

pH, EC and DO Meter

A lightweight and versatile meter that can be used in portable, wall-mount and benchtop configurations

edge[®] ph·ec·do

The world's most innovative pH, EC and DO meter

edge[®] is thin and lightweight, measuring just 1/2" (12 mm) thick and weighing less than 9 ounces (250 g). edge[®] has an incredibly wide viewing angle, 5.5" (14 cm) LCD and a sensitive capacitive touch keypad.

Digital electrodes

edge[®] measures pH, conductivity and dissolved oxygen through its unique digital electrodes. These digital electrodes are autorecognized, providing sensor type, calibration data and a serial number when connected to edge[®] by an easy to plug-in 3.5mm connector.

edge® features Hanna's exclusive pH CAL Check™ to warn you if the electrode in use is not clean or if your buffers are contaminated during calibration. We have added Sensor Check™ for pH sensors with a matching pin. Our Sensor Check™ feature warns you if the pH bulb is cracked and/or the junction of the electrode is compromised.

LCI CONTRAS

• Two USB ports

edge® includes one standard USB for exporting data to a flash drive. edge® also includes one micro USB port for exporting files to your computer as well as charging edge® when the cradle is not available.

Clear, full text readout edge® features clear, full text guides displayed on the bottom of the screen. There is no need to decipher scrambled abbreviations or symbols; these helpful messages guide you through every process quickly and easily.

Data logging

edge® allows you to store up to 1000 log records of data. Logging data sets include readings, GLP data, date and time.

Data from the last calibration you perform is stored in the sensor including the date, time and standards. When any sensor (pH, EC, or DO) is connected to edge®, GLP data is automatically transferred.

Basic mode

You can use edge® in basic mode-ideal for routine measurements by displaying a simplified screen and features.

CAL Check[™]

(edge® pH measurement only) edge® features Hanna's exclusive CAL Check™ technology to warn you if the electrode bulb is not clean or if the buffers are contaminated during calibration.

edge® design features

• Capacitive touch keypad

edge® features a capacitive touch keypad that gives a distinctive, modern look. Since the keypad is part of the screen, your buttons can never get clogged with sample residue.

Easy to read LCD •

edge® features a 5.5" (14 cm) LCD display that you can clearly view from over 5 m (16.4'). The large display, with its wide 150° viewing angle, provides one of the easiest to read LCDs in the industry.

Zero footprint

Using the wall mount cradle (included), edge® can be placed on a wall, leaving zero footprint on the benchtop space. The cradle has a built-in connector to power edge® and charge its batteries.

• 3.5 mm probe Input

Plugging an electrode in has never been simpler; no alignments or broken pins, simply connect the 3.5 mm plug and begin. Digital electrodes are automatically recognized.

• Sleek design Incredibly thin and lightweight, edge® measures just 1/2" (12 mm) thick and weighs just 8.8 ounces (250 g).

Accepts pH, EC and DO edge® compatible probes
