

*silicone internal
nasal splint*

Silicone Internal Nasal Splint

Integral airway allows nasal breathing postoperatively.

Medical grade silicone for ease of insertion, removal, and increased patient comfort.

Hole in anterior tip allows suturing through septum to aid in stabilization and eliminates posterior dislodgement.

* 100% medical grade silicone for ease of insertion and removal
* Provided sterile, ready to use

with airway

- › Soft medical-grade silicone
- › Funnel-shaped airway design
- › Designed to increase airflow
- › Designed to minimize blockage
- › Designed to support nasal septal structure

without airway

- › Soft medical-grade silicone
- › Pre-cut anatomical shape
- › Suture indicators for easier suture placement

1. with airway (item no: #7600361-A)
2. without airway (item no: #7600361-N)
