### LUMIO LED FLOOD LIGHT 150W TECHNICAL DATA

|                 |                           |                                          |
|-----------------|---------------------------|------------------------------------------|
| Lamp Power(W):  |                           | 150W                                     |
| SPECIFICATION   | Lamp Luminous (Lumen)     | 11250lm                                  |
|                 | Lumen / watt:             | 75lm/w                                   |
|                 | LED Chip:                 | San'an                                   |
|                 | Color Temperature:        | 6500K                                    |
|                 | Beam Angle(°):            | 120°                                     |
|                 | CRI (Ra>):                | >70                                      |
|                 | Warming node of the led:  | ≤70°C                                    |
|                 | Light distribution curve: | Similar the batwing/rectangle light spot |
| Product details | Product Name:             | LED FLOOD LIGHT                          |
|                 | Model:                    | LM7075                                   |
|                 | Driver:                   | Linear IC DOB                            |
|                 | Power Factor(PF):         | PF>0.97                                  |
|                 | Power Efficiency:         | >92%                                     |
|                 | Voltage:                  | AC 190-265V                              |
|                 | Power supply:             | Via wiring                               |
|                 | Power:                    | 75%                                      |
|                 | Material:                 | Aluminium                                |
|                 | Color:                    | Black                                    |
|                 | Protection Level:         | IP66 waterproof                          |
|                 | Working Temperature:      | -35~+65°C                                |
|                 | Ambient Humidity:         | 10%~90% R.H.                             |
|                 | Certification:            | CE, RoHS                                 |
|                 | Working Lifetime(H):      | 50000                                    |
|                 | Warranty(Year):           | 2 Years                                  |

|                    |                              |                |
|--------------------|------------------------------|----------------|
| Size and packaging | Product Size (cm) (L*W*H):   | 34*4.2*24.5cm  |
|                    | Individual Pack Weight (kg): | 1,6kg          |
|                    | Case Pack:                   | 10pcs/carton   |
|                    | Master Carton (cm) (L*W*H):  | 49,5 *24 *36cm |
