~ Asymmetric tread pattern

Asymmetric tread pattern design and functionally differentiated in medial and lateral sidewall improve steering performance in wet road conditions, and ensure high-speed stability.

~ Silicon-containing tread compound

New Silicon-containing tread compound enhance grip in wet road conditions and reduce rolling resistance.

~ Low-noise design

Creative tread grooves' fine lines design effectively reduce noise at high-speed driving.

~ Anti-skip design

A mass of steel sheets and grooves design provide great grip ability and driving performance on wetland.
