This letter serves as confirmation that Chem-Crete concrete and asphalt protection systems products are **used in airport environments** internationally.

These products have been applied on airport infrastructure such as **runways, taxiways, aprons, and adjacent airside concrete areas**, where resistance to **water ingress, freeze-thaw exposure, de-icing chemicals, and operational wear** is required.

We provide a **project reference list** (location, year, scope, and product used) for selected airport-related applications, subject to client confidentiality and approval.
