For each task There is a EUROCARGO.

VERSATILE

Eurocargo can operate anywhere, from urban environments to the most inaccessible off-road locations.

COMPLETE

The vehicle selection is extensive with over 11,000 vehicle combinations. A complete range for everyone.

DURABLE

Düz yüzeyli şasi, güç ve hafiflik sağlar.
The most robust choice for all tasks.

ADVANCED COMFORT ADVANCED EFFICIENCY

It maximizes comfort and efficiency with its new fully automatic ZF transmission.

CONNECTED

IVECO ON Connected Services, uptime and is designed to maximize your work efficiency.

External design.

Each eye-catching in the environment.

The exterior of the Eurocargo combines style with functionality. Standard LED daytime running lights (Xenon headlights as an option), radar for ADAS functions, steps for accessing the windscreen, grab handles and doors and mirrors that are kept clean even in adverse weather conditions. tutmak için tasarlanmış yan hava also has sector.

MLD – Double Cab Chassis

Step 1

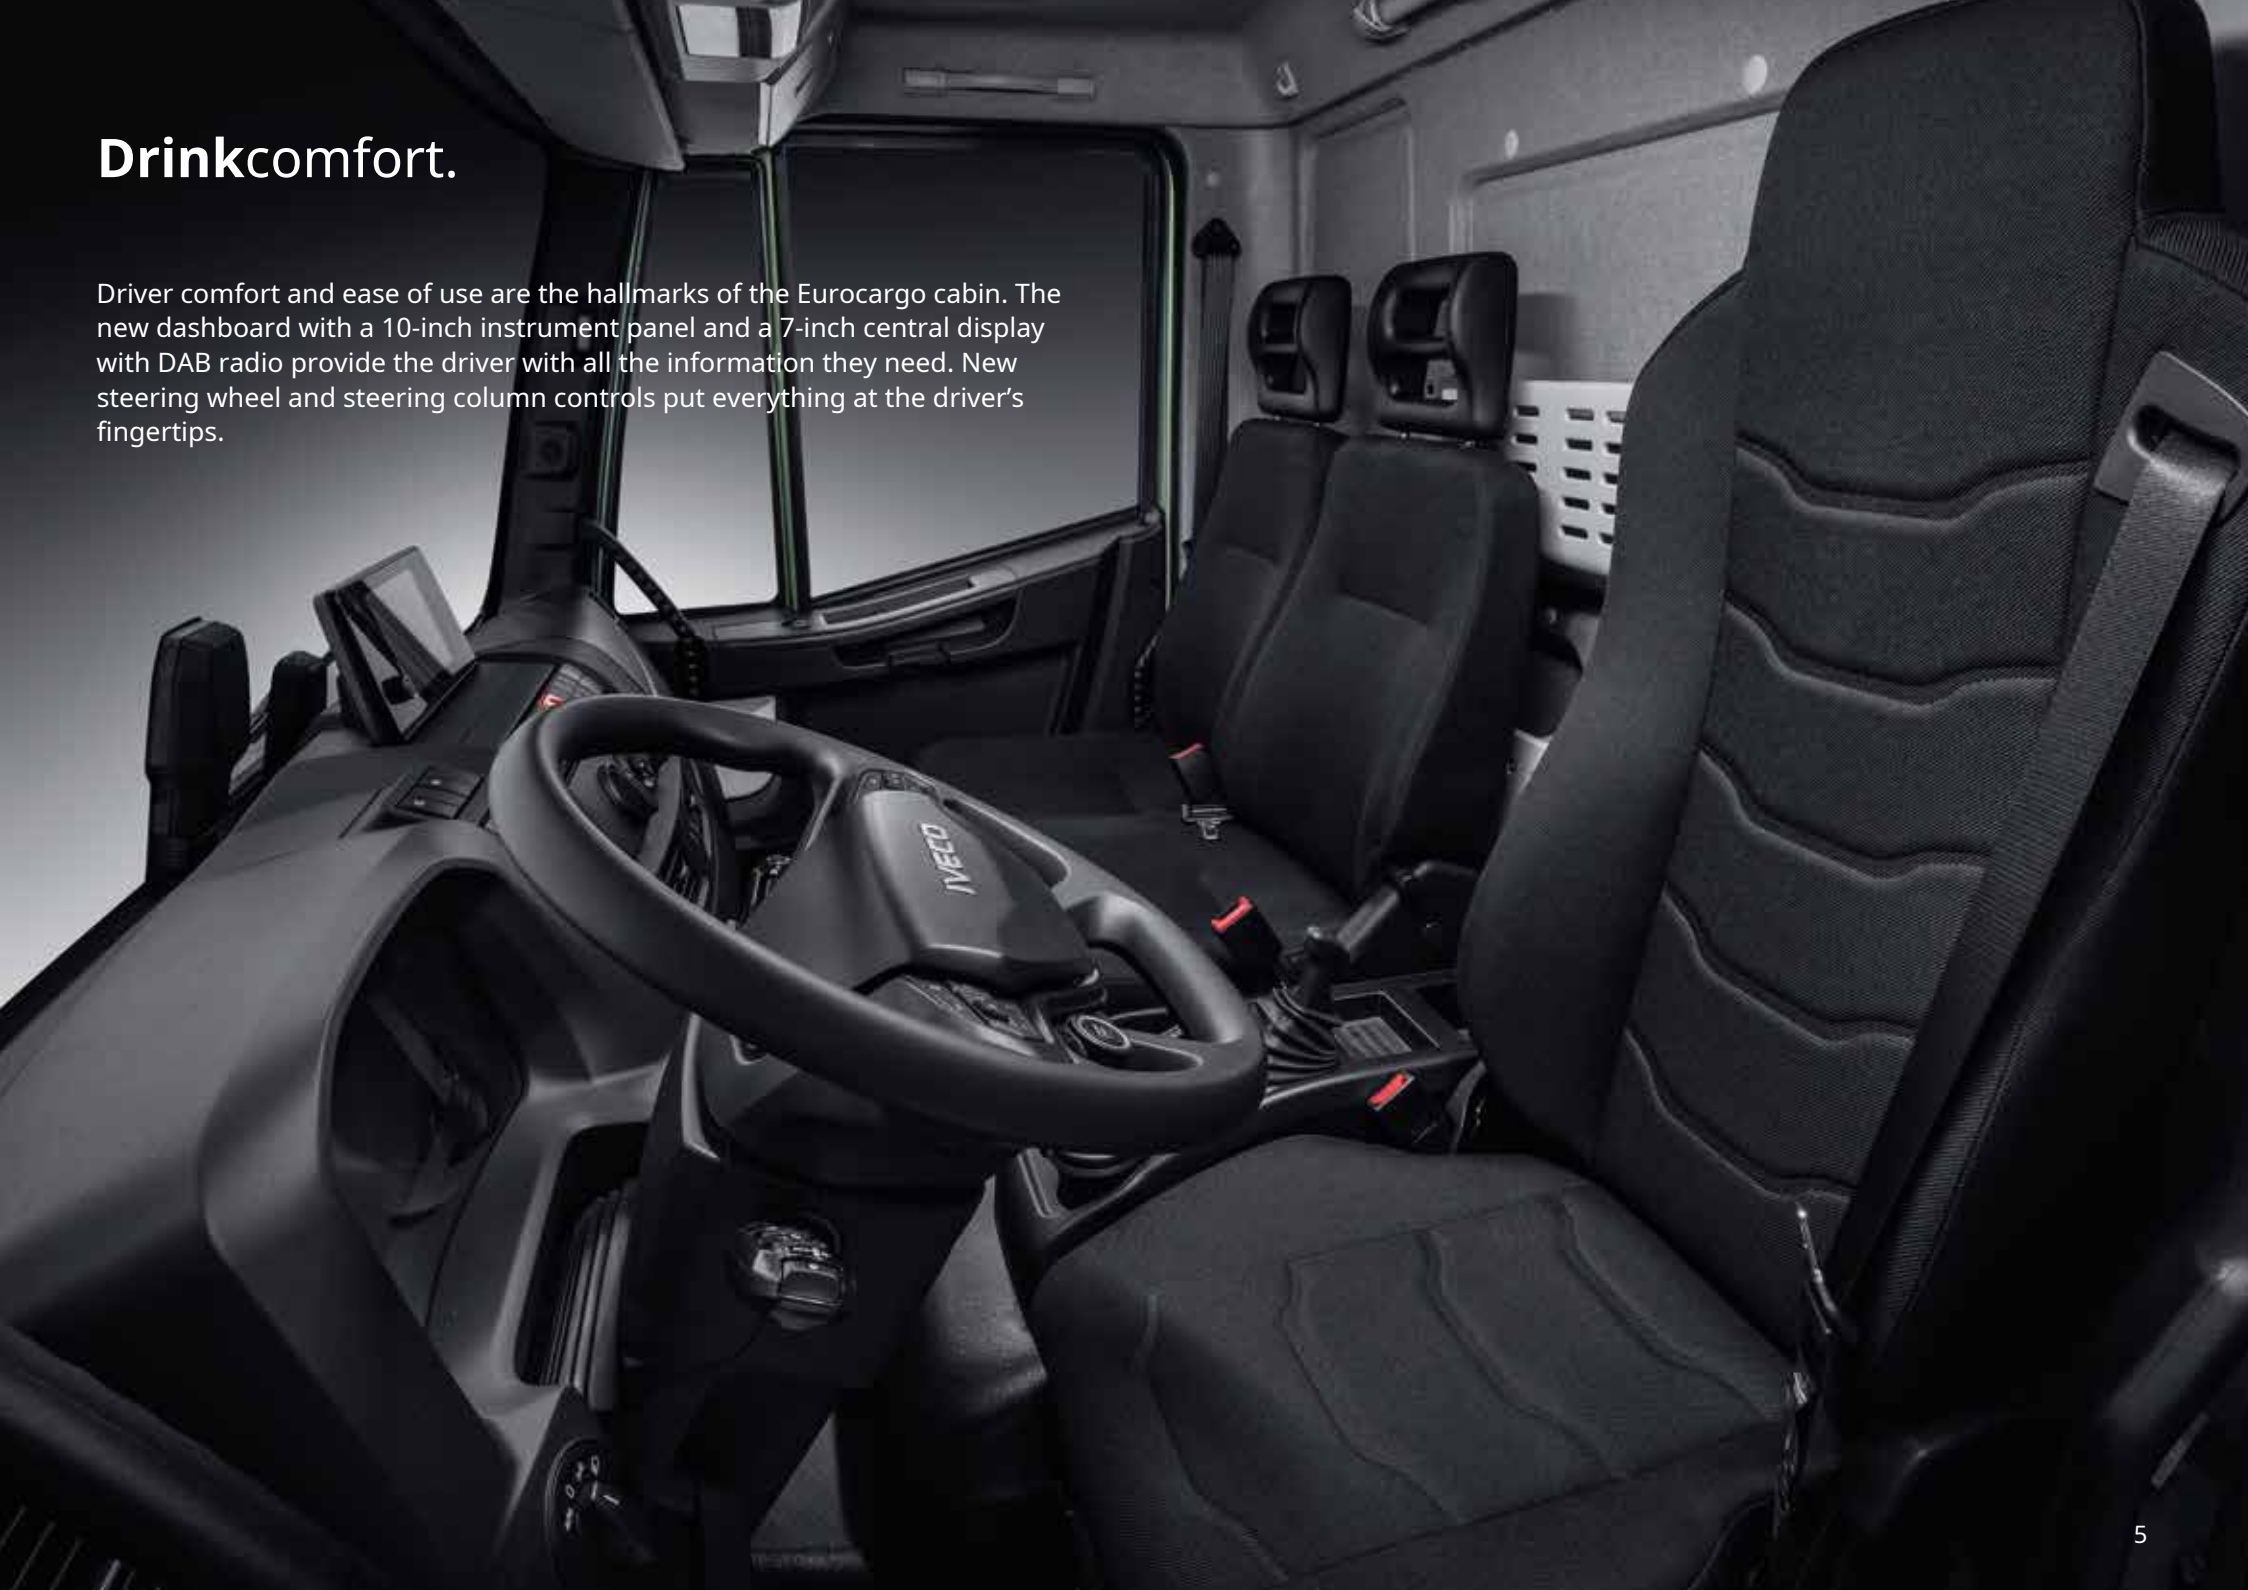

2 Steps

Drinkcomfort.

Driver comfort and ease of use are the hallmarks of the Eurocargo cabin. The new dashboard with a 10-inch instrument panel and a 7-inch central display with DAB radio provide the driver with all the information they need. New steering wheel and steering column controls put everything at the driver's fingertips.

Advanced Driver Assistance Systems (NAMESAKE).

The technology ensures your safety and that of other road users, providing you with a calm and stress-free driving experience.

General Security Regulations.

The latest European General Safety regulations have brought to Eurocargo new features for Advanced Driver Assistance Systems and the protection of other road users.

Cybersecurity.

The issue of cybersecurity has also been addressed. To ensure that the vehicle is fully protected against cyber attacks, IVECO has developed Cybershield, a multi-level security framework covering the Electronic Control Units, internal vehicle Electronic Control Unit (ECU) to ECU communications and all external interfaces.

Lane Departure Warning System (LDWS)

LDWS warns you when a vehicle changes lane without the direction indicators being activated.

Electronic Vehicle Stability Control (EVSC)

The EVSC system monitors lateral loads and reduces power and applies the brakes to control possible spins or rollovers.

Advanced Emergency Braking System (AEBS)

The AEBS system measures the distance to the vehicle in front and calculates the possible collision time in case the driver is distracted. The brake is automatically applied to reduce the vehicle speed and the risk of collision.

Adaptive Cruise Control (ACC)

ACC adjusts vehicle cruising speed to maintain a safe distance from the vehicle in front.

Reverse Obstacle Detection (REV)

REV shows the driver the view from behind the vehicle when reversing. This is achieved using a camera and the centre display in the instrument cluster.

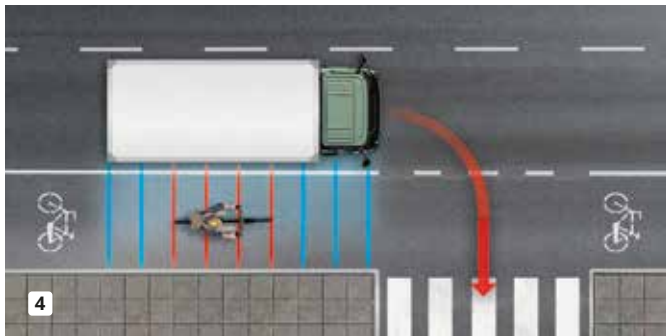

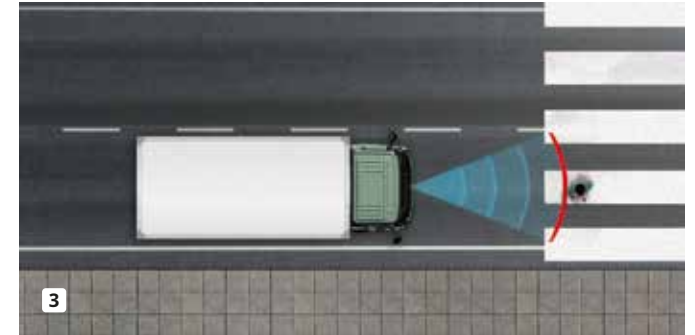

Alcohol Lock (ALC)

ALC prevents people who have impaired driving due to excessive alcohol consumption from operating a motor vehicle. It provides a standardised interface for the installation of the IVECO factory option or any compatible aftermarket device into the vehicle.

For all road users **security**.

Advanced Driver Assistance Systems - ADAS

The technology ensures your safety and that of other road users, providing you with a calm and stress-free driving experience.

1 **DDAW: DRIVER Drowsiness WARNING**

DDAW monitors if you are alert and warns you if you are drowsy. It helps prevent dangerous situations for the driver, passengers and all other road users.

4 **BSIS: BLIND SPOT INFORMATION SYSTEM**

BSIS monitors the side and front of the vehicle and warns the driver of nearby road users.

2 **ISA: INTELLIGENT SPEED ASSISTANT**

ISA is a system that helps the driver observe the appropriate speed for the road environment by providing visual and acoustic feedback to the driver about the speed limit.

5 **TPMS: TYRE PRESSURE MONITORING SYSTEM**

TPMS aims to continuously monitor the pressure and temperature status of tires and alert the driver if a problem occurs.

3 **MOIS: MOVEMENT INFORMATION SYSTEM**

MOIS detects the presence of pedestrians and other road users in the vehicle's immediate blind spot and notifies the driver.

6 **ESS: EMERGENCY STOP SIGNAL**

ESS increases safety by flashing the brake lights to warn other road users behind when the vehicle is subjected to heavy or emergency braking.

Driving keyfi.

Thanks to the new instrument panel, new multifunction steering wheel and new column controls, as well as improved performance and driving comfort, driving the Eurocargo is a pleasure at every turn. The additional safety provided by the new ADAS features ensures safety from the city to the motorway. With 100% connectivity, the driver always feels connected.

100% connection, a new service brings the world.

All our vehicles come with a connection box installed, giving you full control of your vehicle's performance and overall condition. Activate the Standard Starter Pack to discover the potential of IVECO ON Service Solutions. The Standard Starter Pack includes the IVECO ON Access customer portal application.

New fully automatic Gearbox.

The new 8-speed fully automatic transmission with ZF torque converter, electronically selects the most suitable gear olarak seçilmesini sağlar. Maksimum sürüş keyfi vermek üzere tasarlanmış 8 forward gear fully automatic transmission, ergonomic and multifunctional for all engines and all types of tasks. The new fully automatic transmission provides easy operation and driving comfort, while also protecting the drivetrain itself, meaning less maintenance and repair costs. The automatic adaptive gearbox transmission structure ensures that the right gear is engaged instantly and smoothly.

Thanks to the excellent gearshift lever on the steering column, all commands are within easy reach from the steering wheel.

The 8-speed ZF fully automatic transmission is ideal for all urban tasks, heavy traffic conditions and very sayıda dur-kalk için idealdır ve bu sayede filo sahipleri yakıt tüketimi ve bakım masrafları they worry less about it.

Versatile.

For your mission correct powertrain.

The diesel engines in the Eurocargo are the Tector 5 four-cylinder 4.5-litre and the Tector 7 six-cylinder 6.7-litre diesel engines. The range includes seven output levels from 160 to 320 hp with a maximum torque of 1,100 Nm.

These engines are paired with 6- or 9-speed manual transmissions or 8-speed ZF fully automatic transmissions to provide optimum transmission. A 6-speed Allison fully automatic transmission is also available for demanding duties.

Tector 5

Tector 7

DIESEL ENGINES

Euro VI engines	Number of cylinders	Away	Strength	Maximum torque
Tector 5	4 rows	4.5 liters	118 kW (160 hp) at 2,200 rpm	680 Nm between 1,100 and 1,600 rpm
			137 kW (190 hp) at 2,200 rpm	700 Nm between 1,100 and 1,600 rpm
			152 kW (210 hp) at 2,500 rpm	750 Nm between 1,400 and 1,800 rpm
Tector 7	6 rows	6.7 liters	162 kW (220 hp) at 2,500 rpm	800 Nm between 1,250 and 1,900 rpm
			185 kW (250 hp) at 2,500 rpm	850 Nm between 1,250 and 2,050 rpm
			206 kW (281 hp) at 2,500 rpm	1,000 Nm between 1,250 and 1,950 rpm
			235 kW (320 hp) at 2,500 rpm	1,100 Nm between 1,250 and 1,900 rpm

Product range.

Diesel engine series 4x2 and 4x4.

II AYA, choose between 17 wheelbases, 7 engine powers, 2 fuel types, 4 transmission types, 4 suspension types and 4 cabin types. More than 11,000 vehicle combinations are available. Eurocargo has a product range to meet all requirements.

Suspensions.

You can choose the type of suspension suitable for any task:

- Parabolic or reinforced parabolic leaf springs for straight road use.
- Semi-elliptical leaf spring for rougher terrain.
- Air suspensions controlled by an ECAS (Electronically Controlled Air Suspension) system to guarantee a constant vehicle height regardless of the load, can be fitted to the rear axle only or to both axles. It allows the vehicle to rise and lower to sit level with the ground in the loading area.

Every sky.ready to reve.

Urban deliveries, regional deliveries from city to city, construction, municipal projects and needs or off-road... Eurocargo always has the ideal vehicle for your task, even for the most special applications.

Maintenance and Repair Package

Increased Maintenance Interval,
Increases total cost of ownership performance.

Bakım ve Onarım with package aracınızın değerini, performansını ve iş verimliliğinizi you can protect.

Our maintenance and repair contract plans will maximize the availability of your vehicle. You can rely on our skilled workforce and guaranteed high-quality IVECO Original Parts.

To create a contract tailored to your needs
Combine Maintenance and Repair package contents.

CARE

Covers maintenance and lubricants, oils and other fluid changes according to the Maintenance and Repair Manual.

DRIVELINE

Covers engine, fuel injection, transmission, propeller shaft and differential repairs.

NEW

DRIVELINE PLUS

It provides intermediate protection by adding DRIVELINE contract repairs for the exhaust system, starter motor and alternator, other transmission components, electrical components and PTO Multipower.

WEAR

For drum brakes, the clutch covers brake pads, brake discs, brake drums or brake linings.

FULL REPAIR

Extending the DRIVELINE PLUS contract with repairs for the brake system (excluding wear components), clutch cylinder, suspension, heater, air conditioning, air compressor increases the level of coverage even further.

AdditionalScopes.

You can further customize your coverage with additional options:

24/7 roadside assistance

Roadside assistance for warranty repairs.

Towing service

Towing service to the nearest service point for warranty repairs.

Batteries

Battery repair and/or replacement, including 24/7 roadside assistance and 24-Hour Call Service when covered by a maintenance agreement.

Adding Oil

Engine oil addition is limited to 2 litres per 3,000 km.

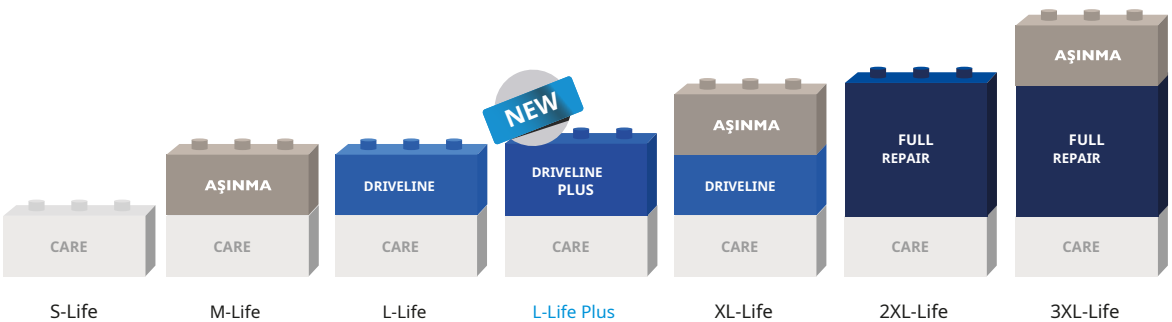

Lightbulb

Replacing faulty bulbs.

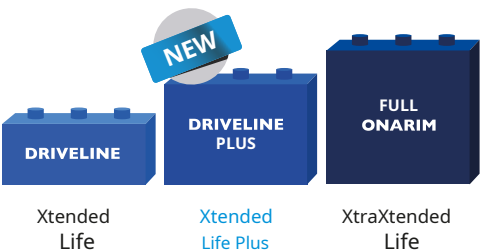

Wiper blades

Replace windshield wiper blades once a year.

To meet your requirements select and combine:
