tsinghua University and Shandong Academy of Sciences, having great R & D center and research team. Our products are sold in over 100 countries.

- Absorbable surgical sutures approved by CE certificate
- NO.1 catgut suture plant in the world
- Lifting Threads for Beauty, Cosmetic
- Orthopedic casting tapes & splints
- Medical protection products
- Electric Wheelchair & Manual Wheelchair
- Pet Food, Vet Suture

### Needle Shapes

### Advantages

- 1 Strong Hardness
- 2 Outstanding Sharpness
- 3 Excellent Tenacity And Ductility

- Round bodied (heavy)
- ▲ Curved cutting (heavy)
- ▼ Reverse cutting (heavy)
- ⊖ Taper cutting
- ⊕ Microfine spatula curved
- ⊖ Blunt point
- ▲ Straight round bodied
- ▲ Straight curved cutting

## PGA POLYGLYCOLIC ACID

### Properties:

Structure: Multifilament, Braided  
 Colour: Violet, Undyed  
 Chemical composition: Polyglycolic acid  
 Coating: Polycaprolactone + Calcium Stearate  
 Sizes: USP 8/0 - USP 4  
 Type of absorption: Hydrolysis  
 Sterilization: Ethylene Oxide  
 Absorption: 60 - 90 days

### Advantages:

- High initial tensile strength
- Excellent knotting ability
- Reliable absorbability
- Easy to handle
- Outstanding holding power through the critical wound periode
- Smooth surface, slides smoothly through the tissue

## PGLA POLYGLACTIN 910

### Properties:

Structure: Multifilament, Braided  
 Colour: Violet, Undyed  
 Chemical composition: Poly(glycolide-co-l-lactide 90/10)  
 Coating: Poly(glycolide-co-l-lactide 30/70) + Calcium Stearate  
 Sizes: USP 8/0 - USP 2  
 Type of absorption: Hydrolysis  
 Sterilization: Ethylene Oxide  
 Absorption: 56 - 70 days

### Advantages:

- High tensile strength
- Smooth tissue passage
- Easy knotting and tie down
- Excellent knot security
- Reliable absorbability

## PDO POLYDIOXANONE

### Properties:

Structure: Monofilament  
 Colour: Violet, Undyed  
 Chemical composition: Poly (p-dioxanone)  
 Sizes: USP 7/0 - USP 2  
 Type of absorption: Hydrolysis  
 Sterilization: Ethylene Oxide  
 Absorption: 180 - 210 days

### Advantages:

- High initial tensile strength
- Prolonged wound support
- Minimal tissue reaction
- Lower incidence of infection and trauma due to smooth surface

## PGCL POLIGLECAPRONE 25

### Properties:

Structure: Monofilament  
 Colour: Violet, Undyed  
 Chemical composition: Poly (glycolide-co-caprolactone)  
 Sizes: USP 6/0 - USP 2  
 Type of absorption: Hydrolysis  
 Sterilization: Ethylene Oxide  
 Absorption: 90 - 120 days

### Advantages:

- High initial tensile strength
- Easy handling
- Smooth passage through tissue
- Excellent knotting ability

## CHROMIC CATGUT

### Properties:

Colour: Dark brown  
Composition: Purified connective tissue  
Sizes: USP 7/0 - USP 4  
Type of absorption: Proteolysis  
Sterilization: Gamma radiation  
Absorption: 90 - 100 days

### Advantages:

- High tensile strength
- Excellent handling properties
- Minimal tissue reaction
- Uniform absorption

## PLAIN CATGUT

### Properties:

Colour: Beige  
Composition: Purified connective tissue  
Sizes: USP 7/0 - USP 4  
Type of absorption: Proteolysis  
Sterilization: Gamma radiation  
Absorption: 60 - 70 days

### Advantages:

- High tensile strength
- Smooth tissue passage
- Easy knotting and tie down
- Excellent knot security
- Reliable absorbability

## SILK

### Properties:

Structure: Braided  
Colour: Black, White  
Composition: Natural silk filaments  
Coating: Silicon / wax  
Sizes: USP 8/0 - USP 4  
Sterilization: Ethylene Oxide

### Advantages:

- Excellent handling properties
- High tensile strength
- Highly smooth and flexible
- Good knot security

## POLYPROPYLENE

### Properties:

Structure: Monofilament  
Colour: Blue  
Chemical composition: Polypropylene  
Sizes: USP 7/0 - USP 3  
Sterilization: Ethylene Oxide

### Advantages:

- High tensile strength
- Smooth tissue passage
- Easy and secure knotting
- Minimal acute inflammatory reaction in tissues
- Excellent and permanent tissue support

## NYLON

### Properties:

Structure: Monofilament  
 Colour: Blue, Black  
 Chemical composition: polyamide 6 - 6.6  
 Sizes: USP 12/0 - USP 4  
 Sterilization: Ethylene Oxide

### Advantages:

- High tensile strength
- Smooth tissue passage
- Easy and secure knotting
- Excellent and permanent tissue support

## POLYESTER

### Properties:

Structure: Braided  
 Colour: Green, White  
 Chemical composition: Polyethylene terephthalate  
 Coating: Silicon  
 Sizes: USP 6/0 - USP 4  
 Sterilization: Ethylene Oxide

### Advantages:

- High tensile strength
- Excellent handling properties
- Minimal tissue reaction
- Good knot security

## Lifting Threads Needle

### SHARP

Basic type, generally used for linear filling and simple lifting. Beginners can also operate effortlessly.

### L TYPE

L type blunt needle, reduce the damage of blood vessels, bruising and hematoma. The pain was significantly reduced.

### W TYPE

Circular head, reducing the damage to the skin tissue. After the injection, the needle can be taken out then correct the position and depth of the needle, which improves the lack of a stitch of the other types.

### U-COG

Double needle is used for eyebrow lifting and other parts requiring strong lifting. U-COG is a special structure line with strong lifting ability. The local lifting effect is almost as good as the little facelift.

## PDO/PCL Lifting Thread

### Mono

**Needle** Sharp Needle  
**Parts** Face, Body  
**Effects** Tightening, Filling, Wrinkles Removing, Whitening

### Tornado Screw

**Needle** Sharp Needle  
**Parts** Eye, Neck, Crow's Feet, Cheek  
**Effects** Tightening, Filling, Whitening, Wrinkles Removing

### KONK

**Needle** L type Blunt Needle  
**Parts** Nasal columella, Nasal bridge  
**Effects** Rhinoplasty, Nose Shaping

### COG Lifting

**Needle** L/W type Blunt Needle  
**Parts** Lifting Eyebrow, Apple Zone, Cheek, Chest  
**Effects** Face Lifting, V Face, Chest Lifting

### Multi Threads

**Needle** L type Blunt Needle  
**Parts** Face, Neck, Eye Bag, Crow's Feet  
**Effects** Tightening, Filling, Whitening, Wrinkles Removing

### Molding COG

**Needle** W type Blunt Needle  
**Parts** Face, Neck, Crow's Feet, Eye Bag  
**Effects** Tightening, Filling, Whitening, Wrinkles Removing

### Forehead

Multi Threads / Tornado Screw / Mono Screw

### Crow's feet / Eye bags / Eye Corner's Lifting

Blunt Needle For Eye 30G-25mm

### Apple Zone

Multi Threads / Tornado Screw / Mono Screw

### Nasolabial folds / Mouth Corner's Lifting

Multi Threads / Tornado Screw / Mono Screw

### Face Lifting

18G-100mm / 19G-100mm

### Nose Dorsum / Nose Bridge

19G-60mm

### Nose Columella

19G-38mm

### Cervical Stripe / Neck Lifting

23G-38mm / 18G-100mm

## Medical Cooling Gel Patch

### Usage Method

Step one:  
Thoroughly clean facial skin before using facial mask.

Step two:  
Remove the facial mask, spread it on the face and adjust it to the skin.

Step three:  
Apply for 15-20 minutes, so that the skin can absorb the essence of the facial mask.

Step four:  
Remove the facial mask, gently massage the face with the fingers, absorb the residual essence, and clean the face.

## Hyaluronic Acid Hydrating Mask

Net : 25ml  
Silk membrane cloth

WWW.HDKSUTURE.COM

## Peptide Repair Lyophilized Powder

① Peptide element repair lyophilized powder  
② Peptide element repairing solution

Step one:  
Open the aluminum cover and rubber plug.

Step two:  
Pour bottle ② of liquid into bottle ①.

Step three:  
Put on the dropper and shake the liquid in bottle ① evenly.

Step four:  
Squirt to the dropper, take a proper amount of liquid and evenly smear it on the face.

## Skin Care Products

Mild Cleaning Foam	150ml
Soothing Moisturizing Toner	120ml
Moisturizing Repairing Lotion	100ml
Brightening Recovery Essence	400ml
Multi-effect Nourishing Repairing Cream	50g

## Hernia Repair Mesh

### Large mesh aperture

Promotes liquid circulation and smoothes tissue growth.

### Less micropores

Greatly reduces the possibility of bacteria hiding and is not easy to infect.

### Light weight

Reduce postoperative pain and foreign body sensation.

Hernia Example

After Mesh Repair

## Disposable Surgical Face Masks

### 3 Ply Flat type Ear Loop EN 14683:2019 Type IIR

Name	Parameter
Size	17.5 cm x 9.5 cm
Material	Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, metal wire with plastic covering nose clip, polyester/nylon spandex blend ear loops
Product performance:	The bacterial filtration efficiency of the mask should be not less than 98%.
Application	It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc.
Expiration date	2 years after production
Storage	Store at room temperature, the relative humidity should not exceed 85%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

### 3 Ply Flat type Ear Loop EN 14683:2019 Type IIR

Name	Parameter
Size	14.5 cm x 9.5 cm
Material	Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, metal wire with plastic covering nose clip, polyester/nylon spandex blend ear loops
Product performance:	The bacterial filtration efficiency of the mask should be not less than 98%.
Application	It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc.
Expiration date	2 years after production
Storage	Store at room temperature, the relative humidity should not exceed 85%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

## Disposable Medical Face Mask

### 3 Ply Flat type Ear Loop EN 14683:2019 Type I

Name	Parameter
Size	17.5 cm x 9.5 cm
Material	Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, metal wire with plastic covering nose clip, polyester/nylon spandex blend ear loops
Product performance:	The bacterial filtration efficiency of the mask should be not less than 95%.
Application	It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc.
Expiration date	2 years after production
Storage	Store at room temperature, the relative humidity should not exceed 80%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

### 3 Ply Flat type Ear Loop EN 14683:2019 Type IIR

Storage	Store at room temperature, the relative humidity should not exceed 80%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

### 3 Ply Cup type Head Loop EN 14683:2019 Type IIR

Name	Parameter
Size	13.5 cm x 13.5 cm
Material	Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, nose clip, polyester/nylon spandex blend ear loops
Product performance:	The bacterial filtration efficiency of the mask should be not less than 90%.
Application	It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc.
Expiration date	2 years after production
Storage	Store at room temperature, the relative humidity should not exceed 85%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

### 5 Ply Folding type Head Loop N95-V1

STERILE

Name	Parameter
Size	11.5 cm x 15 cm
Material	Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, nose clip, polyester/nylon spandex blend ear loops
Product performance:	The bacterial filtration efficiency of the mask should be not less than 95%.
Application	It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc.
Expiration date	11 months after production
Storage	Store at room temperature, the relative humidity should not exceed 85%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

## Medical Goggle

#### Model specifications

□White □Black □Transparent  
□Large □Medium □Small

#### Product description

It is composed of a protective cover made of polymer material, a foam strip and a fixing device. Non-sterile, single use.

#### Expiration date

3 years after production

#### Storage

This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

## Medical Isolation Mask

### Model: Ear hook type / Headband type

EN166:2001  
EN167:2002

#### Product description

It is composed of a protective cover made of polymer material, a foam strip and a fixing device. Non-sterile, single use.

#### Expiration date

3 years after production

#### Storage

This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

## Isolation Gown

### Isolation Gown - TYPE A

Isolation gowns - type A Specifications: 120cm×120cm

**Material** 100% Non-woven fabric**Product description** Non-woven fabrics are usually used as the main raw materials, which are made by cutting and sewing. Non-sterile, single-use.**Expiration date** 3 years after production**Storage** This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

## Isolation Gown

- Good air permeability
- Strong barrier performance
- Non-sterile
- Do not reuse

### Isolation Gown - TYPE B

Isolation gowns - type B Specifications: One-size-fits-all

**Material** 100% Non-woven fabric**Product description** Non-woven fabrics are usually used as the main raw materials, which are made by cutting and sewing. Non-sterile, single-use.**Expiration date** 3 years after production**Storage** This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

## Medical Disposable Protective Clothing

### Executive Standard: GB 19082-2009 EN 14126:2003

Specifications: One-piece Sizes: □ 160 □ 165 □ 170 □ 175 □ 180 □ 185

#### Raw materials of Components:

Items No.	Components	Raw materials
1	Fabrics	PP+PE (Polypropylene + polyethylene breathable membrane) composite material
2	Rubber strip	EVA low temperature glue, polymer basic cloth

**Intended use:** It is used to provide barrier and protection for the potentially infectious patients' blood, body fluids, secretions, etc. that clinical medical personnel come into contact with at work. It cannot be used to isolate places with strict microbiological index control requirements such as intensive care unit (room).

**Expiration date** 2 years after production

**Storage:** Store at room temperature, in non-corrosive gas, dry, avoid the sunlight, good ventilation, clean environment, away from fire.

## Surgical Gowns

### BS EN 13795-1:2019

Model: □S □M □L □XL □XXL □XXXL □XXXXL

Specifications: □High performance type □Standard type

<b>Material</b>	100% Non-woven fabric
<b>Intended use</b>	For the surgical staff to wear, reduce the source of infection to the patient's surgical wound to prevent postoperative wound infection.
<b>Expiration date</b>	3 years after production
<b>Storage</b>	Store in an environment with relative humidity not exceeding 80%, no corrosive gas, cool, dry, well ventilated and clean.

## Medical Isolation Shoe Cover

size: ☐Long ☐Short    Style: ☐Non-woven fabric ☐PVC ☐PP+PE

<b>Product description</b>	Made of suitable materials, with sufficient strength and barrier properties. Non sterile.
<b>Expiration date</b>	3 years after production
<b>Storage</b>	Store in an environment with relative humidity not exceeding 80%, no corrosive gas, cool, dry, well ventilated and clean.
Medical isolation shoe cover	Long-style / Short-style    Blue / White    FZ/T64005-2011

## Medical Cap

**Model specifications** Round cap.  $\phi$ 25.5cm FZ/T64005-2011

**Product description** Non-woven fabric is usually used as the main raw material, which is made by cutting and sewing. Non-sterile, single-use.

**Material** ☐Non-woven fabric ☐PP+PE

**Colour** Blue

**Storage** This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

## Medical Scrubs Uniforms

**Model:** type A: split type; type B: gown type.

**Specifications** ☐S ☐M ☐L ☐XL ☐XXL

**Product Description** Usually made of cotton fiber or non-woven fabric. The medical scrubs uniforms is short-sleeve or long-sleeve style that have the function of blocking dandruff, and do not have liquid barrier properties. It is non-sterile supply and can be reused. It should be sterilized before using.

**Expiration date** 3 years after production

**Storage** The product should be stored in a clean warehouse without corrosive gas, well ventilated, cool and dry.

## Medical Bed Sheet

**Materials:** 70% Polypropylene, 30% Polyethylene non-woven fabric

<b>Product description</b>	It is made by compounding or sewing non-woven fabric and plastic film. Non-sterile, single use.
<b>Expiration date</b>	3 years after production
<b>Storage</b>	This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

## Disposable Virus Specimen Collection Tube

Disposable sampler

**Model:** Inactivated and non-inactivated

<b>Product description</b>	Disposable virus specimen collection tube is composed of swabs and/or collection cups and tubes containing storage solution. Non-sterile.
<b>Expiration date</b>	12 months
<b>Storage</b>	The product should be stored in a non-corrosive gas and well-ventilated warehouse at room temperature.

### Medical examination gloves

### Medical rubber gloves

**Model/Specification:** According to the different materials used, it is divided into: polyvinyl chloride, butyronitrile; according to the size, it is divided into: XS, S, M, L, XL.  
**Product Description:** Usually made of materials such as polyvinyl chloride. Have sufficient strength and barrier properties. Non-sterile supply, single use.  
**Intended use:** It will be wore by doctor to do checking for the patients or lab testing.

**Model/Specification:** XS, S, M, L, XL.  
**Product Description:** Usually made of materials such as polyvinyl chloride and rubber. Have sufficient strength and barrier properties. Non-sterile supply, single use.  
**Intended use:** It will be wore by doctor to do checking for the patients or lab testing.

## Orthopedic Casting Tape

### USE INSTRUCTION

- Apply 1-2 layers stockinet over the affected body part;
- Wear surgical gloves;
- Choose proper size orthopedic casting tape, then open the package;
- Immerse the casting tape in normal temperature (20°C~30°C) water for 5~6 seconds and squeeze 2~3 times. Then remove from the water and squeeze out the excess water. The curing time of orthopedic casting tape is directly related to the temperature of water. The curing time is shorter in high temperature water than in low temperature water. If the water temperature is over 27°C, the curing time is too short to increase the difficulty of the operation.
- Wrap the casting tape spirally around the affected body part, overlapping the previous layer by one-half or two-thirds the width of the tape. The tension is moderate. If it is too loose, it will weaken the adhesion of the orthopedic casting tape. If it is too tight, it will affect the blood circulation.
- The intensity of the casting tape is related to the number of overlapped layers. Overlap 3-4 layers for the non-weight bearing parts, while overlap 5-6 layers for the weight bearing parts. If more layers are needed, please ensure the adhesivity between the layers.
- To increase the adhesion between layers, the casting tape will be shaped after wrapped. The operating time should be in 3-5 minutes. The adhesion and shaping effect cannot reach the best if the operating time is longer or the immersed time is too long. The patients do not allow to move freely in 10 minutes before the orthopedic casting tape are completely hardened.
- The electric plaster saw is needed if the affected parts need to open a window or remove the orthopedic casting tape.

Orthopedic Casting Tape				
Product Description	Sizes	Specification(W×L)	Packaging	Operating Part
Fiberglass Orthopedic Casting Tape	RT002	5.0cm × 360cm	10bags/box 12boxes/ctn	Wrist/Childrens
Fiberglass Orthopedic Casting Tape	RT003	7.5cm × 360cm	10bags/box 12boxes/ctn	Arms
Fiberglass Orthopedic Casting Tape	RT004	10.0cm × 360cm	10bags/box 12boxes/ctn	Arms / Legs
Fiberglass Orthopedic Casting Tape	RT005	12.5cm × 360cm	10bags/box 9boxes/ctn	Legs
Fiberglass Orthopedic Casting Tape	RT006	15.0cm × 360cm	10bags/box 9boxes/ctn	Legs

## Polymer Splint

Wrist Fixation

Recommended sizes:  
312 (7.5cmX30cm)  
415 (10cmX40cm)

Thumb Fixation

Recommended sizes:  
312 (7.5cmX30cm)  
415 (10cmX40cm)

The fourth and fifth Finger Fixation

Recommended sizes:  
312 (7.5cmX30cm)  
415 (10cmX40cm)

Elbow Fixation

Recommended sizes:  
312 (7.5cmX30cm)
