

## Flexible range of medical-graded carts for clinical and research purposes

- ▶ Wide range of carts for any operator needs
- ▶ Compact and ergonomic design
- ▶ Compatible with most COSMED devices
- ▶ Electrified and non-electrified configurations
- ▶ Multiple supports, including shelves, PC, monitor and cylinder holders
- ▶ Quick and effective cleaning

COSMED features a wide range of medical carts to ensure that any configuration needs are met.

The ergonomic design, the high sliding wheels with locking system and the multiple supports and add-ons are conceived to aid the operator in the daily routine, from quick and effective cleaning to an easy transportation of devices and accessories.

Carts with built-in isolation transformer are provided with an electrified supporting column, representing the best solution to ensure high performance with no loss of functionality. Depending on the model, different shelves, cylinder holders, drawer and supports are included.

The latest X3 and X3+ generation represents the best choice of configurable medical carts whenever floor space is an issue, being compact, ergonomic and adjustable. Whether they are configured with an isolation transformer or in non-electrified setups, X3 and X3+ can be customized with many add-ons to meet any operator need.

All carts are compatible with most COSMED devices, including Quark Series, K5, Q-NRG and BOD POD GS-X.
