

Certificate of Analysis: Lyophilized Microorganism Specification and Performance Upon Release

SPECIFICATIONS: Product Name: Rhodococcus equi Catalog Number: 0697 Lot Number: 697-90** Reference Number: ATCC® 6939™* Passage from Reference: 3 Expiration Date: 2026/01/31	RELEASE INFORMATION: Quality Control Technologist: Mariah H Smith Release Date: 2024/02/29
--	---

Performance	
Macroscopic Features: Small to medium, circular, convex, entire edge, cream to white and turning pale peach as culture ages, glistening, mucoid and smooth. Colonies are weakly beta hemolytic and zones may increase to varying sizes as culture ages.	Medium: SBAP
Microscopic Features: Gram positive, rod to coccus, elementary branching may be observed at early stages of growth.	Method: Gram Stain (1)

ID System: MALDI-TOF (1)
See attached ID System results document.

Other Features/ Challenges: Results (1) Catalase (3% Hydrogen Peroxide): positive Urea slant: positive	 Amanda Kuperus Director of Quality Control AUTHORIZED SIGNATURE

Meaning of Score Values

Range	Interpretation	Symbols	Color
2.00 – 3.00	High-confidence identification	(+++)	Green
1.70 – 1.99	Low-confidence identification	(+)	Yellow
0.00 – 1.69	No Organism Identification Possible	(-)	Red

Meaning of Consistency Categories (A - C)

Category	Interpretation
(A)	High consistency: The best match is a high-confidence identification. The second-best match is (1) a highconfidence identification in which the species is identical to the best match, (2) a low-confidence identification in which the species or genus is identical to the best match, or (3) a non-identification.
(B)	Low consistency: The requirements for high consistency are not met. The best match is a high- or low-confidence identification. The second-best match is (1) a high- or low-confidence identification in which genus is identical to the best match or (2) a non-identification.
(C)	No consistency: The requirements for high or low consistency are not met.
