KX410 医用干式胶片

适用经过计算机处理后以数字方式存贮的医疗影像的热敏打印输出

特点与用途

本产品以蓝色聚酯片基为支持体，双面分别涂布成像层和保护层。本胶片适用经过计算机处理后以数字方式存贮的医疗影像的热敏打印输出，可以真实再现经过处理的各种医疗影像，省去了传统产品显定影冲洗加工程序，彻底消除了冲洗加工废药液对环境的污染。本胶片可以在明室条件下操作，具有灰雾小、清晰度高、大密度高、色调明快、使用方便的特点，可以直接用于市场上的热敏打印机的输出。

Product

Lucky dry film KX410 uses blue PET substrate with imaging and protective layers coated separately on both sides. The film is compatible with thermal printer to print digital image, which is processed and stored in computer, to get various medical images. Compared to traditional processing, the procedure is more convenient and the speed of processing is faster. Meanwhile, it's environmentally friendly because the whole procedure is free of chemicals. Dry film is compatible with thermal printer in light with features of low fog, high resolution and density, and bright tone.
