## TECHNICAL DESCRIPTION

### Play board labirinth Nr.1

The play board will be designed to support children's logic and development.

- Learning through play: maze The children's play panel will be made of durable, multi-layer, weather-resistant HDPE plastic. The poles will be made of metal pipes, with a section of 70x70 mm, kept at a distance of 730 mm. Between the two spacers, a HDPE plastic play board will be provided. - Materials:

- HDPE high-density polyethylene, anti-graffiti, maintenance-free.
- Metal pipes covered with powder paint
- All connections are covered with special anti-vandal covers

**Panel dimensions:** length - 730 mm, height - 730 mm.

**The general dimensions of the structure:** length - 740mm, width - 80mm, height - 1200mm.

**The foundation of the construction will have dimensions of**

LxWxH=400x400x500 mm.

**Requirements for installation:** To ensure safe and reliable operation, all supporting elements are to be deepened into the soil (earth) to 0.70m to increase rigidity, then following the concreting process (concrete BC 300). The assembly of the elements must exclude the possibility of their disassembly, without the use of specially designed tools.
