Manual crimping tools, advanced ergonomic version

Leverancier: MACHEREY-NAGEL

These manual crimping tools with ergonomically designed handles are more lightweighted than complete steel crimpers.

Ergonomic crimpers:

- Adjustable knob on the crimping head that is easily accessible and visible
- Activated by bottom handle motion only which allows a steadier and safer hold of the tool during crimping
- Crimping head design and alignment makes better vertical clearance over the vial

Ergonomic decappers:

- Allow safe removal of caps
- No adjustment required

Order
