

Specifications of the **Double Cab 4x4 car**

The specifications are an integral part of the award documentation for the supply contract for " **4x4 passenger car** ", the purpose of which is to establish the essential elements/conditions that will govern **the supply contract** and constitute the set of requirements based on which each bidder develops the technical proposal.

1. GENERAL REQUIREMENTS

A multifunctional all-wheel drive vehicle, intended for operational interventions and mobile headquarters, based on a frame chassis, capable of transporting both passengers and cargo weighing approximately 800 - 1000 kg on paved roads, as well as on rough roads. The vehicle must comply with the regulations in force for circulation on national and international roads.

1.1 Rules and standard

1.1.1 The fully equipped prototype of the vehicle will undergo, before the first delivery, a verification program drawn up by specialists from the General Inspectorate for Emergency Situations and those of the supplier, in order to determine whether the transport unit (including equipment) meets the technical-tactical performances of this technical specification.

1.1.2 The delivered vehicle will comply with the provisions of the Decision of the Government of the Republic of Moldova No. 357 of 13.05.2009 on the approval of the Road Traffic Regulations with subsequent amendments and supplements;

1.1.3 The delivered vehicle will comply with the requirements of this Specification.

1.1.4 We mention that the car will circulate both in the territory of the Republic of Moldova and in the countries of the European Union and must ensure the minimum requirements for circulation on public roads in these regions, possibly complying with the provisions of Directive 2007/46/EC which establishes the safety and environmental requirements that motor vehicles must comply with before being introduced on the EU market.
