FINISAREA INTERIOARA, DISPOZITII GENERALE

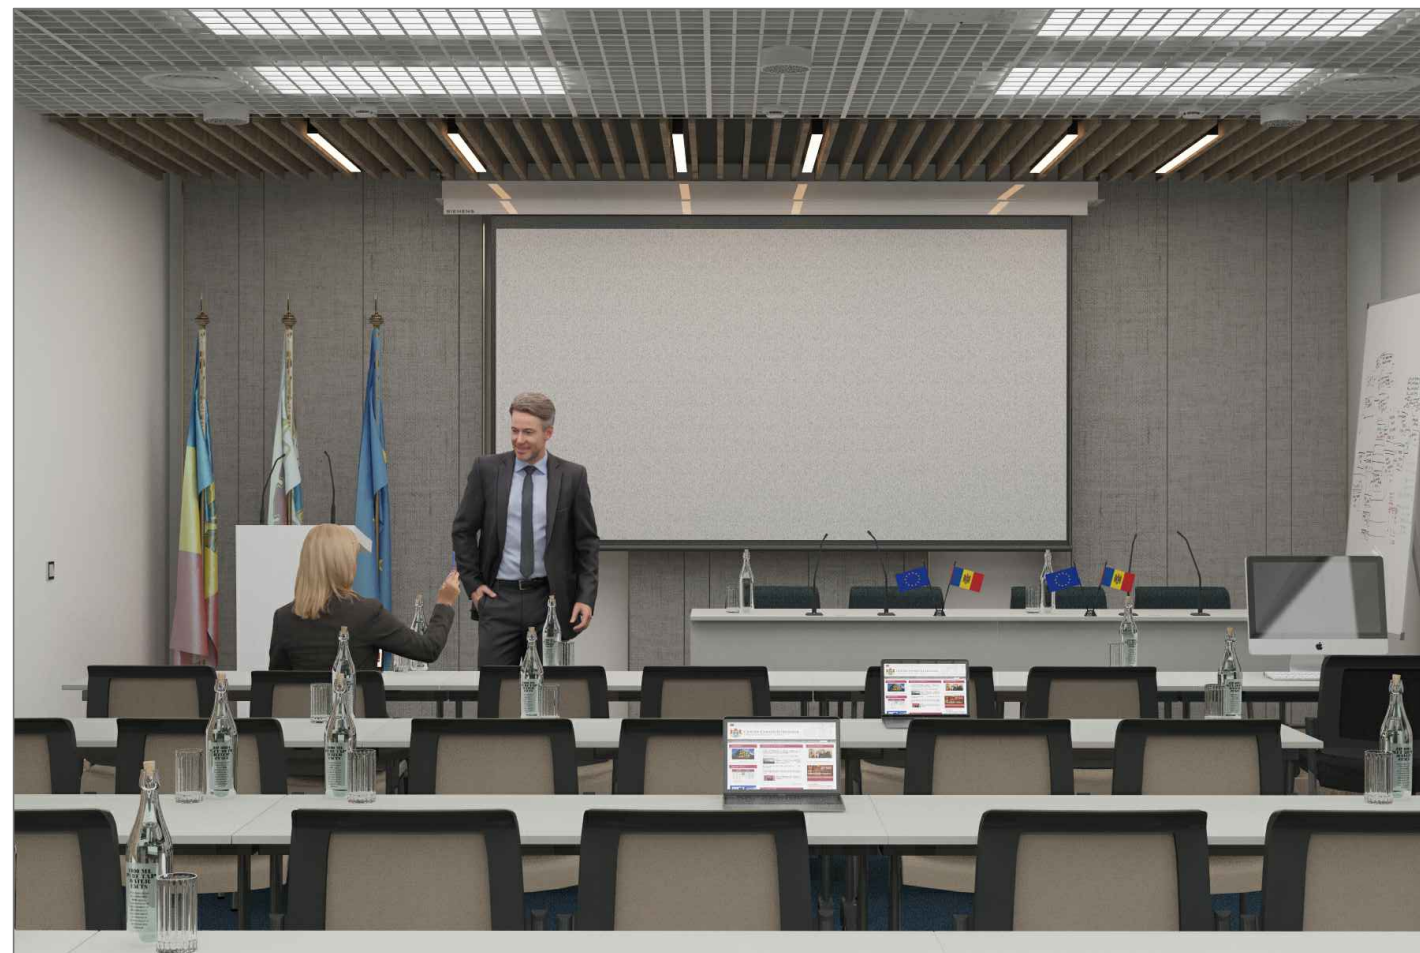

Tehnologia de executare a tencuielii depinde de tipul acestea. Tencuiala poate fi pe bază de ipsos sau ciment.
Pînă la executarea tencuielii se assemblează toate rețelele electrice, etc.
Suprafețele suport pentru tencuieli trebuie sa fie rigide, uscate, sa nu fie prăfuite si să nu aibă pete de grasime, murdărie.
De obicei tencuielile se compun din 3 straturi: 1) Amorsaj; 2) Grund; 3) Tinci.
Pentru obținerea unei tencuieli fără denivelări, înainte de aplicarea ei se vor monta repere din profil metalic, ele vor folosi pentru netezirea tencuielii cu ajutorul dreptarului.

Peretii interiori vor fi acoperiti cu 2 straturi de vopsea lavabila, rezistenta la uzura.

Montarea treptei presupune o constructie rigida, urmata de o placare cu venil sau Material UPM ProFi.

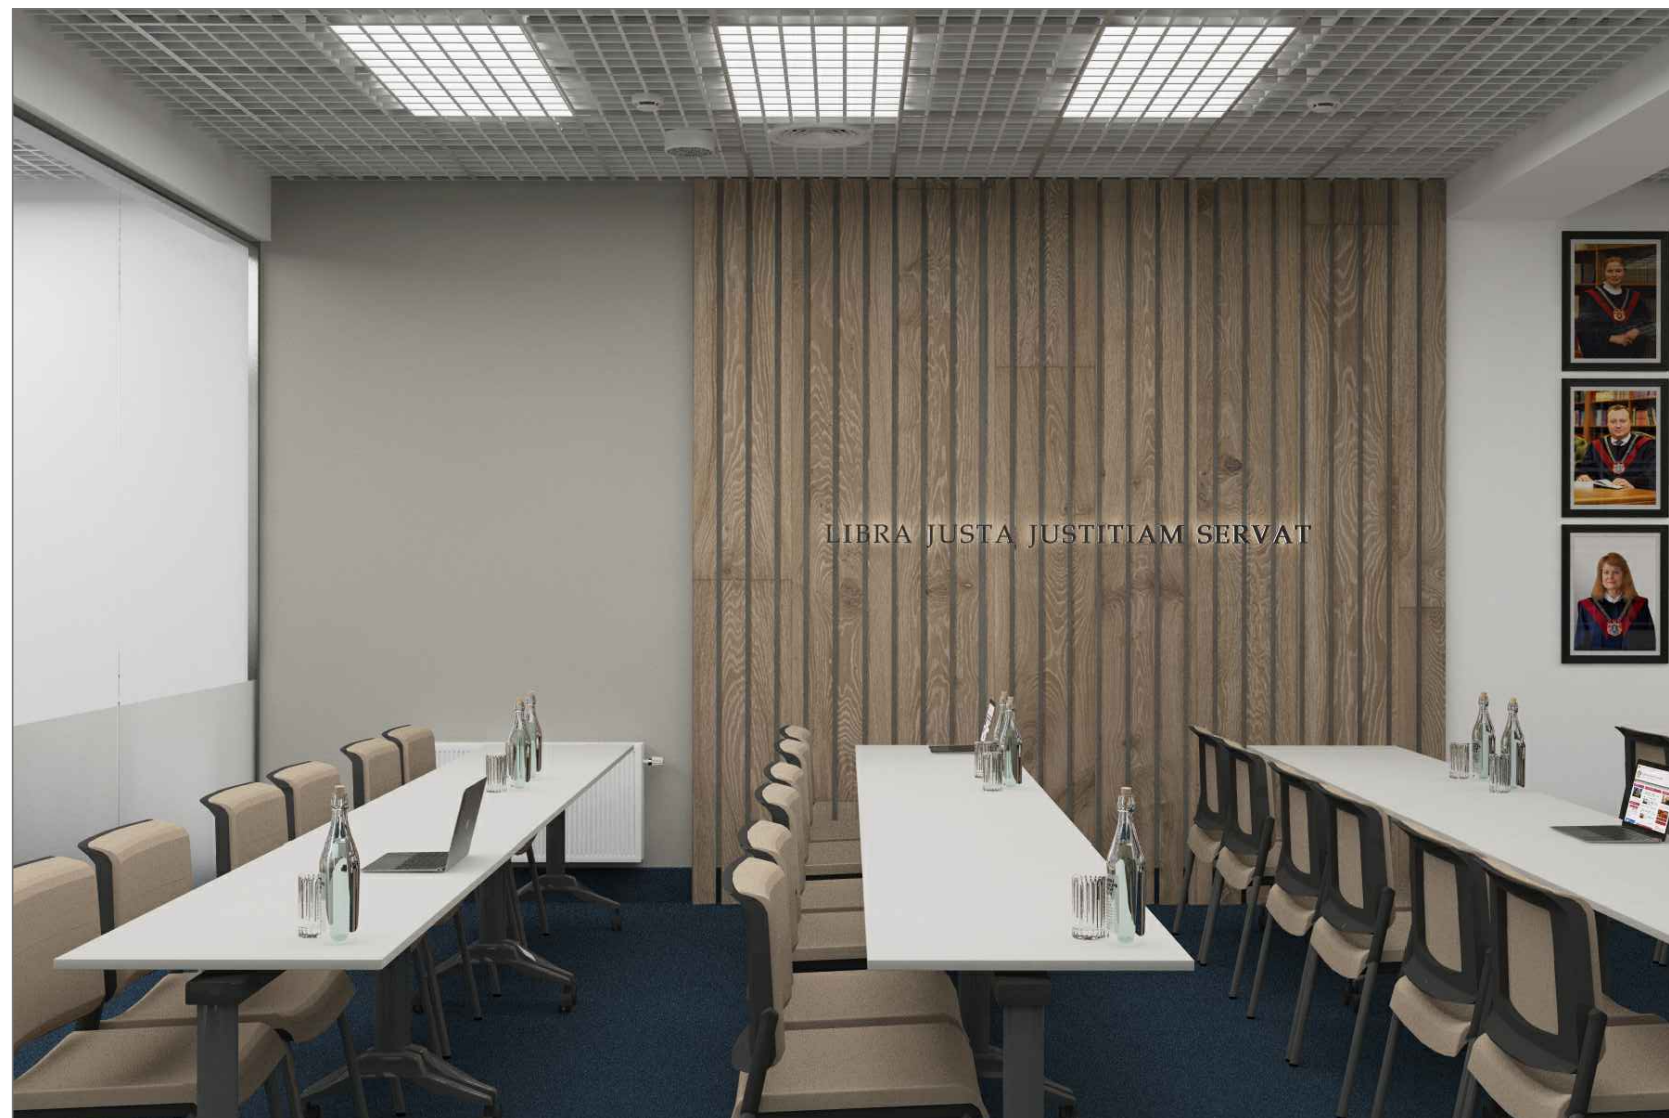

Tavanul va fi vopsit, urmat de montarea unui tavan suspendat.
