

Genetec Inc.

Genetec Security Center with Synergis (TM) Cloud Link

Category: CAPSS Approved

Standard Tested To: CAPSS 2023

Description

Genetec Security Center is a unified and open-architecture Security Management platform comprising Video Management, Automated Access Control and other physical security systems including Intrusion Detection, Intercoms and Automatic Number-Plate Recognition. Security Center is used to configure, monitor, and control 3rd party security systems and devices such as surveillance cameras and door controllers within a single user interface. Synergis (TM) Cloud Link is an intelligent PoE-enabled IoT gateway which provides native support for popular non-proprietary security modules such as third-party door control hardware and electronic locks.

Manufacturer

Manufacturer Name:	Genetec Inc.
Post Code:	EC2V 5AY
Address Line 1:	90 Basinghall Street
State/County:	London
Website:	http://www.genetec.com
Email:	capssuk@genetec.com

Specification

Note: Core components form the “assured product”. Peripheral components are products utilised during an evaluation to demonstrate functionality and security of the assured product. Peripheral components are not classed as part of the assured product unless specifically stated.

Core Components (The assured product)

- Genetec Security Center (from version 5.11.3)
- Synergis™ Cloud Link (from Firmware 3)

Peripheral Components (products utilised to facilitate the evaluation of the assured product)

- Genetec Streamvault appliance
- Mercury panel (LP1502)
- STid Access Control Door Reader

- STid with USB Enrolment Reader
- Axis IP camera (M3085-V)

Additional Notes: The system must be configured in accordance with the recommendations contained in the Genetec Security Center Hardening Guide and CAPSS Deployment Guide.
