

### Description

The Assurance Plus Service and Technology Program provides comprehensive and extended service coverage beyond the initial 12-month warranty for St. Jude Medical™ capital equipment. Staying current with this program will help ensure that you maximize your capital equipment investment throughout the life of each product.

We provide you with the option to select coverage for specific pieces of equipment or design a comprehensive plan that covers all your St. Jude Medical capital equipment. Plans are available in one-, two-, or three-year terms.

### Product Highlights

- Software revisions and software upgrades are included as part of your Assurance Plus Service and Technology Program. Any software release defined as a new software expansion module is not included and must be purchased separately.
- Response for customers with St. Jude Medical capital equipment covered under this program are as follows:
  - Telephone response from St. Jude Medical Technical Support.
  - If required, overnight shipment of replacement parts.
  - If needed, a site visit by a St. Jude Medical Service Technician.
- Service level varies by program tier and geography. Response time is not guaranteed for capital equipment not covered under this program.
