

TECHNICAL DATA SHEET

STERILIZATION FLAT/GUSSET REEL, 60gsm

- PRODUCT CODE** : 4AFR (Flat Reel) - 4AGR (Gusset Reel)
- RELATED STANDARDS** : 4A Medical flat and gusset reels are in compliance with the provisions of the Medical Device Regulation 2017/745 for medical devices.
- INTENDED USE** : 4A Medical reels are designed to provide excellent barrier for sterile medical device packaging purposes. Reels meet the Medical Industry's requirement for high quality, hygiene and safety levels. 4A Medical reels are used for the packing of the Medical Devices before sterilization and it maintains the sterility of the products after sterilization. 4A Medical reels are ease to package and indicator used for the sterilization provides information with the sterilization status of the medical devices. Sterilized material in sterilization package is storable for up to 5 years after the sterilization in a clean room conditions. Sealing temperature is 180-200C.
- FILLING VOLUME** : According to DIN 58953-7 (German national standard): Seleable paper bags and seleable pouches and reals shall be filled up to 3/4 max of their volume. This limits avoids too high stress / burdon to the seals. Belowe the bottom seal there must be space of minimum 30 mm between load and sealing area. There is no known limit bu standarts for weight and it is based on experience. However, it is suggested to follow the 3/4 rule. In terms of solid, heavy load (metal instruments), it is the weight itself, in case of any sharp objects which could damage the material, and the volume of condensate (directly related to mass=weight) which is created during the steam sterilization.
- OPERATION CONDITIONS** : 4A Medical reels are used for steam, ethylene oxide, formaldehyde sterilization methods. The sterilization conditions should be determined by the end user regarding to material to be sterilized.
- SPECIFICATIONS** :
