

L-ZEAL56

~ Asymmetric tread pattern

Asymmetric tread pattern design with lateral grooves linked inside provide excellent drainage performance.

~ Wide and large shoulder

Wide and large shoulder blocks with sipes design ensure the blocks peristalsis slightly while turing corner and changing lanes, bring stable handling and great driving performance.

~ Linked pattern

Linked pattern design. Linked pattern design reduce the driving noise and provide great wetland grip performance.

~ Vertical ribs

Vertical ribs improve high-speed driving stability.
