KAPSELSPANNRINGE

MORCHER® Kapselspannringe sind aus einem Stück PMMA gefertigt und stabilisieren die Kapsel bei beschädigten oder fehlenden Zonulafasern.

CAPSULAR TENSION RINGS

MORCHER® Capsular Tension Rings are manufactured from one-piece PMMA and stabilize the capsule in cases of damaged or missing zonules.

VORTEILE

- zirkuläre Ausdehnung des Kapselsacks
- Stabilisierung des Kapselsacks
- bei kleineren Zonulaschäden ist keine Sklerafixation notwendig
- verringert das Risiko von Kapsel- oder Zonulabeschädigungen während der OP
- bessere Zentrierung der IOL, auch bei späterer Kapselsackschrumpfung
- vereinfacht die Implantation von faltbaren IOLs

ADVANTAGES

- circular expansion of the capsular bag
- stabilization of the capsular bag
- with small zonula damages, no scleral fixation is necessary
- reduces the risk of damaging the capsule or zonules during surgery
- better centering of the IOL, also in cases of future capsular bag shrinkage
- simplifies the implantation of foldable IOLs
