

Description

3-Ways Syringe with Two Autoclavable Tips

Waldent 3-way syringe has 2 nozzles in a box controlled by 2 buttons. The left button controls the water flow volume, and the right button controls the airflow volume. Pushing both buttons at the same time generates a mist.

Waldent 3-Ways syringe features an O-ring groove that secures the tip-lock for patient safety and eliminates leakage.

The angle in the tip provides an ideal placement of the tip anywhere in a patient's mouth and is strong enough

to allow for retraction.

Waldent 3-Way Syringe Is Made Of:

- The box and housing are made of premium Quality Stainless Steel
- The handle is made of High-Quality aluminum with smooth styling that fits comfortably in your hand
- The package includes 2 Autoclavable tips
- Tips are constructed of solid alloy

INDICATION:

- Waldent 3-way syringe supplies a focused stream of compressed air, water, or a combination of both
- Frequently used to clean a tooth or surface during dental treatment
