Slit Angled 3.0mm (Short-Head)	MSL30SH

Comparison with  
conventional knives

### ★Extreme Sharpness, Simple Operation, High Visibility

Position of Knife Angle moved 2mm towards the tip and the blade became smaller with extreme sharpness as our conventional models. Effective for a patient who has sunken/deep-set eye (enophthalmos) or narrow lid fissure.

Less possibility of contacting with eye speculum and drapes. In addition, marking lines at 1.5mm and 2.0mm from the blade tip enable simple operation for creating tunnel.

※MSL20~24SH= (8mm→6mm) MSL25~30SH= (9mm→7mm)

### ★Example of use of the marking lines

Corneal Incision

Scleral Incision

Perforation towards anterior chamber  
using the marking lines as an indicator.

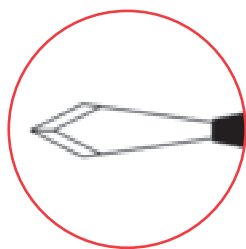

The crosslapped edge made of MANI®'s original hard fiber stainless steel produces the ultimate sharpness.

## ■ Safety Slit Knife

Angle = 45°

## ■ Arched Knife Angle = 45°

6pcs/box

○Main Application: Corneal Incision

MSL-AB

Actual size

	Product Name (Blade Sizes)	ORDER#
	Slit Angled 1.8mm Arched (A 1.8mm W 1.7mm H 0.3mm)	MSL18AB
	Slit Angled 2.0mm Arched (A 2.0mm W 1.85mm H 0.35mm)	MSL20AB
	Slit Angled 2.2mm Arched (A 2.2mm W 2.05mm H 0.35mm)	MSL22AB
NEW	Slit Angled 2.3mm Arched (A 2.3mm W 2.2mm H 0.35mm)	MSL23AB
	Slit Angled 2.5mm Arched (A 2.5mm W 2.4mm H 0.35mm)	MSL25AB
	Slit Angled 2.65mm Arched (A 2.65mm W 2.5mm H 0.35mm)	MSL26AB
	Slit Angled 2.8mm Arched (A 2.8mm W 2.6mm H 0.4mm)	MSL28AB
NEW	Slit Angled 2.9mm Arched (A 2.9mm W 2.7mm H 0.45mm)	MSL29AB
	Slit Angled 3.0mm Arched (A 3.0mm W 2.8mm H 0.45mm)	MSL30AB
	Slit Angled 3.2mm Arched (A 3.2mm W 3.0mm H 0.55mm)	MSL32AB
	Slit Angled 3.4mm Arched (A 3.4mm W 3.2mm H 0.55mm)	MSL34AB

※Better self-closing incision. Low risk of infection.

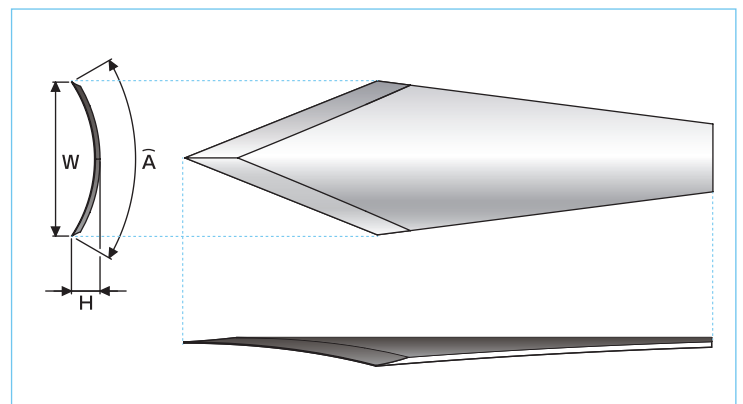

★Arched Knife is a slit knife designed for clear corneal incision with IOL injector system.

Please refer to the width in order to find your best size.

If you are using MSL24 (2.4mm) now, MSL25AB should be the correct choice as its width (W) is 2.4mm.

The incision location is different from that of normal "flat" knife because the arched knife has a three-dimensional blade.

Please make sure that your Phaco tip and Injector fit properly with the arched knife you chose. We recommend to try the compatibility between the arched knife & your Injector at a wet lab in order to find the right size from our line-up.

IT IS UNABLE TO MAKE THE WOUND WIDER AFTER THE INCISION  
BECAUSE OF INCISION SHAPE.

Please read Instruction for Use carefully before use.

The crosslapped edge made of MANI®'s original hard fiber stainless steel produces the ultimate sharpness.

## Side Port Knife

6pcs/box

○Main Application: Side port

**NEW**

MSP

Actual size

Product Name	ORDER#
Side Port 1.0mm Angled 45°	MSP10
Side Port 1.0mm Angled 30°	MSP10L

## ★Features of Side Port Knife

### -Width

### -Angle

### -Head Length

- ▣ Designed to deliver exceptional precision 1.0mm side port incision.
- ▣ 2 Choices; 30 or 45 degree depend on condition of your patient and your preference.
- ▣ Excellent controllability with shorter(3.5mm) head length.  
Effective for patients who have sunken/deep-set eye(enophthalmos) or narrow lid fissure.
- ▣ Stress-free incision with ultimate sharpness!

# Ultimate Sharpness

## MANI® Ophthalmic Knife

General image of Bevel

### Bevel Shape (patented)

MANI® original bevel shape is applied for the knives. By polishing the blade slightly from the back side, the shape provides excellent sharpness, better usability and better stability on trajectory.

MANI® crosslapped edge

### Crosslapped Edge

MANI®'s fine-processing technique has created the crosslapped edge, which provides excellent sharpness and consistent quality. (Crosslapped edge: polishing direction is vertical of the edge)

The edge and Bevel generate "Ultimate Sharpness"

### Color-Coded Handles Allow Easy Identification

The color is different depending on the tip shape.

### Non-Glare Treatment (patented)

To maintain the sharpness, Non-Glare treatment was processed on knives except its edge and back side.

### Stainless Steel Superior In Safety

Structure of MANI® hard fiber stainless steel

Structure of common stainless steel

MANI®'s original hard fiber stainless steel (austenite stainless steel) provides reliable strength on the tip and ensure thin but solid edge. (Edge thickness of MANI® slit and crescent knife: 0.14mm)

MANI® slit knife - front side (Non-Glare)

MANI® slit knife - back side (without Non-Glare)
