

ITEM NAME: PP + PE NON-BREATHABLE FILM (BLUE COATING)

DESCRIPTION:

Produced using 100% polypropylene and Polyethylene laminated with hotmelt.

USES - APPLICATIONS

1 (It is used in products like tablecloths, covers, sterilization paper, drapes, shoe covers for companies that manufacture sets).
2 -Insulated Cover (It is used for heat, water, insulation in places that require roofs and ventilation.)
3 (Laminated products are used as waterproof SPA centres, examination tables, diapers)
4 (It is used for products like bags and dress boxes for organization of wardrobes.)
5 (Used in seat and car covers.)
6 Textiles (It is used for products like tablecloths, sets, and appliance covers.)

SPECIAL PROPERTIES:

- Applicable colour requested
- PP layer can be hydrophilic or hydrophobic
- Weight of layers according to request
- Width of lamination by request
- Softness of material according to request

SHELF-LIFE & STORAGE CONDITIONS :

- Suitable for use up to 5 years from the date of production maintaining correct storage conditions. Details are available on request.

Properties	Test Method	Target values	Unit
Weight in grams	Analytical Balance	(50 \pm 5 %)	gr/m ²
Modulus at Break	Edana (By Zwick)	MD(45-65)-CD(45-75) (\pm 10%)	%
Tensile strength at Break	Edana (By Zwick)	MD(40)-CD(30) (\pm 10%)	N
Width	By Meter	160 (+/-1)	cm
Length	By Meter	According to Customer Request (+/-5)	m

All the data provided in this datasheet are consistent with the current state of our knowledge and are intended to provide general information on their applications. They do not constitute a guarantee of any specific applications. We guarantee the properties of these products only within the Sales Contract. The processor is not released from his obligation to verify the incoming goods or to test and examine the products to ensure they are suitable for the intended purpose. This material specification is for information only and may be subject to change without further notice.
