

REF SYS314 / SYS315

VITEK® 2 / VITEK® 2 Compact

CERTIFICATE OF COMPATIBILITY WITH BIOMÉRIEUX COMPLEMENTARY TESTS

bioMérieux offers a wide range of microbiological products from culture to identification and susceptibility testing. As part of its global offer, bioMérieux verifies the compatibility of its product ranges.

VITEK® 2 is an automated microbial system dedicated for Identification and Susceptibility testing.

Additional reagents tested with VITEK® 2 (ref. SYS314) and VITEK® 2 Compact (ref. SYS315):

Compatibility studies¹ were performed with the following bioMérieux products² :

These studies were performed according to protocols indicated in each culture medium compatibility certificate (see the reference number indicated hereafter). They were conducted with a panel of representative strains, in accordance with the intended use of the tests, and in comparison with a blood agar, Trypcase Soy agar, Mannitol Salt agar, Sabouraud agar, Sabouraud Chloramphenicol agar, Sabouraud Gentamicin Chloramphenicol agar or Sabouraud Dextrose agar used as references.
